Asset Planning

Report Date: 12/18/2018

Clerk's File #: AFB/13207

**To:** Mayor and Members of City Council

**Recommendation:**

THAT City Council **RECEIVE** the 2019 Capital Budget 7-Year Plan documents reflective of approx. \$845.104 M in total funding; and,

THAT City Council **APPROVE** the recommended allocation of the 2019 available funding, net of funding required for pre-commitments and placeholders, for capital projects totalling approximately \$60.422 M (subject to any further changes approved by Council); and,

THAT City Council **APPROVE IN PRINCIPLE** the recommended allocation of the 2020 through 2025 available funding, net of funding required for pre-commitments and placeholders, for capital projects totalling approx. \$564.538 M (subject to any further changes approved by Council); and,

THAT City Council **APPROVE** redirecting funding of \$2,522,000, previously identified as a placeholder for a pedestrian tunnel, to the City Hall Square and Civic Esplanade project (PLN-021-07); and,

THAT City Council **APPROVE** the changes in the annual distribution of funding between the City Hall Square and Civic Esplanade project (PLS-021-07) with the E-Plan & E-Permit project (PLN-005-07) so they are more in line with the anticipated timing of expenditures thereby reducing interim financing costs; and,

THAT City Council **APPROVE** the redistribution of the \$15,000,000 placeholder for the Paul Martin building, as identified in the Capital Budget project number CAO-001-16; and,

THAT City Council **RESCIND** the pre-commitment of \$125,000 in 2021 from the Victoria EA – Chatham to Park project (OPS-006-17) as there is sufficient funding in the University Ave. 8-80 project (7144008) to complete the Victoria EA study costs.

**Executive Summary:**

The 2019 Capital Budget being submitted to Council updates the 2018 plan for 2019 through to 2025. This plan not only brings forth the year 2024 but also introduces an additional year (2025) to move to a 7-year capital plan. In each subsequent year an additional one year will be added to the capital budget plan so that by the year 2022, City Council will be presented with a 10-year capital plan.

The recommended allocation of funding by major category within the 2019 7-year capital budget of approx. \$845.104M, including funding for the Commitments and Placeholders is summarized in the table below.

| Funding Allocation  | 7-Year Capital Plan |                |                |                |                |                |                |                |
|---|---------------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
|   | 2019                | 2020           | 2021           | 2022           | 2023           | 2024           | 2025           | TOTAL          |
|   | (\$ 000's)          | (\$ 000's)     | (\$ 000's)     | (\$ 000's)     | (\$ 000's)     | (\$ 000's)     | (\$ 000's)     | (\$ 000's)     |
| <b>Allocation of Available Funding by Major Category:</b> |                     |                |                |                |                |                |                |                |
| Community & Economic Development                          | 2,180               | 12,634         | 4,331          | 6,400          | 12,997         | 9,546          | 13,810         | <b>61,897</b>  |
| Corporate Property Infrastructure                         | 21,639              | 10,009         | 10,700         | 13,017         | 4,674          | 4,266          | 5,278          | <b>69,583</b>  |
| Corporate Technology                                      | 5,712               | 4,555          | 8,652          | 7,400          | 4,146          | 2,865          | 3,677          | <b>37,006</b>  |
| Capital Reserve Replenishment                             | 3,210               | 3,210          | 3,210          | 3,210          | 3,210          | 3,210          | 3,210          | <b>22,470</b>  |
| Parks & Recreation  | 10,236              | 8,948          | 13,337         | 10,121         | 8,286          | 10,561         | 7,408          | <b>68,897</b>  |
| Roads   | 25,257              | 36,446         | 39,143         | 32,237         | 36,085         | 37,265         | 40,659         | <b>247,091</b> |
| Sewers  | 29,650              | 27,284         | 24,398         | 26,675         | 27,161         | 27,277         | 26,223         | <b>188,668</b> |
| Transportation Infrastructure                             | 21,726              | 17,685         | 18,161         | 23,613         | 20,168         | 25,787         | 22,352         | <b>149,492</b> |
| <b>Total Allocation of Available Funding</b>              | <b>119,610</b>      | <b>120,770</b> | <b>121,931</b> | <b>122,672</b> | <b>116,727</b> | <b>120,778</b> | <b>122,616</b> | <b>845,104</b> |

The focus of the 7-year plan continues to be the roads and sewers categories, with a total of approximately \$435.759 M of funding (or more than half of the available funding) being recommended for these types of projects.

**Background:**

At its meeting of Monday July 23, 2018, Council adopted Council Resolution CR386/2018 which directed, in part, the following:

*“...That the report of the Chief Financial Officer & City Treasurer dated July 23, 2018 regarding the 2019 Proposed Budget Process & Timeline **BE RECEIVED** for*

*information.*

Through the 2019 budget process, the 7-year Capital Budget Plan is being updated to include projects from 2019 through to 2025.

### **Discussion:**

On Monday January 15, 2018, Council approved the 2018 Capital Budget 6-Year Capital Plan (per B72/2018). The 2019 Capital Budget being submitted to Council updates that plan for 2019 through to 2025. This plan not only brings forth the year 2024 but also introduces an additional year (2025) to move to a 7-year capital plan. In each subsequent year an additional one year will be added to the capital budget plan so that by the year 2022, City Council will be presented with a 10-year capital plan. This is a significant jump from the traditional 5-year capital plan and will improve long range capital planning and ensure that the City is prepared to meet all the necessary requirements of Ontario Regulation 588/17 – Municipal Asset Management Plans.

### **Overview**

Total funds of approx. \$845.104 M are projected to be available in this 2019, 7-year capital plan (2019 – 2025) as detailed within the 2019 Recommended Capital Budget book. This amount includes the following six (6) factors:

1. Contributions from the operating budgets remain largely unchanged from those in last year's capital budget. Administration has recommended an operational budget issue for an increase of \$1.5 M in capital budget funding starting in 2019 (Budget Issue # 2019-0338) to help address the matter of the continued declining purchasing power relative to the capital budget caused by inflationary factors. This amount has been included as additional funding within Administration's recommended 2019 7-year capital thereby increasing the Pay-As-You-Go Operating Budget to \$22.955 M annually;
2. Windsor Police Service (WPS) Board has recommended an operational budget issue for an annual increase of \$1.025 M to their equipment replacement reserve, starting in 2019. Approval of this request will result in increased funding of \$7.175 M over the 2019 to 2025 timeframe for WPS capital projects. There is however \$4.975M in WPS capital projects that were previously approved in principle and funded from Pay-As-You-Go from 2019 to 2023. As such, approval of the reserve increase put forth by WPS allows WPS projects to be funded from their reserves thereby releasing \$4.975M in PAYG funding to address other priority projects.
3. YQG has recommended a Board approval of \$10.07 M for 2019 through to 2025 for capital asset replacement/refurbishment upgrades. These projects will be funded from YQG reserves, with funds transferred from YQG to the City of Windsor by way of Dividends in advance of spending. Because of this change in funding for these projects, \$3.241 M in Pay-As-You-Go funding over the 2019 to 2025 timeframe was redirected to address other priority projects.

4. City Council previously identified a \$15,000,000 placeholder for the Paul Martin building (CAO-001-16), to be funded in 2019 and 2020 with \$7,500,000 in each year. Given recent changes relative to this project, it is not expected that the funding will be immediately required. As such, a redistribution of the funding over the 2020 – 2025 timeframe is being proposed. This shift in timing relative to funding allows for the \$12M in funding for the Meadowbrook Housing project to be accommodated, thereby achieving the direction put forth by City Council resolution CR433/2018. Additionally, this will allow for other projects which are in immediate need of funding to proceed. A recommendation to approve a change to the distribution of the placeholder funding has been included in this report.
5. City Council previously identified funding for a possible Pedestrian Tunnel along Riverside Drive. There has been significant funding for the Riverfront and various additional features have been completed with others planned over the next several years based on feedback obtained through Public Consultation. This project is not included in those plans. The demolition of the old 350 City Hall is planned for 2019 and will result in an immediate need to proceed with the redevelopment of the City Hall Square and Civic Esplanade. Considering this more urgent need, Administration is recommending that the remaining \$2,522,000 for the Pedestrian Tunnel be redirected to the City Hall Square and Civic Esplanade project (PLN-021-07).
6. The agreement for Federal Gas Tax (FGT) funding for the years 2019 – 2023 has been released. There are differences between the actual amounts we will receive and what was forecasted in the 2018 6-year capital budget for the years 2019 to 2023. A decrease of \$257,165 in both 2019 and 2020 has resulted in a reduction of funding for the Road Rehabilitation Project (OPS-001-07). For 2021 through 2023 there is a total increase in FGT of \$1,625,936, resulting in a net increase over the five years of \$1,111,606. To address the shortfall in funding for 2019 and 2020 some projects previously planned in those years were pushed out to future years.

Part of the process for Capital Budget development includes the identification of changes which impact the previous capital budget projects which were approved in principle. Departments review projects previously approved in principle, which for this budget were projects in the 2019 to 2023 years, to consider if any changes are required. These changes can be a result of several factors including but not limited to; changing demands, higher than expected tenders, unexpected infrastructure failures and/or matching funding requirements for grants.

Based on this review process, new projects and or increases to previously approved in principle projects have been brought forth within the 2019 – 2023 period. There is approximately \$121.44 M in additional capital project funding requests within this timeframe, of which approximately \$67.86M was funded. A full listing of the additional project funding requests from 2019 – 2023 can be found in Appendix A.

Several projects listed in Appendix A were able to be funded by dedicated reserves and or development charges. As a result, there was no impact to other projects to accommodate \$24.67M of the \$67.86M in funded requests.

Appendix B outlines how the remaining \$43.19M was funded, which includes the following five factors, previously identified in this report, and which make up \$25.4M of the \$43.19M:

1. Operational Budget increase in transfer to capital \$1.5 M/year - \$7.5 M.
2. Increase in WPS reserve allowing projects previously funded by PAYG to be redirected - \$4.975 M.
3. YQG funding for their projects allows projects previously funded by PAYG to be redirected - \$3.241 M.
4. Reallocation of Paul Martin funding such that \$7,127,844 is now funded in 2024 and 2025. This results in funding being available in 2019 and 2020 for use on other priority projects.
5. Redirecting the remaining \$2,522,000 for the Pedestrian Tunnel to the City Hall Square and Civic Esplanade.

The remaining \$17.79M was a result of projects being pushed out to 2024 and 2025 or funding for those projects no longer being required.

### **2019 – 2025 Pre-committed and Placeholder Funding**

The City has over the past number of years undertaken a practice whereby some capital funds are pre-committed thereby allowing the City to avoid the issuance of costly long-term debt and in place of such debt utilizing internal funds which are released for immediate use to complete priority projects. In these cases internal financing costs (paid to the City) are included within the project budgets for the unfunded period. This practice is usually tied to the following scenarios:

1. The project is several years long (e.g., Cabana Road 10 years approx. \$46M). If tenders can be issued for larger sections then costs are lower, even if the work will span several years. If work was to be tendered year by year as funding is approved costs would be much higher as the tenders would be for smaller pieces of work and construction would take longer as the required tendering process would need to be done annually. Tenders or Requests for Proposals cannot be issued without confirmation of approved funding. The ability to commit several years of funding for such a project reduces the overall cost by allowing a current tender for a larger piece of work and reduces construction time as there is no start and stop each season. This also works well for bulk purchases of large assets such as playground and buses to take advantage of current and bulk ordering pricing.
2. The other advantage to pre-committing funding for larger multi year projects is that it does not adversely impact any one year of the capital budget. For example had Cabana been funded at \$46M the first year it started it would have consumed almost half of the entire capital budget for that year. Allocating funding over the 10 years leaves sufficient funding room for other projects to proceed.

3. Grants from senior levels of government require confirmation of matching funding. Many grants do not fund projects which are already funded and have already been started by the municipality. In these cases, in order to leverage as much grant funding as possible from the senior government levels we look for appropriate projects which are included in the forecasted capital plan and that meet the required grant guidelines. Often times this requires the pre-commitment of future funds in order to qualify for the grant funding. Failure to do so would result in foregone grant funding. For example, in the case of the Disaster Mitigation and Adaptation Fund, the project is over 10 years for a total amount of \$89M of which \$32M in grant funding has been requested. Aligning City funding with the construction process was key to being able to accommodate the \$57M in matching City funding.
4. The budget includes projects which are anticipated not to start until future years, however assets can and do fail at times sooner than anticipated. As a result, the ability to pre-commit future funding for immediate use allows the asset to be addressed without cancelling or pushing out other projects.
5. Annually Administration will seek pre-commitments to the next year's capital budget funding so that tenders can be issued for projects in the fall, and construction started in the spring. While this does not represent a long pre-commitment period prior to the budget year being finalized, it greatly improves our ability to obtain favourable tender pricing and expedite the construction early in the year.

Placeholder funding ensures that projects which City Council has identified as a priority have funding in place. Administration is not able to reallocate placeholder funding unless formally approved by City Council to do so. This report includes two such situations as previously identified in this report: Paul Martin funding of \$15M which is not immediately required and therefore recommended to have a portion pushed out allowing for the Meadowbrook project to be funded. As well, the pedestrian tunnel project, which is not currently slated to proceed and therefore suggested the funding be used on a more immediate need, that being the City Hall Square and Civic Esplanade project.

The following chart identifies approx. \$220.144 M of the \$845.104 M available funding in 2019 – 2025 that has been previously committed or set as a placeholder by City Council.

| Funding Allocation  | 7-Year Capital Plan |               |               |               |               |               |               |                |
|---|---------------------|---------------|---------------|---------------|---------------|---------------|---------------|----------------|
|   | 2019                | 2020          | 2021          | 2022          | 2023          | 2024          | 2025          | TOTAL          |
|   | (\$ 000's)          | (\$000's)     | (\$ 000's)    | (\$ 000's)    | (\$ 000's)    | (\$000's)     | (\$000's)     | (\$ 000's)     |
| <b>Pre-Commitments &amp; Placeholder Funding Allocations</b>            |                     |               |               |               |               |               |               |                |

Detailed listings of the 2019 to 2025 projects can be found in the 2019 7-year Recommended Capital Budget book starting at Section F.

### Long Term Debt Considerations

Consistent with the very successful Pay-As-You-Go approach which has saved tens of millions of dollars in interest costs, the 7-year plan is funded from available funds without the use of any long-term debt. Details of the City's long-term debt projections are provided to Council as part of the 2019 Operating Budget document.

It is worth noting that the City's consolidated long-term debt currently stands at approximately \$78 M (projected for year-end 2018) and is expected to decrease to approximately \$47 M by 2022. These projections are made on the basis that there is no issuance of new debt by the City or its consolidated Boards in the forecast period. It is noted however that City Council did provide approval in mid 2018 to the Windsor Essex County Housing Corporation (WECHC) to pursue mortgage financing with CMHC relative to the construction of the Meadowbrook Housing Development. Current debt projections do not include any amount relating to this long-term debt pending approval by City Council of the final project financing components for this project. WECHC has been working to finalize this plan with CMHC and an updated report will be forthcoming to City Council during the 2019 budget deliberations. Should additional long-term debt be issued during this period it would change the long-term debt projections. This is down from a peak debt level of \$229 M in 2002. These dramatic decreases in long-term debt have coincided with the largest capital programs in the City's history. It is estimated that debt levels would currently stand at approximately \$500 M had the City not adopted the current Pay-As-You-Go funding approach. It is also noteworthy that according to the latest Ministry of Finance statistics (2017) the City of Windsor only spends 2.0% of its

operating revenues on servicing its long-term debt; this compares very favourably to the median of 5.2% in the province and allows Windsor to spend more of its revenues on valuable services rather than on repaying debt.

### **Public Consultation Process**

The 2019 Budget process provided the opportunity for public input at the beginning of the process on July 23<sup>rd</sup>, 2018. Additionally, public input can occur during budget deliberations which are currently scheduled for April 1<sup>st</sup> and 2<sup>nd</sup> of this year.

The 2019 Capital Budget documents are expected to be publicly available the week of March 11<sup>th</sup>, 2019 and will be available for viewing in every branch of the Windsor Public Library and at City Hall (Office of the City Clerk & Office of the Chief Financial Officer), and on the City's web site.

### **Authority to Award Tenders**

As per the recently revised Purchasing Bylaw, awards of tenders meeting certain specifications will be awarded directly by Administration through the Delegation of Authority (in order to expedite completion of the projects) subject to the following conditions:

- the tender is being awarded to the low bidder,
- the low tender meets the required specifications for the project,
- the low tender meets all the requirements of the purchasing bylaw, and
- the low tender is within budget for the project

Administration will prepare a Delegation of Authority (DOA) report to award the tenders and then report the various awards to Council through the normal DOA semi-annual reporting process.

### **Risk Analysis:**

As is the case in any budget, there are a number of risks that are inherent in the capital plan being recommended. The more potentially significant ones are the following:

- The only way to truly know the actual costs of the various projects is after the completion of the related tenders. Therefore, the primary risk at this time is the actual costs of some of the projects could be greater than budgeted. This risk is likely to almost certain to occur and the consequences, based on the actual issues experienced in 2018 are considered moderate, classifying this as a significant risk. This risk is mitigated by ensuring cost estimates are being made by experienced people and using professional judgment, appropriate inflationary factors are considered and as well as the requested increase of \$1.5M to the capital budget to address these inflationary pressures, as presented in the Operating Budget.
- There is a risk that the funding stream projections over the 7-year planning horizon will not materialize to the full extent projected. This risk is likely to materialize but the seriousness of the consequences are expected to be low as most funding streams are known and under the control of the City itself. The most immediate risk of this nature is the potential spin off effects of any cuts that

may be made to the OMPF program in future years. The City receives approximately \$23 million annually in OMPF funding and, while those funds are not used to directly fund capital projects, significant reductions to the program will make it more difficult for the City to transfer the budgeted amounts from the operating to the capital budget.

