| <b>Project Description</b>  | <b>Version Description</b>  |
| <p>The Corporation has undertaken an internal Corporate Space Needs study to identify all non-campus “downtown” space utilized (owned or leased); gather information about the service(s) provided in these spaces and identify the current and future space needs of these non-campus spaces. The aim of the project was to ensure that we are making the best use of space and locating staff in the best possible places. Movement of staff in several areas of the Corporation has been identified.</p> <p>These movements will 1) improve the current and future use of Corporate space; and 2) address identified adjacencies and 3) create synergistic mini-campus. The funds will be used to renovate the spaces and to facilitate the moves. (Note: Project ENG-005-016 2437 “Howard Ave. Improvements Placeholder” addresses the space needs requirements specific to that location.)</p> | <p>These funds of \$500,000 