- There is also a risk, common to all Ontario municipalities, that the funding sources available to the municipality, notwithstanding significant increases over the last 10 years, are not sufficient to tackle the infrastructure deficit. This risk is considered likely to almost certain to occur and with the seriousness of the consequences being high, making this a critical risk (albeit a risk that nearly all municipalities face). The Asset Management Plan will be brought to City Council in 2019 with funding recommendations provided to sustain our current assets and mitigate the impacts of deterioration with those recommendations, if approved directing the development of the 2020 8-year capital budget.
- There is also a risk that the future capital funding plan approved in principle may need to be revised or revisited in future years should competing or significant financial demands arise as a result of major ongoing litigation matters, significant capital and development initiatives, etc. This can be mitigated to some extent by setting aside sufficient reserves, use of new and alternative funding strategies and the consideration of future funding plans associated with the upcoming Asset Management Plan.
- As stated in the Background section of this report there are several key factors included in the 2019 7-Year Capital Budget presented to City Council. Two of these factors require City Council to approve Operational Budget recommendations, specifically the annual increase of \$1.5M transfer from Operating to Capital as well as the annual increase of \$1.025M to the WPS reserve. These two factors alone resulted in \$17.675M in additional funding over the 7 years. Should City Council choose not to approve these recommendations in the 2019 operational budget, amendments will be required to reduce the recommended capital projects in order to balance with available funding.

### **Financial Matters:**

Financial matters have been discussed throughout this report. The focus of the 7-year plan continues to be the roads and sewers categories, with a total of approximately \$435.759 M of funding (or more than half of the available funding) being recommended for these types of projects. Council will also note that the 2019 recommendations relative to the Sewer Surcharge Budget propose an increase in capital expenditures of approximately \$9.6 million annually for flood mitigation. Such increase would be utilized for such items as Basement Flooding Subsidy, Sewer Master Plan Implementation, Strategic Preventative Maintenance and Pollution Control and Pumping Stations. At this time the Capital Budget as presented does not include specific projects relative to this proposed funding pending council decision. Should Council approve this additional funding it would provide increased funding approximating close to \$70M over the 7 years of the Capital Plan.

Despite the City's vastly increased investments in capital projects over the last decade, the City's infrastructure deficit (as with most municipalities) is substantial. Administration actively seeks grant funding to assist in addressing these challenges, however it is not

enough to sustain our assets. An updated Asset Management Plan will be brought to City Council in 2019 along with recommendations for a long-term funding strategy.

Finally, it is noted that the policy of the City, as approved by City Council, is to limit the pre-commitment of funds to the 5-year capital planning period. At times there have been funds expected to be available beyond the 5-year planning and as such are defined as placeholders for specific initiatives. However, funding for these initiatives could be stopped if future City Councils did not view those projects to be the highest priority at that time.

**Consultations:**

City department and agencies

**Conclusion:**

The 2019 Capital Budget 7-Year Plan, totalling approx. \$845.104 M is being recommended to Council consistent with the directions previously received.

**Planning Act Matters:**

N/A

**Approvals:**

**Special Meeting of Council  
Decision  
Monday, April 01, 2019**

Moved by: Councillor Holt  
Seconded by: Councillor Morrison

Decision Number: B8/2019

That City Council **RECEIVE** the 2019 Capital Budget 7-Year Plan documents reflective of approx. \$845.104 M in total funding; and,

That City Council **APPROVE** the recommended allocation of the 2019 available funding, net of funding required for pre-commitments and placeholders, for capital projects totalling approximately \$60.422 M (subject to any further changes approved by Council); and,

That City Council **APPROVE IN PRINCIPLE** the recommended allocation of the 2020 through 2025 available funding, net of funding required for pre-commitments and placeholders, for capital projects totalling approx. \$564.538 M (subject to any further changes approved by Council); and,

That City Council **APPROVE** redirecting funding of \$2,522,000, previously identified as a placeholder for a pedestrian tunnel, to the City Hall Square and Civic Esplanade project (PLN-021-07); and,

That City Council **APPROVE** the changes in the annual distribution of funding between the City Hall Square and Civic Esplanade project (PLS-021-07) with the E-Plan & E-Permit project (PLN-005-07) so they are more in line with the anticipated timing of expenditures thereby reducing interim financing costs; and,

That City Council **APPROVE** the redistribution of the \$15,000,000 placeholder for the Paul Martin building, as identified in the Capital Budget project number CAO-001-16; and,

That City Council **RESCIND** the pre-commitment of \$125,000 in 2021 from the Victoria EA – Chatham to Park project (OPS-006-17) as there is sufficient funding in the University Ave. 8-80 project (7144008) to complete the Victoria EA study costs; and,

That Administration **BE DIRECTED** to **REPORT BACK** to Council regarding the infrastructure deficit and a high-level plan to address it; and,

As amended a total of \$240,000 from the 2019 Grant Matching and Inflationary Pressures project (FIN-001-19) be reallocated to: Capitol Theatre Capital Improvements (ENG-010-17) in the amount of \$40,000 for the new Marquee sign and Pedestrian Crossing (OPS-001-19) in the amount of \$200,000 for priority pedestrian crossings as identified in agenda Item 11.14.

Carried.

\*Note: All Pre-commitments/Placeholders are effective as of February 4, 2019 Council meeting.

\*\*Note: The Federal Gas Tax (FGT) amount in 2019 is likely to increase by a one-time top up in 2019 in the amount of \$13,464,160, pending royal assent of the 2019 Federal Budget (by July 2019). Administration has identified and presented Council Report C 53/2019 to Council listing the priority projects that will proceed should the FGT funding get approved. This amount is NOT included in the chart above.

**Attention: Mr. Joe Mancina, Chief Financial Officer, City Treasurer**

Dear Mr. Mancina

**RE: Roseland Golf and Curling Club Ltd 2019 Capital Budget Submission**

---

As you are aware, the Roseland Golf and Curling Club and the Little River Golf Course are wholly owned assets of the City of Windsor. In 2018, stemming partially from audit findings of the Roseland Golf and Curling Club by Price Waterhouse Cooper; Roseland received \$100K as an initial start to getting some of the more immediate capital needs addressed while Roseland Administration, the Roseland Board of Directors and the City Asset Management Group begin the process of undertaking the development and planned implementation of capital and business needs.

From the 2018 capital budget, all projects and purchases have been completed and additionally funds were reserved to pay the interest cost to bring the funds forward from 2022 as well as funds for strategic planning. Once available funds were realized from actual capital expenditures, Roseland Administration with City Asset Management Group have begun developing capital and business needs.

Both the Roseland and Little River operations generate revenue and profit, which is seriously minimized by significant overhead costs of maintenance and repairs to aging infrastructure and equipment. The general condition of key elements of the asset also has begun to affect the ability to generate revenue.

On the direction of the Roseland Board of Directors, the attached 2019 capital budget request represents a request for capital funds for restoration and replacement only and excludes any request for capital for growth..

With the recommendation of the Roseland Board of Directors, I forwarded to you and request for consideration for 2019 capital funds for the Roseland Golf and Curling Club as follows:

Roseland Building Infrastructure Rehabilitation - \$90,000  
Roseland Grounds Equipment Replacement - \$ 175,000  
Little River Golf Course Infrastructure Replacement - \$100,000

Thank you for your consideration.

Phil Roberts  
General Manager  
Roseland Golf and Curling Club Ltd.

# Project Version Summary

**Project #** ECP-010-09      **Service Area** Agencies, Boards & Committees  
**Budget Year** 2019      **Department** Windsor Airport  
**Asset Type** Unassigned      **Division** Windsor-Airport  
  
**Title** Airport Various Asset Replacement/Refurbishment/Upgrades  
**Budget Status** Council Approved Budget  
**Major Category** Transportation Infrastructure  
**Wards** Ward 9  
**Version Name** Main (Active)

| <b>Project Description</b><br>The YQG letter outlines a list of projects required over the next 7 years totaling \$10,070,000 to be funded by YQG. The list of projects will be priorities for 2019 with expenditures not exceeding \$1,915,000 to ensure the safe operations of the airport.   |   |                                    |                       | <b>Version Description</b><br>As per CR549/2018, Council approved a pre-commitment of \$2,550,000 in 2019 for Runway 12-30. Additional request in the 2019 7-year Capital Budget funds the additional projects as outlined in the attached letter.   |                |                |  |          |                   |               |           |      |           |                 |            |                       |              |                      |           |                 |                                    |                       |           |   |           |   |           |      |         |   |         |      |         |                |             |           |            |         |   |       |   |   |   |                   |  |          |                   |   |  |  |  |  |  |  |  |  |  |            |      |      |      |      |      |      |      |       |       |                 |  |  |  |  |  |  |  |  |  |                                   |  |  |  |  |  |  |  |  |  |  |           |           |           |           |         |         |         |   |            |              |                  |                  |                  |                  |                |                |                |          |                   |                 |  |  |  |  |  |  |  |  |  |                                 |   |   |   |   |   |   |   |   |   |                                     |   |   |   |   |   |   |   |   |   |                             |   |   |   |   |   |   |   |   |   |                |           |           |           |           |         |         |         |   |            |                            |   |   |   |   |   |   |   |   |   |              |                  |                  |                  |                  |                |                |                |          |                   |

Corporation of the City of Windsor  
350 City Hall Square West  
Windsor, ON N9A 6S1

Attention: Onorio Colucci, Chief Administrative Officer

Dear Mr. Colucci;

**SEVEN (7) YEAR CAPITAL PLAN FOR AIRPORT OPERATIONS  
YOUR QUICK GATEWAY (WINDSOR) INC. - UPDATED**

---

Your Quick Gateway (Windsor) Inc. ("YQG") hereby requests your consideration for funding the seven-year drainage plan for the Windsor International Airport. The capital funding is requested to sustain airport operations in compliance with ongoing Federal, Provincial and Municipal regulatory and legal requirements.

**Airport Operations**

Section 6.3 of the Airport Management Agreement between the Corporation of the City of Windsor and YQG provides as follows:

YQG shall prepare a five-year Capital Improvement Plan for the Airport, which shall be reviewed by the Airport Coordinating Committee on an annual basis and recommended to Council for approval. Once the five-year plan has been approved by Council, items forming part of this plan shall be included in a Capital Budget within the five-year timeframe as decided by YQG and approved by the Airport Coordinating Committee.

The proposed capital improvements will benefit all airline passengers, general aviation aircraft as well as flight training facilities, the MRO and cargo aircraft. The capital improvements are required to help ensure that the airport meets safety-related regulatory requirements as prescribed by Transport Canada as well as the long-term growth of air service for domestic and international travelers.

YQG is requesting capital assistance for airport drainage works, from the Sewer Surcharge funds over the next 7 years. These funds will be used for maintenance and improvements to the open Municipal drains crossing Airport property, rehabilitation and replacement of sub-surface drainage lines under the Runways and taxiways and maintenance and replacement of the surface and sub-surface drainage system at the ATB and in the general aviation area.

| Year          | 2019    | 2020    | 2021    | 2022    | 2023    | 2024    | 2025    |
|---------------|---------|---------|---------|---------|---------|---------|---------|
| Drainage work | 345,000 | 380,000 | 380,000 | 300,000 | 195,000 | 300,000 | 300,000 |

YQG is requesting to approval of \$10,070,000 for 2019 to 2025 capital projects listed below which will be funded from YQG reserves, with funds transferred from YQG to the City of Windsor by way of Dividends in advance of spending. Timing of the projects will be dependent on YQG cash flows, with each tranche of specific funding approved annually by City Council and the YQG Board of Directors.

YQG is specifically requesting approval for Capital spending of \$1,915,000 in 2019 from the following items:

| Project                                 | Estimated Cost | Project                                  | Estimated Cost |
|---|----------------|--|----------------|
| Design & Reconstruction of Hayes Road   | 1,500,000      | Rehabilitation of Apron I                | 1,400,000      |
| Replace 2 Tractors                      | 320,000        | Apron III & Delta Taxiway Rehabilitation | 1,800,000      |
| Approach lighting for runway 30         | 1,400,000      | Replace Fire Suppression Mains           | 250,000        |
| Tandem Axle Plow truck                  | 210,000        | Replace International Baggage Conveyor   | 250,000        |
| Replace Backhoe                         | 175,000        | New Sand Storage Building                | 140,000        |
| Widening of Taxiway India               | 250,000        | Runway Edge Lighting 07-25               | 750,000        |
| Replace Front End Loader                | 260,000        | New Runway Condition Reporting System    | 55,000         |
| Improvements to CSB                     | 280,000        | Replace Emergency Generator              | 250,000        |
| Taxiway Alpha Rehabilitation            | 280,000        | ATB Expansion, (preliminary design)      | 150,000        |
| Runway 07-25 rehab design & engineering | 200,000        | Replacement of 2 HVAC units              | 150,000        |

*Note: the projects identified above are quoted in 2018 dollars and no inflationary consideration has been given.*

Thank you for your consideration of the above and we look forward to hearing from you at your earliest convenience.

Sincerely,

YOUR QUICK GATEWAY (WINDSOR) INC.

Carolyn Brown  
Chief Executive Officer

Corporation of the City of Windsor  
350 City Hall Square West  
Windsor, ON N9A 6S1

Attention: Onorio Colucci, Chief Administrative Officer

Dear Mr. Colucci;

**SEVEN (7) YEAR CAPITAL PLAN FOR AIRPORT OPERATIONS  
YOUR QUICK GATEWAY (WINDSOR) INC. - UPDATED**

---

Your Quick Gateway (Windsor) Inc. ("YQG") hereby requests your consideration for funding the seven-year drainage plan for the Windsor International Airport. The capital funding is requested to sustain airport operations in compliance with ongoing Federal, Provincial and Municipal regulatory and legal requirements.

**Airport Operations**

Section 6.3 of the Airport Management Agreement between the Corporation of the City of Windsor and YQG provides as follows:

YQG shall prepare a five-year Capital Improvement Plan for the Airport, which shall be reviewed by the Airport Coordinating Committee on an annual basis and recommended to Council for approval. Once the five-year plan has been approved by Council, items forming part of this plan shall be included in a Capital Budget within the five-year timeframe as decided by YQG and approved by the Airport Coordinating Committee.

The proposed capital improvements will benefit all airline passengers, general aviation aircraft as well as flight training facilities, the MRO and cargo aircraft. The capital improvements are required to help ensure that the airport meets safety-related regulatory requirements as prescribed by Transport Canada as well as the long-term growth of air service for domestic and international travelers.

YQG is requesting capital assistance for airport drainage works, from the Sewer Surcharge funds over the next 7 years. These funds will be used for maintenance and improvements to the open Municipal drains crossing Airport property, rehabilitation and replacement of sub-surface drainage lines under the Runways and taxiways and maintenance and replacement of the surface and sub-surface drainage system at the ATB and in the general aviation area.

YOUR QUICK GATEWAY

| Year          | 2019    | 2020    | 2021    | 2022    | 2023    | 2024    | 2025    |
|---------------|---------|---------|---------|---------|---------|---------|---------|
| Drainage work | 345,000 | 380,000 | 380,000 | 300,000 | 195,000 | 300,000 | 300,000 |

YQG is requesting to approval of \$10,070,000 for 2019 to 2025 capital projects listed below which will be funded from YQG reserves, with funds transferred from YQG to the City of Windsor by way of Dividends in advance of spending. Timing of the projects will be dependent on YQG cash flows, with each tranche of specific funding approved annually by City Council and the YQG Board of Directors.

YQG is specifically requesting approval for Capital spending of \$1,915,000 in 2019 from the following items:

| Project                                 | Estimated Cost | Project                                  | Estimated Cost |
|---|----------------|--|----------------|
| Design & Reconstruction of Hayes Road   | 1,500,000      | Rehabilitation of Apron I                | 1,400,000      |
| Replace 2 Tractors                      | 320,000        | Apron III & Delta Taxiway Rehabilitation | 1,800,000      |
| Approach lighting for runway 30         | 1,400,000      | Replace Fire Suppression Mains           | 250,000        |
| Tandem Axle Plow truck                  | 210,000        | Replace International Baggage Conveyor   | 250,000        |
| Replace Backhoe                         | 175,000        | New Sand Storage Building                | 140,000        |
| Widening of Taxiway India               | 250,000        | Runway Edge Lighting 07-25               | 750,000        |
| Replace Front End Loader                | 260,000        | New Runway Condition Reporting System    | 55,000         |
| Improvements to CSB                     | 280,000        | Replace Emergency Generator              | 250,000        |
| Taxiway Alpha Rehabilitation            | 280,000        | ATB Expansion, (preliminary design)      | 150,000        |
| Runway 07-25 rehab design & engineering | 200,000        | Replacement of 2 HVAC units              | 150,000        |

*Note: the projects identified above are quoted in 2018 dollars and no inflationary consideration has been given.*

Thank you for your consideration of the above and we look forward to hearing from you at your earliest convenience.

Sincerely,

YOUR QUICK GATEWAY (WINDSOR) INC.

Carolyn Brown

## Project Description

The corporate radio system is used by Windsor Police Services, Windsor Fire & Rescue Services, Transit Windsor and various operating departments within the Corporation of the City of Windsor. The system, an ASTRO P25 Digital Voice Radio Communications System from Motorola Solutions, was purchased in 2008 and implemented in 2009.

The digital radio system components can be classified into three categories, Infrastructure (servers, software, networking equipment and emergency dispatch computers), End User Devices (in-vehicle and portable radios), and Transmission Equipment (broadcasting).

The system Infrastructure has surpassed the typical useful life of similar Infrastructure for other corporate systems.

Due to the critical nature of the corporate radio system, the need to upgrade the Infrastructure in relatively short order, and considering that the End User Devices and Transmission Equipment still have several years of useful service life remaining, it is recommended that this upgrade is purchased as soon as possible from the current vendor, Motorola Solutions, in order to maintain operability of the entire system through to the expected end of life for the balance of the system. It is recommended that a Request For Proposal process (RFP) be conducted between 2021-2023 to align with the end of life of the End User Devices, to provide for a more comprehensive system replacement.

In addition to procuring an Infrastructure upgrade, a Motorola System Upgrade Agreement with Security Update Service will allow the City to keep the critical radio system Infrastructure current and reliable.

In order to ensure a sustainable funding model for the corporate radio system, a thorough analysis of cost and funding projections through 2033 was undertaken. It was determined that long term investment requirements to maintain a public safety grade radio system at an appropriate level is significant and the current funding model falls short. An operating budget increase of \$700,000 in 2017 is required. Administration will submit this operating budget issue during the 2017 operating budget process.

New corporate radio system sharing agreements with regional partners is a strategy that could reduce the net radio system costs for the City. Revenue from new sharing agreements would offset the funding requirements from the operating budget. The details and financial information related to any opportunities that appear likely will be brought forward to City Council for consideration and possible approval.

## Version Description

Recommendations as noted in the November 2, 2015 Corporate Radio System Infrastructure Upgrade Council Report (Report #18016), approved via CR209/2015:

THAT City Council AUTHORIZE a one-time initial transfer of \$6,000,000 from the current Pay-As-You-Go Leasing Reserve fund to establish the new corporate radio system Pay-as-You-Go fund, with all current and subsequent annual transfers and expenditures relating to radios to be directed to and funded from this new Pay-as-You-Go reserve fund.

THAT City Council AUTHORIZE a Sole Source procurement, in compliance with applicable City of Windsor policies and by-laws, for the following from Motorola Solutions, to be funded from the new corporate radio system Pay-as-You-Go fund as described in item "I" above.

- Infrastructure upgrade, for a cost of \$1,589,205, plus net taxes
- II. A four-year System Upgrade Agreement with Security Update Service for an annual cost of \$254,777, plus net taxes

THAT City Council AUTHORIZE the Chief Administrative Officer and the City Clerk to sign the required agreements for the infrastructure upgrade and a four-year System Upgrade Agreement with Security Update Service with Motorola Solutions, subject to satisfactory review as to form by the City Solicitor, as to technical content by the Chief Information Officer /Executive Director of Information Technology and as to financial content by the Chief Financial Officer/City Treasurer.

III. THAT City Council AUTHORIZE the Chief Administrative Officer and the City Clerk to sign a new four-year Motorola Communications System Support Agreement, subject to satisfactory review as to form by the City Solicitor, as to technical content by the Chief Information Officer /Executive Director of Information Technology and as to financial content by the Chief Financial Officer/City Treasurer This agreement will replace the existing Motorola Communications System Support Agreement, in order to realize a \$38,000 per year savings.

IV. THAT City Council RECEIVE for information, and provide the approvals within this report with the understanding that these recommendations will result in a recommendation for a 2017 operating budget increase of a maximum of \$700,000 as an increased contribution by various departments, into the Corporate Radio system reserve; possibly lower if offset by community partnerships. Administration will bring the required operating budget issue forward during the 2017 operating budget process along with any possible mitigating measures.

V. THAT City Council RECEIVE for information, the Corporate Radio System Steering Committee will begin the process of investigating a geo-redundant option for the corporate radio system, and will report its findings, including the upfront and ongoing costs, and related funding requirements to City Council for consideration.

## Phased-In Increase Related to the Corporate Radio System

Reflects a phased-in increase resulting from the 2015 Council-approved upgrade to the Corporate Radio System. While the annual increased transfer to the reserve was projected to be significantly higher, Administration is proposing a phased-in increase over 3 years to mitigate the impact to the levy. This issue reflects the increase of year 3 of 3.

**Recommendation:** Recommended by Department

**One-Time Funding:** n/a

### Issue Detail

The Corporation of the City of Windsor (the City) owns a public safety grade radio system, which is operated as a shared service for Windsor Fire & Rescue Services, Windsor Police Service, Transit Windsor, YQG and various operating departments within the City. The system, an ASTRO P25 Digital Voice Radio Communications System from Motorola Solutions, was originally purchased in 2008 and implemented in 2009. The Council approved capital budget for that implementation was \$11,476,000.

The digital radio system components can be classified into three categories:

1. Infrastructure (servers, software, networking equipment and emergency dispatch computers)
2. End User Devices (in-vehicle and portable radios)
3. Transmission Equipment (broadcasting)

The equipment in the End User Devices category is expected to remain useful for an estimated twelve to fifteen years after the 2009 implementation. The Transmission Equipment may remain functional for approximately twenty years after the 2009 implementation.

Of the three system categories, Infrastructure has the shortest expected useful life. Infrastructure is the information technology (IT) portion of the system. This is the control equipment, servers, dispatch stations, networking equipment and software. Servers and computers in the City are typically replaced after approximately five years.

In April 2015, Motorola approached Windsor Fire & Rescue Services and Windsor Police Services with a proposal to upgrade the radio system's Infrastructure (servers, control equipment, software, networking equipment, emergency dispatch computers and some microwave equipment). Aside from the annual support payments, the City had not made radio system investments since it was originally purchased. Motorola advised that the City's Infrastructure, since it has not been upgraded 6+ years, was becoming a significant risk. At that time Motorola also proposed a service model that would keep the City's Infrastructure up to date, in order maintain an acceptable standard of reliability and security. The service model is called a System Upgrade Agreement with Security Update Service (SUAI). Under this agreement, Motorola would patch and upgrade system software and replace Infrastructure hardware. The City is still responsible to replace the End User Devices and Transmission Equipment when those components reach end-of-life.

In addition to an Infrastructure upgrade, Windsor Police Services identified a need to invest in some level of system geo-redundancy in order to mitigate risks to public safety related to outages at the radio system's main control location (the Master-Prime site). The radio system has four physical locations across the City, which includes the Master-Prime site. These locations are not the emergency dispatch centres; they are remote un-staffed locations that house the system

infrastructure and transmission equipment. The Master-Prime site is the system's data centre, which houses the majority of the system's IT equipment.

In recognition of the mission critical nature of the corporate radio system, the breadth of its use, the significant size of this corporate asset, the system complexity, and the need to ensure system sustainability, a corporate radio system governance model was developed in July 2015. A Steering Committee and Working Group were established to provide a formal structure for operational and strategic decision making as it relates to the corporate radio system. These groups, after significant research, recommended to proceed with a radio system infrastructure upgrade, including the addition of system geo-redundancy.

The Steering Committee also recommended the creation of a separate pay-as-you-go reserve fund specific to the corporate radio system because separating the radio contributions, expenditures and remaining balances from other PAYG assets would greatly assist in the governance and strategic planning of the corporate radio system.

In establishing these recommendations, the Working Group and the Financial Accounting division developed detailed long-term radio system expenditure projections through the year 2033 to ensure the Steering Committee and City Council had an accurate understanding of the funding required to sustain the corporate radio system.

In 2015, an upgrade to the corporate radio system was approved by City Council through two Council Resolutions, CR209/2015 (November 2, 2015 - radio system upgrade) and B19/2015 (December 21, 2015 - addition of geo-redundancy to the radio system). CR209/2015 also approved the establishment of a new corporate radio system pay-as-you-go fund.

CR209/2015 included the following:

THAT City Council RECEIVE for information, and provide the approvals within this report with the understanding that these recommendations will result in a recommendation for a 2017 operating budget increase of a maximum of \$700,000 as an increased contribution by various departments, into the Corporate Radio system reserve; possibly lower if offset by community partnerships. Administration will bring the required operating budget issue forward during the 2017 operating budget process along with any possible mitigating measures.

B19/2015 included the following:

THAT City Council RECEIVE for information, and provide the approvals within this report with the understanding that these recommendations will result in a recommendation for a 2017 operating budget increase of a maximum of \$400,000 as an increased contribution by various departments, into the Corporate Radio system reserve; possibly lower if offset by community partnerships. Administration will bring the required operating budget issue forward during the 2017 operating budget process along with any possible mitigating measures.

The \$1.1 million identified in the above Council Resolutions is the additional amount of annual contributions required to the corporate radio reserve fund in order to sustain the corporate radio system in the long-term. This amount is based on the detailed radio system expenditure projections through the year 2033.

The required sustainable additional annual contribution has been reduced to \$825,000 due to revenues from an anticipated system sharing agreement with the Canada Border Services Agency as well as refined future cost projections. The additional \$825,000 can be phased in by increasing the annual budget by \$275,000 in each of 2017, 2018 and 2019.

Per the above schedule, during the 2017 and 2018 budgeting process, City Council approved a 2017 operating budget increase of \$275,000, and a 2018 operating budget increase of \$275,000.

The 2019 operating budget increase is therefore \$275,000.

| <b>Project Description</b>   |                      |                                    |                     | <b>Version Description</b>   |  |                |             |             |                |             |             |                  |                   |  |
| Based on an approved business case, this project is part of a modernized combined facility featuring an expanded Collision Reporting Centre (CRC), operational and administrative spaces for the WPS Traffic Enforcement Branch, secure storage space for archival data/information, back up 911 call taking and dispatch functions, secure specialty police vehicle storage, and a police electronic back up data facility. The project location is an existing property located at 2696 Jefferson Boulevard. At this point in time, the project is in the early stages of construction, with an anticipated completion date of late Spring 2019. |                      |                                    |                     | Total estimated project cost is anticipated to be approximately \$3,644,000. In addition to funds currently existing in the project's capital account, additional funds shall be generated through the sale of the property at 5245 County Road 42 (a Council report confirms this), plus funds reallocated from a number of other approved Windsor Police capital projects. |  |                |             |             |                |             |             |                  |                   |  |

| <p>On June 1, 2017, the Canadian Radio-television and Telecommunications Commission (CRTC) directed all telephone and mobile wireless companies to update their networks to be ready to provide Next-Generation 9-1-1 (NG9-1-1) services.</p> <p>"NG9-1-1 services will provide Canadians with access to new and innovative emergency services and capabilities. These services are enabled by the prevalence of mobile devices and the evolution of telecommunications networks. The CRTC wants to ensure that Canada's 9-1-1 system takes advantage of these technological advancements to improve public safety." (CRTC News Release)</p> <p>The evolution of the current 911 system to Next Generation 911 will change the landscape of 911 as it is known today. What once was a 911 voice call only will become a 911 session where information such as text messages, video, pictures, file transfers and telematics may be sent directly to 911 from a variety of devices. The NG911 Public Safety Answering Point will require technological upgrades or replacements to all equipment, hardware, and software currently in place for both the main site and back-up site.</p> |                      |                                    |                  | <p>In addition to calling 9-1-1 from a phone, the system enables the public to transmit text, images, video and data to the 9-1-1 centre (referred to as a Public Safety Answering Point, or PSAP). The initiative also envisions additional types of emergency communications and data transfer. This NG9-1-1 infrastructure is intended to replace the current services over time. Requested budgets by year are placeholders so that funds can accumulate to cover the associated costs with upgrading to NG911 as those costs are not known at this time.</p> |  |                    |                |                |                             |                |                |                |                  |                   |

| The Emergency 911 Centre backup facility will require a technological upgrade to the Public Branch Exchange System, computers, monitors and software. This upgrade will ensure that the backup facility is compliant with Next Generation 911 and new internet protocol features. |                      |                                  |                  |                                  |  |                                   |             |                             |             |             |             |             |              |                  |                   |

**Project Description**

Technology is transforming the way policing is conducted worldwide. The modernization of policing services, through investments in tech, is proving to be a force-multiplier, on three fronts: 1) Improved Effectiveness – enhancing the analysis and presentation of the large volumes police service data significantly improves strategic planning, operational planning and front-line policing by providing information that links and predicts criminal activities and information; 2) Improved Accountability and Management – the improved understanding and measurement of the effectiveness of policing strategies, tactical decisions and individual performance provides objective evidence to make adjustments and continuous improvement decisions; 3) Improved Efficiencies – modern policing technologies are reducing non-value-adding activities and increasing the time spent on core policing duties. In addition to the force multiplier effect of technology investments, the complexity of criminal activity is increasing exponentially and requires a sophisticated police service with modern capabilities to effectively protect the public. A consistent and predictive capital budgeting model for technology is essential for strategic planning for policing services. WPS must maintain and upgrade existing technologies, and implement of new transformative technologies in order to realize the benefits noted above and to keep pace with trends in policing.

| Effective communications is the most critical aspect of public safety. This consists of communications with the public, communications with patrol officers and WPS staff, and communications with other emergency services. Policing communications is about to enter a significant and sustained period of transformation, which includes a legislated move to Next Generation 911 (NG911), the implementation of the North American public safety broadband spectrum, police mobility initiatives and the replacement of antiquated telephone systems. |                      |                                    |                  |                                  |             |             |             |             |                             |             |             |              |              |  |

| <b>Project Description</b>  |                      |                                    |                  | <b>Version Description</b>       |  |             |             |             |                             |             |             |             |              |              |
| <p>In order to adequately support the ever changing and increasingly complex operational policing environment we must deliver services within, police facilities play an integral role in facilitating operational service delivery that is mandated to serve our community. The quality and modernization of our facilities is critical to optimize how effective we are. The various projects that collectively comprise the "Facility Projects" component of the overall WPS Capital budget are dispersed among those impacting our Headquarters, Tilston Training Centre, Jefferson Operational Support, and Sandwich Community Station facilities. Ongoing capital improvements at these facilities are carefully thought out to derive the best possible physical outcome that will equip the organization to function optimally well into the future. In concert with this approach, all capital works projects associated with our facilities will address energy conservation, use-of-space efficiencies, user needs, health and safety requirements, and flexibility for simple and cost effective future modifications (as needs dictate) to achieve the best possible outcomes.</p> |                      |                                    |                  |                                  |  |             |             |             |                             |             |             |             |              |              |

| This project will replace all of the communications switches contained in the 6 communications closets located at Windsor Police headquarters and in the 5 remote Windsor Police Service locations. The equipment provides and manages connectivity to the Windsor Police Service network for all Windsor Police computers and network devices. |                      |                                    | The warranty on the equipment is approximately 5 years and will need replacement at the expiry of the warranty and to meet any new updated technology advancements and connectivity requirements. |                                     |             |             |             |                             |             |             |             |                  |                   |

| <p>The Windsor Police Service Operations Centre (WPSOC) is designed to serve as the Command and Control Centre for all "real-time" policing activities in the City of Windsor. Positional authority for the Windsor Police Service Operations Centre (WPSOC) will rest with the Staff Sergeant of Patrol who will oversee day-to-day operations for the Windsor Police Service. The Staff Sergeant of Patrol, assisted by an embedded Executive Officer, Media Officer and the E911 Communications Centre, will collate information provided by various sources and provide a common operating picture that it disseminates to the field and command in order to enhance situational awareness, increase the agency's ability to respond both strategically and tactically to virtually any incident and proactively allocate resources to community issues. It will serve as a one-stop information portal for internal and external policing partners, a command-and-control structure during major incidents and an always available supervisory resource to frontline police officers.</p> |                      |                                  |                  |                                     |                                   |             |             |             |                             |             |             |                  |                   |  |

### Project Description

Windsor Police Service has been collecting vast amounts of data within its Versadex RMS-CAD since 2001. However, there is no software within that system to provide Business Intelligence (BI) to improve operational efficiency and measure effectiveness without human intervention to conceive, perceive or identify an issue, structure a browse/query to obtain data to address the issue, conduct the query, organize the data, analyze the data and provide meaningful solutions in a timely manner to all of the necessary people. Business Intelligence (BI) technologies provide historical, current, and predictive views of business operations through automated functions such as reporting, dashboarding, online analytical processing, analytics, data mining, process mining, complex event processing, business performance management, benchmarking of key performance indicators (internal & external), text mining and combined field and free text search, predictive analytics, and prescriptive analytics. As Business Intelligence (BI) systems are decision support systems, acquisition of a Business Intelligence (BI) software system will finally provide the Windsor Police Service with the tools to provide the necessary data to the right people in a timely and meaningful way for effective data driven decision making, eliminating manual and inefficient processes, streamline operations, and provide data-driven intelligence to patrol officers, using data to predict criminal activity to efficiently focus resources, and provide real time information to police in a smarter, cost efficient and safer manner.

Currently, Windsor Police Service is implementing PHASE 1 of a "Business Intelligence" (BI) data driven policing model. All police data collected and processed is being organized in an efficient manner using hardware, software and services to allow for easy searches and retrieval. Manual data processes are being reviewed and inefficient processes are either being eliminated or replaced with a streamlined electronic process.

PHASE 2 will be the next step. Advanced predictive analysis will be implemented to provide an in depth data-driven intelligence to patrol officers using data previously collected to predict criminal activity. This will efficiently focus resources.

### Project Comments/Reference

7132002  
Police project reference numbers 2013-3 and 2013-6

### Version Description

Phase 1 of the project was approved as part of the 2013 enhanced plan (B26-2013). Project was delayed due to staffing changes. Work is still ongoing.

Phase 2 of the project is targeted for 2021.

| This project entails the maintenance and/or replacement of equipment to help ensure that the Windsor Police Service remains able to safely respond to high-risk tactical, crisis negotiation or related critical situations in which the lives of officers and community members are put in immediate jeopardy (legislated requirement). Existing equipment to be maintained and/or replaced as part of this project includes the Direct-Link Crisis Response Throw Phone System, Wireless Remote Area Perimeter Sharing (WRAPS) System, Wireless First Responder Loud Hailer, the Structural Tactical Acoustic Receiver and Sender (STARS) System as well as the various other tools utilized by incident command personnel and operators. |                      |                                  |                  |  |                               |             |             |                             |             |             |             |                  |                   |  |   |   |        |   |   |   |   |   |   |   |   |   |        |       |   |   |        |   |   |   |   |   |   |   |   |   |        |

| <b>Project Description</b>  |                      |                                    |                  | <b>Version Description</b>   |                                   |             |             |             |                             |             |             |                  |                   |              |
| A new design/build of an IT infrastructure disaster recovery site at the WPS Operational Support Facility will provide basic geo-diversity for server hardware only. Additional funding is required to implement industry standard best practice architectures to ensure adequate data security and resiliency. Funds are required for the engagement of technical network and security consulting services as well as additional hardware and software for the DR site implementation. |                      |                                    |                  | Cost breakdown estimate includes: Veeam Software (\$22,000), Server with proper # of drives (\$50,000). Not included is the cost of the upgrade fibre line to the Disaster Recovery (DR) site and other unpredictable costs (\$28,000) and the Disaster Recovery (DR) site to house the RMS/CAD/exchange /etc. |                                   |             |             |             |                             |             |             |                  |                   |              |

| The procedures regarding Property and Evidence Control are outlined in Directives on file with WPS. In keeping with best practices and as the result of a recent review of Cold Case files, as review of current practices as it pertains to these procedures was undertaken. Contained in the results of this review, are the areas which have been identified as requiring modernization to take advantage of the advances in technology, some of which is already present and available to WPS through the current Versadex System. |                      |                                  |                  |                                  |             |             |             |             |                             |             |             |              |              |  |

| The objective of this project is to leverage the Windsor Police Service' investment in mobile technology (smartphones/tablets). This project will see the deployment applications on those devices that will assist all frontline personnel with the streamlined, at-source, capture of searchable digital multimedia reports, notes and scene imagery via secure wireless handheld technology. This project will ensure a variety of effective text capture methods are available to officers - including voice to text dictation - to reduce overall reporting time and duplication of efforts required with traditional reporting and note-taking methods. Significant time savings and quality improvements are anticipated at occurrence scenes, as well as downstream during electronic Crown brief production and subsequent trial environments. |                      |                                  |                  |                                  |  |                                   |             |             |                             |             |             |                  |              |                   |

### Project Description

The Windsor Police Service (WPS) has a complex and continuously growing information technology infrastructure that is the foundation for the delivery of services to the residents, businesses and visitors of the City of Windsor. The technology that is being deployed in policing is unprecedented (e.g. officer mobility, video evidence, Next Generation 911, self-service reporting, regionalization, cyber-crimes). The use of technology in policing will be transformational in the coming years. With the inclusion of WPS's mobility footprint, there are well over a hundred networked locations in the organization.

The continuous growth in the size and complexity of the WPS network, will continue to increase WPS's security risk exposure. Additionally, year-over-year there is an unprecedented level of world-wide cyber-attacks against individuals, businesses and government organizations. These threats will continue to grow at an exponential rate. Further complicating this threat proliferation is the broad range of motivating factors, which requires attention and diligence across an exceptionally large number of possible vulnerabilities. While protecting information technology infrastructure is critically important for all organizations, it is a public safety matter for police agencies. Additionally, police data includes the highest level of private and sensitive data. While the WPS does exercise due diligence in securing the network and sensitive information, as the risks continue to rapidly increase, and as the security technology available continues to improve and become more robust, significant investments will be required in modern and automated tools to protect, detect and mitigate cyber attacks.

| <p>The Windsor Police Service (WPS) has a complex and continuously growing information technology infrastructure that is the foundation for the delivery of services to the residents, businesses and visitors of the City of Windsor. The technology that is being deployed in policing is unprecedented (e.g. officer mobility, video evidence, Next Generation 911, self-service reporting, regionalization, cyber-crimes). The use of technology in policing will be transformational in the coming years. With the inclusion of WPS's mobility footprint, there are well over a hundred networked locations in the organization.</p> <p>WPS has significant investments in infrastructure hardware and software. This capital project is for the modernization of the technology infrastructure, which will inevitably be required to keep pace with increased demand and new technological capabilities. Without long-term financial planning for continued technological advancements, WPS will not be in a position to continue to meet general policing adequacy standards.</p> |                      |                                  |                           |                                     |  |             |             |             |             |             |             |                  |                   |  |

| As of February 2018 the majority of the 277 smartphones the WPS has deployed to personnel will have been in service for 2 years, and are therefore eligible for subsidized replacement under the Connecting Windsor-Essex (CWE) agreement with the cellular network carrier (Telus). The remainder will be eligible in the second half of 2018 and early 2019. These devices include approximately 65 smartphones which are signed out by mobile Patrol officers at the start of each daily 12 Hour Shift. IT personnel have already received numerous reports of degraded battery life and device performance as these smartphones have aged, and it is anticipated all devices will require replacement once eligible in Feb. 2018. Funds will be used to purchase new smartphones (current hardware available) at a discounted rate by renewing individual phone contracts; all necessary accessories (protective cases, licenses etc.) will be purchased as required. Based on the useful life of mobile devices at the WPS, we expect the replacement cycle to be two years. |                      |                                  |                  |                                  |             |             |             |             |                             |             |             |              |              |  |

| Reconfiguration of the Stores warehouse with a view to maximizing storage capabilities within the limited confines of the warehouse. The amount of required equipment and clothing issued to frontline officers continues to increase, and the current storage solution (shelves and bins) is inadequate to house these items maintained as inventory. The goal would be to maximize the storage space available through enhanced storage system solutions proposed by an expert in that field in two phases. |                      |                                  |                  |                                  |             |             |             |             |                             |             |             |              |              |  |

| A completely new keying system to replace the current one that has become outdated due to numerous changes over the years which has reduced security and functionality. The new system will be based on a key control management protocol that tracks all users and applicable hardware. |                      |                                  |                  |                                  |  |                    |             |                             |             |             |             |             |              |                  |                   |

| <b>Project Description</b>        |                   | Report C 42/2017 was approved by CR187/2017 for Windsor to put a bid in for the Can-Am Police Fire Games to be hosted in Windsor in 2022. The hosting fee of \$25,000 US was required in 2017 and came out of project 7121026 - Events/Bids/Sports Tourism.   |                     | <b>Version Description</b>     |               | On Dec. 11/17, the City of Windsor was selected to host the 2022 Can-Am Police Fire Games. As such, a budget of \$550,000 is required to fund the project. While a significant portion of the budget will not be needed until 2022, resources as well as other expenditures which will be incurred by the Executive Committee pursuant to the terms of the Host Agreement, a request for funding in each of the years is as follows:<br>2019 - \$50,000<br>2020 - \$75,000<br>2021 - \$100,000<br>2022 - \$325,000 |      |               |           |      |   |   |   |      |   |   |   |      |   |   |   |      |         |         |   |      |   |   |   |      |   |   |   |      |   |   |   |       |   |   |   |  |                |                |          |                                  |  |  |  |  |  |  |  |            |      |      |      |      |      |      |      |       |       |                 |  |  |  |  |  |  |  |  |  |                          |   |   |   |         |   |   |   |   |         |       |   |   |   |         |   |   |   |   |         |                 |  |  |  |  |  |  |  |  |  |                                  |   |   |   |         |   |   |   |   |         |       |   |   |   |         |   |   |   |   |         |

| <p>Windsor and Essex County Social Housing units represent over 7,900 housing units in the region with an estimated value of \$500 million and yearly operating budgets of \$70 million. These units are a vital and valuable resource to the community. Many of the projects have been a part of this community for many years and are aging and require significant renewal. The Social Housing Reserve Fund was established in 2001 using the one-time transfer of \$2.4 million from MMAH. This fund was established "to cover the risks associated with future increases" in the social housing program. The current available balance of this fund after Council approved commitments is \$1.4M as at June 30, 2018. Prudent business practice would indicate that the service manager has a duty to ensure that funds are available to deal with both expected and unexpected events that arise within the social housing portfolio. In 2010 a total of \$294,000 (\$200,000 City) was transferred to the Social Housing Reserve fund. All requests for years after 2011 have not been recommended for approval and deferred to future years. The County of Essex would share approx. 36.4% of capital expenditures incurred based on the current arbitrated weighted assessment formula.</p> <p>The Social Housing Reserve fund was established to assist Housing Providers with the cost of capital repairs in the housing stock, to offset with the impact of underfunded capital reserves, the impact of potential increases in interest rates, the impact of maturing mortgages and the impact of the legislated funding model. In the event that housing providers require emergency repairs and the provider has insufficient funds for the work, the fund can be accessed. This fund will also be accessed to deal with periodic building reviews, capital reserve fund studies and other capital planning activities and other housing related initiatives. Other municipalities of similar size (Region of Waterloo and the City of London) adopted a similar strategy and currently have invested funds for this purpose. It has previously been noted that there is a need to prepare for regeneration and rationalization of stock. The Windsor Essex 10-Year Housing and Homelessness Plan completed in April 2014 indicates a "mismatch in the housing stock related to mandate and unit size, with a higher demand for units appropriate for single individuals and large families". Demand for one bedroom units as well as larger units exceeds the current supply. There is a need to review this anomaly in an effort to 'rationalize the stock' and attempt to more closely match current and future demand. Other pressures that will require the use of the Social Housing Reserve fund would include the need for energy efficiency upgrades to save on energy costs, necessary health and safety and building envelope upgrades throughout the portfolio and the need to comply with the upcoming AODA built environment requirements.</p> <p>The City of Windsor is the sole shareholder of Windsor Essex Community Housing Corporation (CHC) which owns and operates 4,708 social housing units in Windsor and Essex County (60% of the service area stock). In late 2015, CHC undertook a regeneration and rationalization study for their stock of 4708 units. This report has now been completed and a report to Council (In-camera) was tabled on June 18, 2018 to outline the findings of the consultant.</p> <p>See Project #HCS-001-14 Windsor Essex Community Housing Corporation for WECHC capital request.</p> | <p>Housing Services requested a total allocation of approximately \$3.18M Net City in each of 2024 and 2025. During the Finance Review stage this request was not accepted.</p> <p>Housing Services was approved in principle for approximately \$1.27M Net City in 2019 and for approximately \$3.18M Net City in each of 2022 and 2023. During the administrative review stage the amount approved in principal was changed to approximately 1M Net City in 2019 and to approximately \$1.25M Net City in each of 2022 and 2023. County cost sharing will be incurred at the time of expenditure based on the current arbitrated weighted assessment formula.</p> <p>Based on industry and MMAH originally established capital fund allowances, the current reserve fund balance is inadequate. It is expected that the future net capital requirements of the Windsor Essex social housing providers (including CHC) will be in excess of the capital funds currently held by providers. As such, the providers will (and have been) approaching the City for assistance. At present it is estimated that total capital reserve fund balances held by Windsor Essex providers are approximately \$14M. It should be noted that of the 39 housing providers, 15% to 20% have little or no capital reserve balances and a large number would not have enough funding should a major capital repair be required. Windsor Essex Community Housing (CHC) has estimated that within their portfolio (approx. 60% of the stock) a large capital deficit exists. CHC currently indicates that, based on the results of Facility Condition Assessments (FCA) currently being undertaken at CHC properties, based on the current level of funding for capital purposes from the City of Windsor, the unfunded capital liability by 2027 will be \$112 million. In addition, WECHC indicates that over 70% of their units are now over 30 years or older. A study undertaken in 2005 on behalf of the Service Manager Housing Network identified overall projected capital reserve shortfalls in all non-profit projects province-wide. It was estimated that an additional \$600 - \$700 per unit/year should be deposited in provider Capital reserve funds (City of Windsor - \$2.1M/year from 2005) in order that capital needs of these providers be met in the future. At present, Housing Services has received a number of requests for funding for projects such as roofing, parking lot repairs/replacements, elevators, major building envelope repairs and accessibility needs.</p> <p>In March 2015, Housing Services received approval by City Council to withdraw up to \$600,000 from the Social Housing Reserve Fund to deal with similar projects to those outlined above. That request also included funding to CHC to secure consulting services to complete a study on the regeneration and rationalization of the Public Housing stock. This report has now been completed and a report to Council (In-camera) was tabled on June 18, 2018 to outline the findings of the consultant. Funding of \$ 400,000 from WECHC's existing Operating Budget was approved to undertake the next phase of the Regeneration Plan. This work is on-going and a further report to Council will be submitted as required.</p> <p>The report confirms WECHC's previous concerns of the projected capital funding shortfall and indicates that should the current level of capital funding to WECHC properties continue "there will be an unfunded capital requirement of \$143 million by 2030".</p> <p>In 2016, new funding programs were announced through the Ministry of Housing (MHO) as follows:<br/> - Social Housing Apartment Retrofit Program (SHARP) - \$ 3.134 million – As part of the Province's Green Investment Fund (GIF) this funding will support retrofits in social housing high-rise apartment building of 150 units or more.<br/> - Social Housing Infrastructure Program (SHIP) - \$6.7 million - This funding is to assist in the repair and retrofit of existing social housing stock to address capital needs, improve energy efficiency and reduce greenhouse gas emissions. Provider requests for this funding in 2016 from all Social Housing providers in Windsor/Essex (including WECHC) exceeded \$ 21.1 million.</p> <p>This funding has assisted with the most urgent repairs/retrofits in Windsor/Essex. The needs, as evidenced by the above noted CHC – Regeneration Report findings and the provider requests for SHIP funding, noted above, are in excess of this senior government funding. Without an ongoing source of funding for capital projects to repair and maintain aging Windsor/Essex social housing infrastructure, providers will have an increasing difficulty in maintaining this much needed community resource.</p> <p>The recently announced National Housing Strategy (NHS) is a 10-year, \$40 billion plan that sets targets to ensure investments and new programming for Housing programs Canada-wide. The NHS documents indicate the goal of the creation of 100,000 new housing units and the repair or renewal of 300,000 existing housing units. Few details are available about the NHS initiatives at this time.</p> |

| Project Description  |
|--|
| <p>As per the 2014 Enhanced Capital Plan, Council approved in principle funds from the 2018 Debt Reduction Levy (DRL) for allocation towards the Windsor Essex Community Housing Corporation (WECHC).</p> <p>In the previous year, WECHC submitted a 2018 Capital request of \$3 million (City Costs) representing capital projects that have been identified in 2018 as “urgent” and “high priority”. The request was approved in principle for the 2021 and 2022 Capital Budget. The County of Essex would share approx. 33.75% of capital expenditures incurred based on the current arbitrated weighted assessment formula.</p> <p>WECHC requested a capital allocation of \$ 11 million in 2024 and \$ 11 million in 2025. In the Finance review stage this request was not accepted.</p> |

| Version Description  |
|--|
| <p>In 2014, Windsor Essex Community Housing Corporation (WECHC) was approved \$1.5 million (City costs) from the 2018 Debt Reduction Levy (DRL) as part of the 2014 Enhanced Capital. On April 23, 2018 a report (CR234/2018) was submitted to Council for approval of the use of this funding.</p> <p>In the 2018 budget process, WECHC submitted a Capital request for \$4.5 Million Gross (\$3.0 Million City). At the Administrative Review a total of approximately \$4.5 million gross (\$2.99 million – City) was approved in principle for years 2021 and 2022. County cost sharing will be incurred at the time of expenditure based on the current arbitrated weighted assessment formula.</p> <p>As part of the City of Windsor's Operating Budget, Windsor Essex Community Housing Corporation (CHC) currently receives approximately \$3.1 million annually for capital projects and infrastructure upgrades for the Public Housing and Family Non-Profit Housing Portfolios. CHC's Public Housing portfolio is aging and requests to the City over the last number of years for additional funding for capital purposes have not been approved. In late 2015, CHC engaged a professional engineering firm to undertake a comprehensive assessment of its building conditions through a third party Facility Condition Assessments (FCA). In mid-2017, CHC received a consolidated report summarizing the condition of all assets and an analysis of the unfunded capital liability for capital repairs and maintenance that have been deferred. This report outlined there will be an “unfunded capital requirement will reach \$112 million over the next 10 years with an annual funding requirement of \$11,209,000, assuming the current level of capital funding from the City (and County) to WECHC. The annual funding requirement of \$8.9 million can be attributed to the Public Housing unit portfolio.</p> <p>Windsor Essex Community Housing Corporation (WECHC) indicates that “due to the poor condition of certain assets, CHC has strategically deferred capital maintenance in these developments. One single family home has been demolished and within the next 24 months other could follow. These and other developments require regeneration which provides potential opportunities for revenue generating initiatives.”</p> <p>In March 2015, Housing Services received approval by City Council to withdraw up to \$600,000 from the Social Housing Reserve Fund to provide much needed capital funding to social housing providers in Windsor/Essex. That request also included funding to Windsor Essex Community Housing Corporation (WECHC) to secure consulting services to complete a study on the regeneration and rationalization of the Public Housing stock. This report has now been completed and a report to Council (In-camera) was tabled on June 18, 2018 to outline the findings of the consultant. Funding of \$ 400,000 from WECHC's existing Operating Budget was approved to undertake the next phase of the Regeneration Plan. This work is on-going and a further report to Council will be submitted as required.</p> <p>WECHC requested the approval of a capital allocation of \$ 11 million in 2024 and \$ 11 million in 2025. In the Finance review stage this request was not accepted. This request represented Capital projects identified as a result of the above noted report and the expected identified capital needs for the 2024 and 2025 fiscal years. Projected capital needs include building roof replacements, window and door replacements, kitchen and bathroom renewals, elevator upgrades and capital related expenses throughout the portfolio of 4700 units.</p> |

## Project Description

On July 23, 2018, City Council received a report from Administration (CR433/2018) with respect to Windsor Essex Community Housing Corporation's (CHC) request to build a 145-unit, mixed income, multi-residential building in East Windsor through a community hub model in collaboration with Hiatus House and Community Living Windsor. The estimated cost of the project is \$38.5 million. The proposed location for this build is 3100 Meadowbrook. In 2017, the property was conveyed from the City to CHC (estimated value - \$525,000) in order to facilitate the construction of new affordable housing.

In November of 2017, the federal government announced the details of its ten-year National Housing Strategy. As part of the strategy, the federal government announced in May 2018 the National Housing Co-Investment Fund (NHCF). Through the NHCF, the Government of Canada plans to work with partners to assist in various housing related projects focusing on reducing homelessness, creating new affordable housing units and repairs to existing housing units over the next decade. Project funding is available through the Canada Mortgage and Housing Corporation (CMHC) under two streams; a grant which can cover up to 40% of project costs and a loan portion offering favorable terms. CHC has applied to CMHC for \$ 15.5 million in loan assistance and \$6.5 million in grant (top-up) funding through this program. CHC is currently advanced to the second stage of the funding approval process.

In addition to available CMHC funding, the Province released another round of its Investment in Affordable Housing (IAH) funding (2018- 2019 year). The City's allocation (for all submissions across the City and County) is \$4 million and is administered through the Housing and Children's Services Department (H&CS) acting as CMSM. A Request for Proposals was issued and was closed on July 23, 2018. CHC has submitted this proposal for the Committee's consideration. A final decision on the awarding of the RFP has not been announced. Any amount of IAH funding awarded to CHC (maximum \$4 million) will be structured as a forgivable loan. There will be no required repayments relative to this "debt" during the 20-year period and the loan amount would be forgiven at that time provided the development has remained affordable for the full duration of the 20 years. If CHC receives IAH funding, it is required by the Province that construction of the building be completed within 24 months (December 2020).

Notwithstanding the potential to secure a portion of the project funding under both the Federal (CMHC) and Provincial (IAH) allotments, there remains an equity contribution of \$ 12 million that would still be required from the City. Without the CMHC and IAH funding and the City's equity contribution, this project will not be feasible.

Council approved the report as submitted.

## Version Description

CHC currently operates 4,708 units of Social Housing in Windsor and Essex County funded by the City as Service Manager. CHC has extensive experience managing affordable housing in Windsor and Essex, including an understanding and the required capacity to manage high need tenancies. A commitment to provide tenants with healthy, safe and sustainable communities has been demonstrated. CHC has demonstrated accountability in regards to policy and operational decisions and efficiency in managing the housing portfolio.

Council was provided with a range of costs and equity contributions that would be required by the City of Windsor (from 30 units to 150 units). Administration recommended the approval of the maximum funding requirements based on the figures provided in a 150-unit option. It was understood that the number of units could be reduced, without a corresponding reduction in the total funding requirements, if CHC deems it appropriate to provide a number of larger family units which will cost more, but for which there is a significant need in the community.

Total Project costs are estimated to be \$ 38.547 million. Council approved an estimated City contribution to the project of \$12 - \$16 million plus applicable interim financing costs. The development will consist of one hundred and forty five (145) unit apartment building (bachelor to 4 bed units) targeted for singles, small families and seniors. Forty-five (45) of these units will be modified to be barrier free and to meet accessibility requirements for persons with disabilities.

For this project, CHC will be partnering with Hiatus House and Community Living Windsor to provide supportive housing services and allocating units for their clients under an operating agreement and/or a memorandum of understanding. Proposed sources of funding for the project are as follows:

|                                    |                     |
|------------------------------------|---------------------|
| CMHC – Co-Investment Fund – Loan - | \$15,510,000        |
| CMHC – Co-Investment Fund – Grant  | 6,500,000           |
| IAH Program Funding                | 4,012,000           |
| Land Value – Donated               | 525,000             |
| City of Windsor Contribution       | 12,000,000          |

| <b>Project Description</b>  |                      |                                    |                  | <b>Version Description</b>  |  |                            |                |                |                             |                |                |                |                  |                   |
| To provide a capital program for the replacement of ceiling lifts, from a risk management prospective, to address the safety and security of residents and ensure all nursing equipment meets the manufacturer requirements as outlined in the Long Term Care Homes Act (2007). |                      |                                    |                  | This project is for the replacement of the 199 ceiling lifts within Huron Lodge. This is a phased-in project to accommodate one resident home area per year at approximately \$100,000 for 32 lifts. The \$100,000 cost does not include the ceiling track but only the motor, battery, slings and labour. The \$100,000 cost is for ceiling lifts in the resident rooms. The ceiling tracks may be required to be replaced in future years. When required, analysis of the ceiling, building structure and track will be completed in conjunction with the facilities department and at that time and any additional funds required may be funded from this replacement program if available.<br><br>The ceiling lifts located in the tub rooms will be replaced when the showers and tubs are replaced as part of HLD-001-12 (HL nursing equipment replacement program). Depending on the new tub, the lift associated with the tub may vary. |  |                            |                |                |                             |                |                |                |                  |                   |

| This project allows for a safe and secure environment for the residents of Huron Lodge. This project replaces all equipment required for the resident monitoring, security and access throughout the home property including the bedside call system, addresses risk management and the safety and security of all residents indoors and outdoors. |                            |                                    |                  | Due to technology changes, upgrades and infection control concerns, a complete replacement of the resident access and nurse bedside call system was projected to be replaced and funding allocated in 2018. This includes the current WanderGuard system, bedside nurse call buttons and paging system. Full replacement actually occurred in 2016 as the current system failed and was beyond repair with parts/technology being obsolete. Funding source for replacement was wireless project HLD-001-11 to be paid back to wireless in 2018 from this project per CR296/2016. Budget amounts are estimates.<br>2019-Software and Hardware updates/repairs<br>2021-Software and Hardware updates/repairs<br>Updates allow for fundamental communication components in responding to resident needs.<br>2023-Replacement communication system required due to technological advances. This budget is based on 2016 costs and may change by 2022.<br>2024- Wanderguard secured outdoor area for all residents to use. Currently there is no common outdoor secure area for residents. Due to increased resident population with dementia this would limit the health and safety risks which exist. Fencing, accessible walkway, modest shade gazebo, benches, WanderGuard secured. |  |              |               |             |                             |             |                |             |               |                |                |             |           |            |         |                            |   |   |

| <b>Project Description</b>  | <b>Version Description</b>  |
| <p>Huron Lodge has 7 servery and dining rooms within the building which was built in 2007. Each servery and dining room is located within each resident home area in which 32 residents live. The servery is where the staff members do small food preparation work and food is kept warm or cold. Staff pick up the meals from the servery to deliver to the dining room.</p> <p>Each servery includes the following equipment: 1 reach-in fridge, industrial microwave, steam table, cold food table, rotary toaster and small toaster. Each servery has a pantry, cupboards and counter top. The replacement of fridges is part of HLD-004-15.</p> <p>It is estimated at this time that each servery including its equipment will require updating in the next 5 years. Wear and tear is already prevalent with the countertops chipping and are susceptible to mold.</p> <p>One servery shall be updated per year and be completed at the cost of \$35,000 commencing in 2021.</p> <p>The following equipment/updates are required to be replaced when the servery is updated. Microwave \$500, steam table \$12,000, cold table \$2,000, rotary toasters \$1,000, multiple use oven \$9,000 and stainless steel countertop installation.</p> | <p>One servery shall be updated per year be completed at the cost of \$35,000 commencing in 2021.</p> <p>The following equipment/updates are required to be replaced when the servery is updated. Microwave \$500, steam table \$12,000, cold table \$2,000, rotary toasters \$1,000, multiple use oven \$9,000, stainless steel countertop installation.</p> <p>2025- café and servery updates</p> |

| <b>Project Description</b>  |                      |                                    |                     | <b>Version Description</b>   |                            |             |                |             |               |             |               |                  |                   |  |  |  |
| To establish a capital project to replace the dish machines and other industrial equipment within the kitchen at Huron Lodge that addresses risk management, quality assurance, and resident care requirements. This equipment is used as part of Huron Lodge's infection control procedures offering industrial quality sanitation and cleaning practices. |                      |                                    |                     | To establish a project for the replacement of the dish machines in the kitchen at Huron Lodge. This equipment has a life span of 8 - 10 years and by 2018 will need to be replaced as the cost of repairs on old equipment is too costly. Also included in this project is the replacement of other industrial equipment / industrial storage units and hot carts. |                            |             |                |             |               |             |               |                  |                   |  |  |  |

| <b>Project Description</b>   |                      |                                  |                  | <b>Version Description</b>   |                                 |             |             |             |                             |             |             |                  |                   |  |  |  |  |  |  |  |  |
| To establish a capital project for the replacement of the refrigeration and freezer equipment throughout the RHA servery, pantry, and main kitchen at Huron Lodge. |                      |                                  |                  | This equipment has a life expectancy of 8 to 10 years and by 2018 this equipment will need to be replaced as the cost of repairs will be too costly. Items requiring major repairs or replacing include 3 fridge walk-ins, 2 freezer walk-ins, and several fridges and freezers for the dietary (17 reach in refrigeration units, 6 reach in freezer units) and nursing areas (16 units) . Some units will be purchased new and others can be repaired through the purchase of compressors and motors.<br>2022-establish replacement program for fridge/freezers and purchase software system for monitoring temperature for food and medications as required per the Ministry of Health and long term care standards. |                                 |             |             |             |                             |             |             |                  |                   |  |  |  |  |  |  |  |  |

| <b>Project Description</b>  |                      |                                    |                  | <b>Version Description</b>   |                    |             |             |               |                             |             |               |                  |                   |  |
| This system will allow for a real time posting of all therapeutic information, such as but not limited to, individual needs, daily and weekly menus, diet cards, production sheets, and real time resident dietary requirements. This will mitigate risks such as aspiration, allergic reactions, ministry requirements, and consistent proper seating arrangements, etc. |                      |                                    |                  | This project will allow the Dietary area to update resident files in real-time as opposed to the current manual system which requires binders in several locations in every resident home area and main kitchen to be updated daily (e.g. therapeutics count sheets, production sheets, table cards, seating placements, nourishment list, etc. all required by the Ministry of Health and long term care). This will allow for computerized menus to be posted electronically and all changes to be reflected in real time as they are made. This would also benefit the nursing staff as they will have access to the most up-to-date information in providing resident care which will reduce risk to the residents of Huron Lodge and the Corporation of the City of Windsor.<br>Improved production efficiencies will result with streamlining the process in which data is entered and significant reduction of risk to resident health. It is expected there will be an operating budget impact as a new software may have an annual license fee and if tablets are purchased our IT department may charge the department an annual fee. Budget is based on 2016 estimates.<br>2019- Hardware (ie: screens, keyboards) for each dietary servery, kitchen, diet offices; Software to allow for point of care for dietary needs, possible wiring WIFI connection updates; backfill for training<br>2022- integration with clinical software and point of care tablets<br>2023- integration with current dietary software and menu integration, hardware such as computer terminal in the kitchen, monitors in the dining rooms, software updates as required. |                    |             |             |               |                             |             |               |                  |                   |  |

| <b>Project Description</b>  |                      |                                    |                  | <b>Version Description</b>   |                            |               |             |                             |               |               |             |                  |                   |                |
| To ensure there is an efficient capital fund for the Dietary Services division of Huron Lodge that addresses risk management, quality assurance, and resident care as it relates to legislated food services. |                      |                                    |                  | Establishment of a replacement program to purchase, upgrade, and or replace Dietary equipment for food storage & preparation equipment which must comply with the Ministry of Health and Long Term Care Act and Regulations as well as other legislated food service standards to ensure quality of food service to residents to maximize nutritional needs.<br>Equipment such as ovens, steamers, food preparation equipment, heating, food waste disposals and steam tables, have a life span of 8 – 10 years. The current cost to replace an industrial oven is \$35,000 - \$40,000 with an expected life of 8 - 10 years. All equipment is currently 10 years old and replacement is imminent. Continuous repair costs may eventually exceed the cost of full replacement. |                            |               |             |                             |               |               |             |                  |                   |                |

**Project Description**  
 Establish an equipment replacement program for the Resident Services Division of Huron Lodge that addresses risk management, enriched quality of life, Physiotherapy and Group Exercise programs, and improved delivery of resident programs.

**Version Description**  
 Establishment of a replacement program over the next five years to purchase, upgrade and or replace equipment for Physiotherapy Services and Resident life enrichment. These must comply with the Ministry of Health and Long Term Care Physiotherapy and Recreation and Social Activities regulations. Maintaining physical function in long term care is critical for improved functions across all aspects of resident care. By being able to provide the appropriate equipment to maintain or improve a resident's abilities we see reduced skin issues, improved ADL performance and increased psychosocial well being. Equipment such as ultrasounds, tens machines, and pedlars ensure our residents receive the appropriate exercises, range of motion, and strengthening to improve or maintain their physical abilities.  
 In addition to equipment for Physiotherapy and group exercise there are various equipment pieces that improve the programs and leisure time of our residents. It is mandated by the Act that the home provide a recreation program that meets the needs of the residents. Televisions, sound equipment, therapeutic recreation pieces, resident computers, and a large projection screen are all equipment that is necessary to enrich the lives of our residents. The use of technology and software in resident programming is vital in order to keep Huron lodge current with best practices in the private sector.

\$15,000 - Auditorium TV  
 \$10,000 - TVs (7 Lounge, 1 Therapy Room, 1 Café and 1 Front Main Area)  
 \$10,000 - Ipads and Software (8)  
 \$2,000 - Camera  
 \$10,000 - Computers (7 Resident, 1 for Library)  
 \$2,500 - BBQ  
 \$5,000 - Canopy  
 \$10,000 - Outdoor Furniture  
 \$10,000 - Snoezelen Equipment  
 \$5,000 - Celebration Dining Room Furniture  
 \$45,000 - Physio and Exercise Room Equipment  
 \$50,000 - Shade Structure for Outdoor Equipment

| Project Description   | Version Description   |
|---|---|
| <p>An internal audit on Corporate Facilities Key Control was conducted by the Office of Continuous Improvement. One of its recommendations stated "An opportunity exists for the Facility Operations Division to provide guidance to operating departments in the expected minimum standards and other best practices that should be utilized for tracking keys issued to employees. The Division should develop templates and guidelines for distribution to those managers in operating departments who are responsible for the security of City facilities."</p> <p>The City of Windsor has a duty under the Occupier's Liability Act and the Occupational Health &amp; Safety Act to protect employees and members of the public from foreseeable dangers, to ensure they are reasonably safe while on the premises, and to maintain a safe workplace. Keys provide access to buildings and consequently, to the people located within the buildings. An absence of strict key control could pose a security and a Health &amp; Safety risk.</p> <p>Keys within the corporation are currently handled on an ad hoc basis. Each facility tracks and maintains its own sets of keys. There is no standardized methodology to ensure keys are returned or not duplicated or that locks are changed if keys are lost.</p> <p>The key management system will include changing keys and locks of all external &amp; internal doors in a facility to a secure format. Software will be purchased to monitor key access &amp; distribution of keys. A policy will be created to provide common rules for the usage of keys.</p> | <p>There are 41 facilities identified as the priority to change locks and regulate key assignments. These include administration buildings, community centres, fire halls, and other recreation &amp; culture buildings such as Art Gallery, Willistead, Windsor International Aquatic Training Centre, etc. All facilities eventually need to be converted to a key control system. Initially, the focus for conversion will be on areas where staff is located, including many administrative buildings, community centres, fire halls, and operations buildings.</p> <p>Specific work identified at this time is as follows:<br/>           2019 - Conversion of 8-10 buildings (\$150,000)<br/>           2020 - Conversion of 4 buildings (\$50,000)<br/>           2024 - Conversion of remaining buildings (\$75,000)<br/>           2025 - Conversion of remaining buildings (\$75,000)</p> |

| <b>Project Description</b>  |                      |   |                  | <b>Version Description</b>  |  |             |             |                             |             |             |             |                  |                   |  |
| The building at 2437 Howard Avenue, adjacent to the Parks and Facilities office on McDougall, was purchased in 2014 and is currently being used as storage space. The facility includes an existing 2 storey office space that is approximately 11,000 sq. ft. and requires significant renovations to make it useable. Funding is necessary to proceed with capital improvements that would make the office space usable. Improvements would include the installation of City network connection, new partitions, flooring, ceiling, lighting, HVAC distribution, CCTV and security alarm, card access, etc. |                      |   |                  | Further to Council report (LL#17867; CR#161/2015) approved on August 24th, 2015, the Real Estate Division in conjunction with Facilities Operations, will bring forward a report with recommendations resulting from the study of administrative and operational buildings and space needs with future projections including the market value estimates and the constraints in proceeding with the sale of existing buildings. It is to be noted that there is an immediate need in the adjacent building at 2450 McDougall which houses the Facilities, Parks, Recreation and Administrative staff. These funds, based on an estimate of approximately \$45/sq. ft. for renovations, are sought as a placeholder until such report is presented to Council.<br><br>Specific work identified at this time is as follows:<br>2026 - Exterior Renovations (\$200,000) |  |             |             |                             |             |             |             |                  |                   |  |

| <b>Project Description</b>  | <b>Version Description</b>  |
| The Peace Fountain was constructed in 1978 as per the customized requirements of the City. It underwent a major overhaul and structural rebuild in 1988. Since then, the Parks department has been maintaining the Fountain from operating funds by prioritizing needs. | <p>Most of the its systems and fixtures are outdated. For example, the lighting is run by a DOS based software program that is understood by very few. Computer control systems, valves, electrical breaker panels and other components require a major review and replacement.</p> <p>The RFP will be put together to hire a consultant to review the entire structure and put forward recommendations for this aging fountain. Subsequent action will be based on the consultant's findings.</p> <p>The foundations (caissons) are starting to degrade, which would require funding of \$100,000. An additional \$100,000 would be required for additional repairs to retrofit the fountain.</p> <p>Enterprise Risk(s): This funding will mitigate against the identified Portrayal enterprise risk. The Peace Fountain is a source of civic pride and the City of Windsor would be portrayed in a negative light if pulled out of service due to maintenance issues.</p> |

| <b>Project Description</b>  |
| The Windsor International Aquatic Training Centre (WIATC) including Adventure Bay is a unique facility. It has a vast array of equipment that is used to run the facility as well as the specialized equipment associated with the waterpark and diving facility. In addition, the warranty for the equipment in the facility is now expired so this program will fund necessary replacement of components or equipment. It will include replacement and capital repairs of equipment, amusement devices, specialized HVAC equipment, pumps, water treatment equipment, etc. Other capital needs include replacement of safety features as well as capital repairs/replacements of items that support the unique functions of the facility. |

|   |
|---|
| <b>Version Description</b>  |
| The following funding will be assigned on a priority basis.<br><br>Specific work identified at this time is as follows:<br>-non-slip floor coating (annual application)<br>-electrical work on Flowrider<br>-flowrider safety matting & wearing surface<br>-epoxy coating on the water storage tank<br>-dectron repairs<br><br>Enterprise Risk(s): This funding will mitigate against the identified Infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |

| <b>Project Description</b>   |                      |                                  |                     | <b>Version Description</b>  |   |             |                             |             |             |             |             |                  |                   |  |
| To repair, replace and upgrade maintenance equipment within Facilities. This equipment is costly to repair/replace and many items are reaching the end of their useful life.<br><br>Annual funding is being requested to replace/repair aging maintenance equipment, such as floor cleaning equipment, compressors, lifts etc. This budget will ensure that funds are available when maintenance equipment throughout Facilities fails or needs replacement. |                      |                                  |                     | The following project requires an annual allotment of \$50,000 beginning in 2022 to fund the replacement of facility maintenance equipment. The annual funds will be assigned on a priority basis based on the overall needs for maintenance equipment within the various facilities maintained by the Facilities division.<br><br>Enterprise Risk(s): This funding will mitigate against the identified infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |   |             |                             |             |             |             |             |                  |                   |  |

| <p>The forthcoming Employee Service Center and Payroll areas of the Human Resources Department require office space to accommodate the proposed staffing model related to the implementation of the Workforce Management Software. In order to maximize efficiencies, these areas need to be located next to the Human Resources Department, which is located on the 4th floor of 400 City Hall Square.</p> <p>The Employment and Training Services division of the Employment and Social Services Department currently occupies space on the 4th Floor of 400 City Hall Square. This budget will allow for the construction and reconfiguration of existing space within the 400 City Hall Square to optimize use of the building's office space and to allow for the relocation of this division.</p> |                            |                                    | <p>Employee Training Services will be relocated within 400 City Hall Square after the move of other divisions to the newly completed 350 City Hall Square which is scheduled to reopen in 2018. Funds are set aside to cover renovations and furniture for the new space.</p> |               |         |      |                             |           |         |        |        |   |                |             |           |            |         |                            |   |   |      |   |   |   |      |   |   |   |      |   |   |   |      |   |   |   |       |   |   |   |  |                |                |          |  |  |  |  |  |  |  |  |  |  |            |      |      |      |      |      |      |      |       |       |                 |  |  |  |  |  |  |  |  |  |                                   |  |  |  |  |  |  |  |  |  |  |        |         |   |   |   |   |   |   |         |       |        |         |   |   |   |   |   |   |         |                 |  |  |  |  |  |  |  |  |  |                                     |  |  |  |  |  |  |  |  |  |  |        |         |   |   |   |   |   |   |         |       |        |         |   |   |   |   |   |   |         |

# Project Version Summary

**Project #** ENG-008-17      **Service Area** Office of Parks, Rec., Culture & Facilities  
**Budget Year** 2019      **Department** Parks & Facilities  
**Asset Type** Unassigned      **Division** Facilities  
  
**Title** Generator & Fuel Storage Upgrades  
**Budget Status** Council Approved Budget  
**Major Category** Corporate Property Infrastructure  
**Wards** City Wide  
**Version Name** Main (Active)

| It has recently been identified that most of the generators and their fuel storage units need upgrades in order to comply with TSSA regulations. Comprehensive inspection will be done at each site to determine the extent of the upgrades needed to meet the legislated requirements. |                      |                                    |                  | The following funding requested is to address the requirements as set out by TSSA. In the Facilities area, 11 sites will be inspected and upgrades performed as needed.<br>2019 - Huron Lodge (\$45,000) |                                 |                            |             |             |                             |             |             |              |              |  |  |  |  |  |  |                  |  |                   |  |

| <b>Project Description</b>  | <b>Version Description</b>   |
| Backflow prevention devices are used on water supply systems to prevent contaminants from being drawn back into the municipal water supply. They are required to be installed at the main supply entrance to the building and at the end of stream points such as taps and hose bibs. The issue of backflow prevention is a serious health & safety concern and for that reason it is addressed by the Ontario Building Code and the EnWin Utilities Cross Control By-law. The City of Windsor is currently in contravention of these regulations at many city owned facilities, and is in receipt of corrective orders from EnWin Utilities. Tender 128-08 was issued to begin the corrective measures of the backflow prevention program. Regulations dictate that backflow devices must be tested yearly and repaired as required. Defective devices will not perform their required function. | Initially funded with \$70K in 2003, it is necessary that the program continues on an ongoing basis so that (i) potential health and safety threats to the municipal water supply system are eliminated and (ii) the city remains in compliance with applicable regulations. Installation of devices that require protection can be prioritized based on their potential to contaminate the water supply system and then completed over a multiyear period. Tender 128-08 was issued to begin the corrective measures of the back flow prevention program.<br><br>There are still a significant number of devices that have not been tested and/or replaced. Of the devices that remain, priority will be given to those that pose the greatest risk in terms of water contamination. On an ongoing basis, these devices will require yearly inspection and maintenance and/or replacement as dictated by regulations. |

|   |
|---|
| <b>Project Description</b>  |
| The corporate roof replacement program has been revised to reflect the highest priority based on available funding. It should be noted, roofs which will not be replaced until funds are available will continue to deteriorate resulting in either emergency repairs and/or eventual, untimely and unfunded roof replacements. |

|  |
|--|
| <b>Version Description</b>   |
| The City of Windsor has several building roofs that need attention. Jobs have been prioritized and estimated according to current status. See attachment for further details by year.  |
| Enterprise Risk(s): This funding will mitigate against the identified Infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |

| This project is used for all Fire Hall capital repairs that are prioritized annually by Facilities in consultation with Fire. Fire & Rescue facilities are unique in that they serve an emergency response function, with staff living in them and operate 24 hours a day. With the exception of the construction of the new Fire Hall 7, completed in 2012, and Fire Hall 2, completed in 2015, and Fire Hall 5, which is still to be constructed, the average age of the Fire & Rescue facilities is 27 years and many of the building components are past their life expectancy. These facilities are experiencing greater capital investment needs to maintain, repair or replace aging components. |                      |                              |                  | The Fire Halls that are not being replaced require funds for repairs/replacements as needed.<br><br>Enterprise Risk(s): This funding will mitigate against the identified infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |             |                            |             |             |                             |             |             |              |              |  |  |  |  |  |  |                  |  |                   |  |

**Project Description**  
 Some of the asphalt paving and concrete approaches at Corporate Facilities are beyond their life expectancy or have become damaged. This includes cracked and uneven surfaces which cause trip hazards, allow water to penetrate the surface which will erode the base layer and ultimately speed up the deterioration of the surface layer. In extreme cases it causes vehicle damage. Depressions allow ponding water to freeze/thaw cycle which can quickly break up materials. The repairs to these surfaces will reduce vehicle wear and damage as well as reduce liability associated with trip and fall incidents.

**Version Description**  
 Repair of asphalt paving and concrete approaches city wide that are beyond their life expectancy or have become damaged on a priority basis. This project requires annual funding of \$100,000 to be prioritized based on need.  
  
 Specific work identified at this time is as follows:  
 2026 - Adie Knox West Parking Lot (\$200,000), Willistead Parking Lot (\$360,000), WFCU Parking Lot (\$1,500,000) and Huron Lodge Parking Lot (\$650,000)  
  
 Enterprise Risk(s): This funding will mitigate against the identified infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken.

**Project Description**  
 The expenditures identified are capital in nature designed to maintain the operational integrity of this heritage complex. These necessary improvements are aligned with the recommendation resulting from a 2003 study initiated by the City of Windsor and contained in a published document authored by the Architect George Robb "A Condition Assessment Strategy for Repairs and Maintenance of Heritage Properties".

**Version Description**  
 The Willistead Complex requires an annual allotment of \$50,000 beginning in 2021 for repairs and maintenance as needed.  
 Specific work identified at this time is as follows:  
 2019 - Skylight Repairs (\$15,000), Air Conditioning (\$45,000) and Heritage Consultant Perimeter Fence (\$10,000)  
 2021 & 2022 - Paul Martin Terrace Paving (\$150,000), Foundation Waterproofing (\$100,000) and Repairs to Window Grates and Capstones (\$120,000)  
 2025 - Willistead Fencing (\$500,000) and Exterior Painting (\$100,000)  
 2026 - Front Entrance Courtyard (\$490,000) and Willistead Fencing Phase II (\$500,000)  
 Enterprise Risk(s): This funding will mitigate against the identified infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken.

### Project Description

Ongoing improvements to buildings based on priority. The Maintenance, Contracts, Field Services, and Fleet Divisions are headquartered at the Crawford Yard Facility. (Satellite locations for these divisions include the east end winter control salt storage, and administrative trailer at 3540 N. Service Rd.).

Crawford Yard Facility was converted from prior industrial uses to accommodate Public Works staff over 45 years ago. There is a salt dome and 4 buildings with material storage/processing areas on-site. Rehabilitation and renovation are required on an ongoing basis due to changes in technological and operational requirements and the age of the various buildings and the site.

### Version Description

An annual allotment of \$25,000 for various repairs, to address health & safety issues, unexpected needs, and to perform proper maintenance is also needed.

Report #C 175/2017 was approved via CR 589/2017 to rehabilitate the Central Salt Dome, demolish the Crawford Yard Salt Dome and construct a new Crawford Salt Dome at a total estimated cost of \$1,114,080. Of this amount, \$814,080 is being funded and pre-committed from this project, through funding in 2018: \$246,000 and 2019: \$465,720. \$102,360 is being recommended to be funded from the 2017 Inflationary Pressures capital project (7171057) previously approved by Council. The remaining \$250,000 was previously approved in 2015 funding and \$50,000 previously approved in 2017 for salt dome rehabilitation.

Furthermore, additional funds have been requested for specific issues currently identified below:

2026+:

- \$125,000 to convert Building 4 to office space
- \$50,000 for window replacements at carpenter shop
- \$50,000 for Crawford Yard Main Building renovation to repurpose area in stockroom
- \$100,000 for Crawford Yard shop floor drain repairs
- \$50,000 for Crawford Yard Main Building window replacement
- \$125,000 for miscellaneous repairs at Crawford Yard

### Version Comments

PRE-COMMITMENT:  
CR589/201, Report # C 179/2017 approved a pre-commitment of \$465,720 in 2019.

**Project Description**  
 The Corporate Security Infrastructure forms an important element of Facilities that lends towards the safety of both municipal staff and the public. It includes items such as; card access equipment, cameras, monitors, digital video recording devices, customer service counters, electric strikes with door release buttons, mag locks, door hardware and exterior lighting. This program would fund the necessary modifications, expansions and upgrades to existing systems, as well as the funding to install new infrastructure, as required, where none has previously existed. The City of Windsor's current security infrastructure is aging and in need of an upgrade. Currently there is a disconnect between the security infrastructure in the downtown core and the majority of the other Corporate facilities.

**Version Description**  
 The following project requires a \$50,000 in 2019-2020 and \$75,000 in 2021+ annual allotment to maintain the security systems currently in place at all of the City of Windsor facilities.  
  
 Specific work identified at this time is as follows:  
 2019 - 2437 Howard Ave. Gate and Card Access (\$35,000), Willistead Intrusion Alarm and Office CCTV (\$25,000) and Capitol Theatre Intrusion Alarm (\$25,000)  
 2026 - 2450 McDougall Gate and Card Access (\$50,000), Recreation Facilities Cameras at Cash Drawers (\$60,000), Forest Glade CC Card Access (\$50,000), Adie Knox CC Card Access (\$50,000), Zamboni Room Card Access for Forest Glade Arena, Adie Knox Arena and South Windsor Arena (\$75,000) and Huron Lodge Card Access Conversion (\$250,000)

**Project Comments/Reference**  
 7053035 - This capital account replaces both Corporate Wide Security Systems and Security Infrastructure Improvements.

| <b>Project Description</b>  |                      |                                    |                     | <b>Version Description</b>   |                                 |                             |             |             |             |             |             |                  |                   |  |
| This program is intended to fund structural & building envelope repairs at all corporately owned facilities. These improvements focus on the building envelope and structural repairs and generally have individual cost occurrences of less than \$50,000. |                      |                                    |                     | An annual budget of \$50,000 beginning in 2019 is required to cover all repairs on an as needed basis.<br><br>Specific work identified at this time is as follows:<br>2019 - Francois Baby House Foundation Repairs (\$50,000)<br>2026 - 930 Mercer Ave Exterior Wall Insulation and Siding (\$100,000) and Capri Pizzeria Recreation Complex Dressing Rooms Insulation (\$50,000)<br><br>Enterprise Risk(s): This funding will mitigate against the identified Infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |                                 |                             |             |             |             |             |             |                  |                   |  |

| <b>Project Description</b>  |                      |                                  |                  | <b>Version Description</b>  |                                |                            |             |                             |             |             |             |                  |              |                   |
| There are a number of corrections required at Huron Lodge. The most significant are correcting issues related to the building envelope water leaks (walls, windows, roof, and parapets), the heating, cooling, ventilation, & humidification systems, plumbing, and flooring repairs. An architectural/engineering consultant is required to assess the deficiencies and recommend the best, most cost effective solutions. |                      |                                  |                  | Specific work identified at this time is as follows:<br>2026 - Kitchen Floor (\$250,000) and Wall Protection Board for the Corridor Walls (\$250,000)<br><br>Enterprise Risk(s): This funding will mitigate against the identified infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |                                |                            |             |                             |             |             |             |                  |              |                   |

| There are a number of buildings within the facility division that are in poor condition. They have been identified as reaching the end of their useful life and need to be demolished. By demolishing these buildings, the Corporation would no longer have the liability to maintain these buildings. As well, restoration of the property will help in creating an improved aesthetic for the neighbourhoods and parks that surround these buildings. |                      |                                  |                  | This project requires an annual allotment of \$100,000 beginning in 2022 to fund the demolitions. The funds will be assigned on a priority basis. |  |             |             |             |                             |             |             |                  |                   |  |  |  |  |  |  |  |  |

|   |                      |                                  |                  | Unknown   | There will be an approximate operational budget impact of \$30,000 if this project to demolish these structures is not funded. These expenses would impact operational line item accounts such as insurance, utilities and building maintenance due to the need to maintain these structures at a minimum level, despite not being operational. In addition, there is a significant risk component to maintain these vacant buildings, as they are prone to vandalism. |             |             |             |                             |             | 0           | 0                |                   |  |  |  |  |  |  |  |  |

| The Sandwich Street Fountain located at the corner of Sandwich St and Mill St. is a 1980's replica of the cast iron fountain donated by prominent Sandwich resident, William P. Leech, in 1909. It is in need of repairs to restore it to working order. |                      |                                  |                     | The fountain needs numerous repairs, including repainting, retiling, pump repairs, relocation of the utility pit and brick work.<br>2026 - Tile & Pump Repairs and Painting (\$20,000) and Relocating Utility Pit and Brick Work (\$20,000) |   |             |             |             |             |             |             |              |                  |                   |

| <b>Project Description</b>  |                      |                                    |                  | <b>Version Description</b>  |                            |             |             |             |                             |             |             |             |                  |                   |
| The average life expectancy of a water boiler is approximately 15 to 20 years, with some failing sooner. Many of our facilities have boilers that are older and require replacement or major repair. New-generation boilers offer major increases in annual operating efficiency compared to boilers that are 10 or more years old. |                      |                                    |                  | The Building Condition Assessment project and continued collection of asset data will assist the department in inventory and detailing a replacement schedule.<br><br>An annual budget of \$50,000 is being requested to replace aging boilers as they approach the end of their useful life.<br><br>Enterprise Risk(s): This funding will mitigate against the identified Infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |                            |             |             |             |                             |             |             |             |                  |                   |

| <b>Project Description</b>   |                      |                                    |                  | <b>Version Description</b>  |  |             |             |             |                             |             |             |                  |                   |              |
| With the help of a Consultant, each municipal facility shall be assessed and reported upon in terms of the key components of the building envelope and the building systems. Once completed, this assessment will form the framework for the creation of future capital budget requests over the next ten years. This project is critical in developing our asset management planning program. |                      |                                    |                  | Building condition assessment work will be ongoing. Funding will accumulate in order to perform the next phase of building condition assessments. This work will include building condition assessments of additional buildings, accessibility audits and re-testing/re-inspecting as required.<br><br>An annual budget of \$50,000 is requested to cover the cost of building condition assessment work performed.<br><br>Enterprise Risk(s): This funding will mitigate against the identified Infrastructure enterprise risk. This funding will help identify the infrastructure needs within Facilities so future costs can be projected. |  |             |             |             |                             |             |             |                  |                   |              |

| <b>Project Description</b>   |                      |                                  |                          | <b>Version Description</b>   |  |             |             |             |             |             |             |                  |                   |  |
| The Facility Operations division has drastically changed from its initial roots. Over the years, Facility Operations has worked to identify the key services necessary to ensure corporate facilities are maintained and services are not disrupted. The department's corporate role has grown from a maintenance division to building administrators division which includes oversight of external agreements with 3rd party tenants such as the federal and provincial governments and management of high tech or high maintenance buildings such as the WIATC (water park) and the Capitol Theatre. As the Facility Operations division evolved over the last decade with a focus on real property management, the need to update business processes and utilize industry best practices has become increasingly crucial. |                      |                                  |                          | This Business Process Review project will provide a comprehensive review of the administrative resources, procedures, project management practices and asset management processes for the Facilities department.   |  |             |             |             |             |             |             |                  |                   |  |

### Project Description

To implement a proactive mechanism to allow heating and cooling system replacement to be planned for within the capital budget.

### Version Description

This project will provide preventative maintenance on all city heating and cooling units to prevent system failures and extend their useful life.

An annual budget of \$100,000 is requested to cover material costs for regular and unforeseen maintenance that may arise in the year.

Specific work identified at this time is as follows:

2019 - Forest Glade Community Centre HVAC (\$55,000), Riverside Library HVAC (\$45,000), Mackenzie Hall HVAC (\$150,000) and Capitol Theatre HVAC and Rooftop Units (\$200,000)

2020 - Willistead Cooling System and HVAC (\$350,000)

2022 - BAS Upgrades (\$50,000)

2025 - Funding to be prioritized based on Building Condition Assessments and other identified needs (\$400,000)

2026 - Funding to be prioritized based on Building Condition Assessments and other identified needs (\$1,200,000)

Enterprise Risk(s): This funding will mitigate against the identified Infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken.

| <b>Project Description</b>  | <b>Version Description</b>  |
| To replace and upgrade flooring, ceiling and wall finishes corporate wide in an effort to improve resistance to damage and reduce the cost of maintaining high traffic areas. | Funding is required to replace damaged and aged carpets and floor finishes that are beyond their life expectancy at various municipally owned facilities. Specific work currently identified will help prevent possible trip hazards by replacing and repairing deteriorated flooring.<br><br>An annual budget of \$100,000 is requested to cover maintenance flooring costs on a priority basis.<br><br>Specific work identified at this time is as follows:<br>2019 - Forest Glade Library Flooring (\$38,000), Riverside Library Flooring (\$92,000), Budimir Library Flooring Expansion (\$30,000)<br>2026 - Funding to be prioritized based on Building Condition Assessments and other identified needs (\$400,000)<br><br>Enterprise Risk(s): This funding will mitigate against the identified Infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken. |

| <p><b>Project Description</b></p> <p>This is an ongoing program to address the deficiencies outlined in the corporate health and safety audit. Pending initiatives are brought forward as issues arise. Facilities Operations finds itself called upon to resolve Health &amp; Safety matters across the Corporation, with a limited corresponding source of funding. As identified in the recent OMBI performance indicators, Facilities Operations is responsible for providing service to over 1 million square feet of space among various City owned facilities. This includes ensuring that Health &amp; Safety orders/complaints are followed up in a timely manner. Currently, many orders cannot be absorbed in the various operating budgets. Expectations are that, due to aging municipal facilities, an aging work force and the recent hiring of additional Ministry of Labour work force with respect to enforcing Bill C45, the demand for Health &amp; Safety related upgrades will steadily increase.</p> | <p><b>Version Description</b></p> <p>Issues that will require attention as a result of various Provincial Ministry and Municipal orders include but are not limited to the following:</p> <ul style="list-style-type: none"> <li>-mould remediation</li> <li>-work environment illumination levels as set forth by the Ministry of Labour</li> <li>-washroom improvements</li> <li>-sidewalk/pathway trip hazards</li> <li>-flooring trip hazards &amp; other structural hazards</li> <li>-air quality &amp; noise improvements</li> <li>-arc flash &amp; shock protection assessments</li> <li>-electrical safety authority orders to comply</li> <li>-fire prevention officer orders to comply</li> </ul> <p>Outstanding orders from both the ESA and our own Health &amp; Safety team are currently being compiled. It should be noted that this represents a running total that is fluid and changes over time. A backlog of work orders is anticipated based on Bill C-45, although dealt with as far as funding will allow. It can be effectively demonstrated that more funds will be required in future years.</p> |

| <b>Project Description</b>   | <b>Version Description</b>   |
| The WFCU Centre constructed in 2007/2008, will require ongoing capital maintenance and minor operational adjustments for the new fully operational state-of-the-art facility. Operation over the last four years has brought certain elements to management that needs to be addressed such as the zamboni floor drains that are too small and cannot keep up with the flow of water and therefore causing a health and safety issue. Storage areas need to be addressed due to the limitation of storage areas within the facility. A storage shed is required to store equipment, staging and chairs. These items are currently being stored in the back house which is crowded and causing a health and safety issue. | This facility is highly used by the City and other tenants such as Ovations, Seniors Group, Windsor Spitfires, Windsor Express and Global Spectrum.<br><br>See attachment for further details by year. |

### Project Description

Ongoing upgrades/refurbishments to municipal arenas in order to ensure that they remain functional and do not pose a hazard to users and address the needs of user groups. Due to changing user demographics (i.e. more females playing hockey), a shortage of dressing rooms is one of the areas that must be addressed. We should now be offering 6 dressing rooms per single pad and 12 per double pad. There is also a concern that additional capital repairs are required for the aging arena facilities (Forest Glade Arena, Adie Knox Arena, Capri Pizzeria Recreation Complex Arenas). Compressors/chillers are very expensive equipment that require ongoing maintenance programs and major overhauls every few years.

### Version Description

On a (3) three year cycle, the City of Windsor arena facilities require a comprehensive structural inspection report, in accordance with Section 54 (1) (m) of the Occupational Health and Safety Act, Revised Statutes of Ontario, 1990 and the guidelines for "Structural Adequacy of Arenas" of the Association of Professional Engineers of Ontario, published latest edition, as required under the Ontario Ministry of Labour. \$30,000 is required to adhere with Ministry of Labour standards in years 2017 & 2020 to maintain our compliance within these standards.

To complete the extensive capital improvements to our arenas' dressing rooms, showers, restrooms, complete structural assessment work, maintenance programs for all of the plant equipment including refrigeration equipment, compressors, etc., the requested annual funding is outlined for each year in the attached document.

Critical Needs Identified:

- Replacement of Dehumidification Systems - South Windsor Arena & Forest Glade Arena
- Compressors - Refrigeration of Ice

**Project Description**  
 A 2003 Condition Assessment & Strategy for Repair & Maintenance of Heritage Properties report by Architect George Robb & author Peter Stewart identified a problem with the windows at Mackenzie Hall. The report stated that past maintenance efforts at the Hall, such as repair/repainting of wood window sills, were not completely successful because of ill-fitting storm windows and/or uncontrolled high interior humidity. A call for proposals for a study of the humidity/window issue in 2004 revealed that the major problem was the existing single pane replica windows installed in the 1980's. There has since been additional assessments performed on this building with regards to the roof replacement and other restorative recommendations.

**Version Description**  
 Mackenzie Hall requires an annual allotment of \$50,000 beginning in 2022 for various repairs, maintenance and restorations to address unexpected needs and to perform proper maintenance as needed.  
  
 Specific work identified at this time is as follows:  
 2026 - Second Floor Accessible Washroom (\$130,000), Sign Refurbishment (\$50,000)  
  
 Enterprise Risk(s): This funding will mitigate against the identified infrastructure enterprise risk. The lack of funding for these works will result in deferral of repairs and increase the likelihood of over expenditures in the operating budget when emergency repairs must be undertaken.

## Project Description

The Forestry Division is responsible for the maintenance of approximately 70,000 street trees along the right-of-way and 30,000 parkland trees. Tree maintenance on existing trees primarily involves the removal of trees in very poor health and trimming of trees that in good condition and viable. In the past, Parks carried out area trim contracts throughout the city with the intent to trim all the city's street trees over a 10 year period. This proactive maintenance was last carried out in 2006 on a smaller scale.

An update of the Forestry plan was presented to Council via report S184/2017 to propose a preventive maintenance program which would prevent the future occurrence of a tree maintenance backlog. The following costs are outlined in the report:

2019:  
 \$1,600,000 Tree Trimming Preventative Maintenance  
 \$250,000 Tree Planting  
 \$500,000 Tree Removals  
 TOTAL: \$2,350,000

2020:  
 \$1,600,000 Tree Trimming Preventative Maintenance  
 \$200,000 Urban Forest Management Plan  
 \$250,000 Tree Planting  
 \$500,000 Tree Removals  
 TOTAL: \$2,550,000

2021:  
 \$1,600,000 Tree Trimming Preventative Maintenance  
 \$250,000 Tree Planting  
 \$500,000 Tree Removals  
 TOTAL: \$2,350,000

2022:  
 \$1,600,000 Tree Trimming Preventative Maintenance  
 \$250,000 Tree Planting  
 \$500,000 Tree Removals  
 TOTAL: \$2,350,000

2023:  
 \$1,600,000 Tree Trimming Preventative Maintenance  
 \$250,000 Tree Planting  
 \$500,000 Tree Removals  
 TOTAL: \$2,350,000

2024:  
 \$1,600,000 Tree Trimming Preventative Maintenance

## Version Description

\$250,000 Tree Planting  
\$500,000 Tree Removals  
TOTAL: \$2,350,000

2025:  
\$1,600,000 Tree Trimming Preventative Maintenance  
\$250,000 Tree Planting  
\$500,000 Tree Removals  
TOTAL: \$2,350,000

2026+:  
\$6,400,000 Tree Trimming Preventative Maintenance  
\$1,000,000 Tree Planting  
\$2,000,000 Tree Removals  
TOTAL: \$9,400,000

The Council report recommended that \$2,080,000 be referred to the future capital budget deliberations. This project funding level would be required to maintain appropriate asset management principles.

The age distribution of our street trees is as follows: 30% are over 60 years old; 30% are between 40-60 years old; 18% are between 20-40 years old; and 22% are under 20 years old. As a result funds originally budgeted to trimming were reallocated to removals. The balance of the trim budget has been used when available, to help reduce the backlog of work activity spawned by citizen requests.

As a result of the above activities Parks no longer carries out any proactive trimming. All trimming is carried out on a reactive basis. The absence of proactive trimming greatly increases the city's liability when it comes to the related claims. In order to move to the acceptable industry standard funds be will be required each year on a go forward basis to address the backlog of 311 calls and to address the trimming levels required.

2019:  
\$250,000 Tree Trimming Expenses  
\$211,500 Tree Planting Expenses  
\$250,000 Tree Removals  
TOTAL: \$711,500

2020:  
\$288,500 Tree Trimming Preventative Maintenance  
\$250,000 Tree Planting  
\$200,000 Urban Forest Management Plan  
\$50,000 Tree Removals  
TOTAL: \$788,500

2021:  
\$250,000 Tree Trimming Expenses  
\$250,000 Tree Planting  
\$250,000 Tree Removals  
TOTAL: \$750,000

2022:  
\$250,000 Tree Trimming Expenses  
\$250,000 Tree Planting  
\$250,000 Tree Removals  
TOTAL: \$750,000

2023:  
\$250,000 Tree Trimming Expenses  
\$250,000 Tree Planting  
\$250,000 Tree Removals  
TOTAL: \$750,000

2024:  
\$500,000 Tree Trimming Expenses  
\$250,000 Tree Removals  
\$251,000 Tree Planting  
TOTAL: \$1,001,000

2025:  
\$250,000 Tree Trimming Expenses  
\$250,000 Tree Planting  
\$250,000 Tree Removals  
TOTAL: \$750,000

2026+:  
\$17,600,000 Tree Trimming Preventative Maintenance  
\$2,159,000 Tree Planting  
\$2,750,000 Tree Removals  
TOTAL: \$22,509,000

| <b>Project Description</b>  |                      |                              |                  | <b>Version Description</b>  |  |   |             |             |             |                             |             |             |                  |                   |
| The existing Lanspeary Park greenhouse complex consists of 7 heated greenhouses housing over 60,000 specialty type plant material. The greenhouses range in age from 10 to 90 yrs. and are at the end of their life cycle. Following the completion of a study by Glos Associates titled "Proposed Relocation/Construction of Lanspeary Park Greenhouse Feasibility Study" dated Sept. 10/18, Council approved the construction of a new greenhouse complex at Jackson Park and referred the funding requirements to the 2019 Capital Budget process. |                      |                              |                  | This project will include the design/build construction of a greenhouse which would be built to current safety and high energy efficient standards. The new complex is anticipated to offer operational savings to the corporation related to hydro, gas and water resulting from the installation of high efficiency systems and processes. . The project includes an expansion space for in house production of annuals which are currently outsourced for use in hanging baskets and planters. The greenhouse operation will become increasingly more important to the City Beautification program as the commercial greenhouse industry is trending from flowers to vegetable and medical crop production.  |  |   |             |             |             |                             |             |             |                  |                   |

**Project Description**

This project reflects \$5.7M in placeholder funding for various elements of the Riverfront allocated from:

- 2013 Enhanced budget allocated placeholders in the amount of \$1.4M to the Riverfront
- 2014 Enhanced budget of \$2.3M for CRIP from 2018 Debt Reduction Levy; and
- 2014 Enhanced budget of \$2.0M placeholder for the Riverfront. In total \$5.7M. - \$2.75M has been attributed to the Pedestrian Tunnel, \$1.4M from 2013 and \$1.35M from 2014. To date, \$228K of the \$2.75M has been approved and spent on the pedestrian tunnel. The balance of \$2.522M includes the 2020 and 2021 amounts in this capital project budget, as well as \$600K in 2017 funding which remains in the PAYG reserve pending a separate report to Council to release the funds for use.

- \$1.99M of the \$2.3M in 2018 debt reduction levy funding was allocated as follows:

- \$40,000 Festival Stage Plaza - CR203/2014
- \$26,350 Dieppe Flag Pole - CR30/2015
- \$200,000 Rotary Centennial - CR179/2017
- \$1,723,650 - Festival Plaza - CR430/2018
- \$310,000 Festival Plaza (2019) - CR430/2018

**Version Description**

2019 - \$310K – Festival Plaza  
 2020 - \$519K attributed to Riverfront Trail - requires a separate report to approve use of funds

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                    |                     | This project will incorporate the installation of a multi-use path north of Pulford Street adjacent to Monseigneur Jean Noël School. This project will be tendered for construction in spring 2018.   |                                 |             |             |                             |             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | Installation of an asphalt multi-use path around the perimeter of the park is proposed to connect existing amenities for accessibility and trail related activities. If approved, this project will be tendered for construction in the Spring of 2018. |             |             |             |             |                             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration.   |                   |                                  |                     | Construction/renovation (to AODA standards) of the existing washroom/changeroom for use by pool and Miracle Diamond Park users. Placeholder of \$600,000 is included in 2024 for future development related to Miracle Diamond capital construction from RMBA. |         |         |      |       |               |               |           |      |         |         |   |      |   |   |   |      |   |   |   |      |   |   |   |      |   |   |   |      |         |         |   |      |   |   |   |       |   |   |   |  |                |                |          |  |  |  |  |  |  |  |  |  |  |  |            |      |      |      |      |      |      |      |       |       |                 |  |  |  |  |  |  |  |  |  |  |                                   |   |   |   |   |   |         |   |   |         |       |   |   |   |   |   |         |   |   |         |                 |  |  |  |  |  |  |  |  |  |  |                                     |   |   |   |   |   |         |   |   |         |                            |   |   |   |   |   |   |   |   |   |       |   |   |   |   |   |         |   |   |         |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | Installation of a washroom facility at the east entrance to the park adjacent to the existing playground and parking lot. The first opportunity to fund and tender this work is in the Spring of 2019.   |                                 |             |             |             |                             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                    |                     | Allocated funds will be used for dock improvements, signage, trail and pedestrian bridge renovations, shore protection, accessible park amenities and a boat to transport the public to and from the island. |                              |             |             |                             |             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | This project involves the creation of off-road bicycle facilities in consultation with the community and with stakeholders. Consultations would take place during the 2018 calendar year for prospective construction in the Spring of 2019.  |  |             |             |             |                             |             |             |             |              |              |

| <b>Project Description</b>  |                      |                                    |                  | <b>Version Description</b>   |                                |                            |             |             |                             |             |             |                  |              |                   |
| This project is the continuation of the block retaining wall along the south limits of the new Festival Plaza between Riverside Drive and the Festival Plaza. The current conditions were put in place as a temporary measure due to the poor soil conditions in this area. The temporary design included placing fill material and a means to measure settlement of the fill. The majority of settlement was complete at the end of 2014. Due to funding pressures, it is recommended that this work be scheduled in 2019. |                      |                                    |                  | 2019: Design and construction of the block retaining wall - \$675,000<br>2020: Construction of block retaining wall (Phase 2)- \$675,000<br><br>2022 - Permanent Electrical Panels - \$50,000<br><br>Typically, more than one point of electrical access is needed to support the events in the Plaza. This is achieved through the use of portable power carts which have to be manually set up/removed when needed. Installing permanent power access points will reduce risk as well as reduce the setup/removal costs. It will eliminate the need for temporary safety measures each time the portable power cart is set up. |                                |                            |             |             |                             |             |             |                  |              |                   |

| The priorities of this project will be determined by the public consultation and review of the Central Riverfront Implementation Plan 2000 (CRIP). Much of the initial works in this project involve the installation of infrastructure for continued development of the riverfront. Safety items, accommodation of public access and activities for families continue to be a priority. The project will include infrastructure servicing, hard surface paving, an entrance court, landscaping, site furniture, lighting, fencing, seating, access stairs and ramps. |                      |                                    |                     | 2019: Dieppe Park Riverwalk Restoration - \$600,000<br><br>2020: Recreationway lights & way-finding signage - \$500,000<br>Festival Plaza paving, lighting, & perimeter fence - \$2,000,000<br>2021: Segment 7 - Family Recreation - Glengarry to Parent \$2,450,000 & on-going improvements in line with the CRIP \$9,500,000<br>Celestial Beacon design - \$400,000   |             |             |             |             |             |             |             |              |              |  |

Where additional landscaping and floral displays are prominent the workload and budget pressures are significant. Amenities such as lighting, site furniture, seating and signage add to the maintenance costs of the Operating Department.      0      0   |             |             |             |             |             |             |             |              |              |  |

**Project Description**  
 As per the 2014 Enhanced Capital Plan, Council approved in principle funds from the 2018 Debt Reduction Levy for accessible playgrounds citywide. City Council also approved the audit of existing playground equipment in Report #15932 for the removal of non compliant playground equipment on March 28, 2012 as per Council Resolution CR129/2012. This project will capture the costs of the playground replacement program as a result of the independent audit, compliance with CSA guidelines and AODA standards.

**Version Description**  
 There is a listing included with Council report 142/2017 highlighting the prioritization of playgrounds which will be replaced based upon condition and inspections reports. The report also identifies an annual funding requirement for playground replacements over the next 20 years of \$1.5 to \$2M.

**Version Comments**  
 As per CR89/2014, Report #17088, Council formerly approved the Accessible Playgrounds project. Council Report #18001, dated Dec. 21, 2015 outlined the annual budget requirements to sustain a successful Accessible Playground replacement program. Council committed to 125 Accessible Playground units city-wide.  
 PRE-COMMITMENT:  
 As per CR539/2017, Report C 142/2017, Council pre-committed on Sept. 5th/17, \$654,172 in 2018, \$350,000 in 2019 and \$1,500,000 in 2021.

| Placeholder for the installation of new park lighting required for parkland and the replacement of existing lighting which is beyond the useful life. There are many lighting structures located in parks where poles have worn due to age and are in need of renovation to protect the lighting structure and ensure maximum safety to the public. This capital project will ensure asset management principles are maintained within the infrastructure in Parks. |                      |                                    |                  |                                     |  |               |             |             |                             |             |             |                |                |                |

| Regional parks benefit the entire community, surrounding communities, tourist and visitors to Windsor. Projects undertaken focus on park redevelopment and improving major park amenities. There are 33 regional parks in the park system that account for 42% of the total area of parkland. The regional parks include riverfront parks, sports parks, horticultural displays and heritage parks. |                      |                                    |                     | 2019: Jackson Park design, plan & construction documents \$150,000<br>2021: Jackson Park Sunken Garden washrooms & maintenance bldg. \$750,000; Mic Mac Park washrooms/concessions - \$200,000<br>2024: Jackson Park Gate restorations- \$500,000<br>2026+: Jackson Park Sunken Garden restorations \$300,000 (Phase 1); Mic Mac improvements, lighting, shade structure, bleacher restorations- \$500,000 |                                 |                             |             |             |             |             |             |                  |                   |           |

| Community parks vary in size and are designed to service a diverse population and provide opportunities for all types of recreation, social and cultural activities. Community parks have more amenities than neighbourhood parks and can include large sport fields, splash pads, community centres, large playground areas, sport courts, picnic shelters and other park amenities. Projects undertaken will focus on improving major park amenities. |                      |                                    |                  | 2019: Bridgeview Path Shelter Lights Park Redevelopment - \$500,000<br>2020: Washroom Facilities at Forest Glade Community Centre - \$500,000<br>2021: Splash Pad at Forest Glade Community Centre - \$250,000<br>2022: McDonald Park Improvements - \$250,000<br>2025: Lanspeary Park Improvements- \$500,000<br>2026+: Lanspeary Park Improvements- \$500,000 |  |             |             |                             |             |             |             |                  |                   |              |

|   |   |
|---|---|
| <b>Project Description</b>  | <b>Version Description</b>  |
| Neighbourhood parks are smaller in scale and are designed to compliment and contribute to the character of their neighbourhoods including more passive recreational amenities. Projects undertaken under neighbourhood parks will focus on complete redevelopment of the entire park. Typically, the City will focus on those parks that are deemed to be out of date, lack resources and do not attract users. Redevelopment improvements include, but are not limited to, improved landscaping, pathway development and demolition/renovation of outdated park amenities. There are 142 neighbourhood parks that consist of 158 hectares or 10% of the open space system. | 2019: Mitchell Park finish Improvements - \$300,000; Bruce Avenue Park Improvements - \$200,000<br>2020: Bruce Avenue Park Improvements - \$500,000; Mitchell Park Security Upgrades - \$10,000<br>2021: Bruce Avenue Park Improvements - \$250,000 |

| Developers under agreement in subdivision development provide 5% land for a park plus additional funds per acre to construct the park and provide amenities. The collected fees are deposited into Reserve Fund 151 - Land Acquisitions - Other than Highways. The future costs are related to Sandwich South Employment Lands which is expected to occur in 2021. |                      |                                  |                  | 2021: Sandwich South Employment Lands - \$300,000 |  |                      |                             |                  |             |             |             |             |              |              |

|  |                      |                                  |                  | Unknown   | New Parks have a significant impact on the Parks operations budget. Any new park development add to the grass cutting and the trail maintenance schedule. Trees will be added to these areas, which will require regular maintenance during the first 3 years, to ensure tree health. Where floral displays are prominent the Horticulture Operating Budget is significantly impacted. | 0                    | 0                           |                  |             |             |             |             |              |              |

| This capital program includes replacement and renovations of bridges, shelters, buildings and other park structures which may need replacement. Bridge and culvert inspection are carried out by Public Works to prioritize repairs and replacements. |   |                              |                     | 2019: Ojibway Boardwalk (Phase 1)- \$100,000<br>2020: Little River Corridor Bridges - \$100,000<br>2021: Mic Mac Picnic Shelter - \$100,000<br>2022: Ojibway Park Building (Phase 2)- \$168,000<br>2023: East End Yard Design - \$100,000<br>2024: Jackson Park Picnic Shelter - \$100,000<br>2025: Little River Corridor Bridges- \$100,000<br>2026+:East End Yard Renovations   |                |                |                |                  |                  |  |  |  |  |  |                |               |               |            |         |   |        |      |       |        |                 |   |      |        |        |   |      |        |        |   |      |                                   |        |   |      |        |        |   |  |  |  |  |         |         |         |         |         |         |         |           |           |              |                |                |                |                |                |                |                |                  |                  |                 |  |  |  |  |  |  |  |  |  |  |                                 |  |  |  |  |  |  |  |  |  |  |   |   |   |         |         |   |   |   |         |                                     |  |  |  |  |  |  |  |  |  |  |         |         |         |   |   |         |         |           |           |                            |  |  |  |  |  |  |  |  |  |  |   |   |   |   |   |   |   |   |   |              |                |                |                |                |                |                |                |                  |                  |

| Projects include new Civic Gateways and Open Space development projects at various locations across Windsor. City beautification includes any open space development project undertaken on City owned property. In 2009, CR301/2009 approved funding of \$2.5M for the Civic Gateways (PFO-004-09/7081902). Further beautification efforts adding to our gateway initiatives include Lauzon Parkway at E.C. Row and Wyandotte Street East Median Improvements. In 2020, the Lauzon Parkway medians from E.C. Row to Tecumseh Rd East will be improved. |                      |                                  |                  | 2022: Lauzon Parkway completion<br>2023: Huron Line, Giles and Walker Median work  |  |   |             |                             |             |             |             |             |              |                  |                   |

**Project Description**  
 Repairs are required to regularly maintain asphalt and granular base trails making them safe and thereby decreasing litigation and claims. There is a growing backlog of required trail repairs which are replaced as far as funding will allow. Repairs, resurfacing, bollards, curb maintenance, safety markings and signs are all potential upgrades. There are over 120 kms of trails in our system and ongoing refurbishment of sections of trails are necessary to maintain a safe and usable overall trail system.

The average life span of an asphalt trail is 15-20 years. Major trails such as the Ganatchio Trail south, Grande Marais trail, Southwood Lakes and inter park trails are approaching the end of their lifecycle. Parks currently maintains over 120km of trails in the system. The 2017 Parks Master Plan identified trails to be one of the most important recreational amenities in parks.

**Version Description**  
 Asset management plan is being developed which will incorporate conditional assessment reports which will identify the trails in need of replacement. Priority will be given to those areas based on inspection results and listing of trails will be detailed each year based upon funding available.

| As per the approved 2017 enhanced Capital Budget 5-year plan. Project to repave the tennis courts and install new nets and painting. |                      |                                    |                  | CR431/2018 allocated \$45,000 from project 7102003 to cover the additional cost. Project 7102003 is funded from the Pumping Station pollution control reserve which is 100% Sewer Surcharge funding, as such this funding source cannot be used. Administration has allocated \$45,000 in 2019 to correct this and ensure the project has an appropriate funding source identified for the work. CR431/2018 will be rescinded pending approval of this project during Capital Budget deliberations and funding returned back to 7102003. |             |             |             |             |                             |             |             |              |              |  |  |  |  |  |  |  |  |  |

| Parking lots are an ongoing program that requires continuous upgrades to meet the needs of users and the standards set out by the City of Windsor By-laws. The parks and recreation system has over 80 parking lots of various sizes and conditions. The existing parking lot surfaces range from simple gravel lots to curbed paved and drained lots built to the current city standards. On average the one parking lot per year is renovated or rebuilt. A parking lot condition report will be carried out in 2019 in conjunction with the asset management plan. |                      |                                    |                  | 2019: Jackson Park parking lot - \$500,000<br><br>2020: Jackson Park parking lot - \$500,000<br>2021: Optimist Memorial Park parking lot - \$500,000<br>2022: Optimist Memorial Park parking lot - \$500,000<br><br>Conditional assessment reports will be developed which will allow for parking lot replacements to be identified and prioritized.   |  |             |             |             |                             |             |             |                  |                   |  |

| The Parks Master Plan was last updated in 1989. This program will create a new document that defines and shapes our parks system for the foreseeable future. This program will create a living document aligned with the City's five year capital budget and will be updated every 5 years with attainable goals. This master plan will be phased in and adjusted periodically through internal strategic reviews. |                      |                                  |                  | Five-year update of the Parks Master Plan. |   |             |             |                             |             |             |             |                  |                   |  |

| <b>Project Description</b>  |                      |                                    |                     | <b>Version Description</b>  |   |             |                             |             |             |             |             |                  |                   |  |  |  |  |  |  |  |  |
| There are several parks with equipment in disrepair and they require annual maintenance. The removal of non-compliant equipment to clear areas will mitigate possible future injuries and claims. |                      |                                    |                     | The removals will be prioritized each year by the annual Playground Equipment Audit. A council report will be provided identifying playgrounds which may be removed and not replaced based upon administrative recommendations. |   |             |                             |             |             |             |             |                  |                   |  |  |  |  |  |  |  |  |

| Through the use of a wet blade, herbicide is applied when cutting the vegetation. The primary difference between the use of a wet blade and other herbicide-applying and mowing products is the precision application. The herbicide is not sprayed into the atmosphere, the surroundings or the ground. The herbicide is applied precisely at the time of cut for maximum effectiveness.<br><br>7181033 |                      |                                  | PRE-COMMITMENT:<br>\$266,280 in 2022 per B38/2018. |                             |             |             |             |             |                             |             |             |              |              |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | Allocated funds will be used towards projection and sound (\$133,780), website and mobile application redesign (\$41,220), ticketing system (\$25,000), renovations, furnishings, supplies, signage for permanent office and box office space (\$50,000). In this particular case, full placeholder costs are being requested to be used in 2018 to ensure that the festival receive the full \$250,000 immediately. |                                 |             |             |             |                             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                    |                     | The Master Plan will provide direction on recreation facility needs for the City of Windsor for the next 20 years. Furthermore, the Recreation Master Plan will guide Administration's recommendations for City Council consideration regarding future facility needs, programming, budgeting, user fees and effective ways to deliver services to City residents. |             |             |                             |             |             |             |             |              |              |  |

| Project Description  | Version Description  |
|--|--|
| <p>On March 4, 2013 Council approved B3/2013 "That the report from the Executive Director of Recreation and Culture regarding the provision of lifeguards at Sandpoint Beach BE RECEIVED and further that the reinstatement of funds for the lifeguards in the amount of \$60,272 in the 2013 operating budget as part of the base budget BE APPROVED, and further, that the option of moving the beach further east on the property BE REFERRED to future Capital Budget deliberations".</p> <p>Included in the March 4, 2013 report was information on the audit of Sandpoint Beach by the Lifesaving Society. Regarding the location of the beach, the Lifesaving Society audit included the following: Primary Recommendation Number 6 – Restrict access to the western edge of the supervised beach. The recommendation states in part, "Beach and water access to the western edge of the beach should be restricted. The City may also want to consider closing this beach in favour of moving it further eastwards. At a minimum, beach patrons should be restricted from accessing this area of the beach by installing additional fencing which will reduce the designated beach area." Amenities currently at the beach include a play ground, sand volleyball court, picnic tables and a kayak/wind surfing launch area.</p> <p>The redevelopment would move Sandpoint Beach further east on the property. With this option, the existing beach at the western location would be renovated and converted to land use only, including shoreline improvements that would serve to discourage access to the water in this section. The public beach access would be moved further east and would be smaller in size than the current beach. The opportunity exists at Sandpoint Beach to create a master plan for future development that will take advantage of this valuable asset on the waterfront. Additional engineering consultation would be required from a number of regulatory bodies for a full scope. For example, a new groin may be required depending on the currents to trap sand in order to facilitate retention of sand at the new location. It may be possible to phase this project, with the first phase providing functional amenities, and additional phases providing amenities to enhance the use of the park.</p> | <p>The redevelopment of the property and has the highest capital budget impact. Administration has completed a preliminary capital cost estimate. The estimate provides detail on various components for the project including shoreline improvements, infrastructure requirements, landscape requirements and other amenities. Consulting with the regulatory bodies for further detailed estimates will be required. It is estimated that a minimum of \$1.2 million would be required. This includes the shoreline improvements, a portion of the Landscaping/Site Furnishings component and the walkways component. Any work identified through engineering consultants would be in addition to this estimate. Administration recognizes that funds are not available for a project of this magnitude at this time, however, this project could be considered for a future project should grants become available from senior levels of government. Traditionally, shoreline protection has been cost shared with senior levels of government. The operating budget impact incorporates the reinstatement of the costs for the lifeguarding component of the operation. Depending on additional amenities desired for this space (i.e. sand volleyball courts, accessible playground, splash pad) additional operating budget requirements would be identified.</p> <p>In February 2018, CR 83/2018 was approved requesting an estimate from administration to conduct a preliminary study. The requested \$250,000 is for phase 1 of the capital project, to conduct the necessary environmental assessment in order to become aware of potential long-term options for the site. Based on the results of this assessment, administration will be much better equipped to provide the requirements for future funding and planning needed for a long-term solution.</p> |

However, if the reconfiguration results in an expanded size, and if the amenities attract additional attendance, there is a potential for the requirement to increase the number of lifeguards up to an additional 3 part time guards. This would result in an additional cost in wages of approximately \$23,300. |      |      |                             |      |         |      |           | 0                | 0                 |

**Project Description**  
 Upgrades/refurbishments to municipal pools are required to ensure that they remain functional and do not pose a hazard. The infrastructure we currently have must be maintained in order to ensure continued high customer service standards. Prioritizing pool improvements to ensure they remain functional is the objective of this capital request. The possibility of procuring external subsidies with various levels of government bodies will be explored.

**Version Description**

**Version Comments**  
 Should Council not approve operating budget issue #2019-0156 capital funds are required in the amount of \$1,470,000 over 2 years for the dectron, humidification system, mezzanine upgrades, hot/cold water balancing, pool drain and tiles.  
  
 As per CR276/2018, Council approved a pre-commitment of \$967,000 in 2022 for the Universal and Accessible Pool and Change Room Facility at Lanspeary Park.

# Project Version Summary

**Project #** REC-004-07      **Service Area** Office of Parks, Rec., Culture & Facilities  
**Budget Year** 2019      **Department** Recreation & Culture  
**Asset Type** Unassigned      **Division** Community Centres & Programming  
  
**Title** Recreation Facility Refurbishment Program  
**Budget Status** Council Approved Budget  
**Major Category** Parks & Recreation  
**Wards** City Wide  
**Version Name** Main (Active)

**Project Description**  
 Ongoing upgrades to facilities and services available in municipal recreation areas. A recent review indicates that the median age of our community centres is approximately 37 years, with 63.64% of all of our community centres being 25+ years old.
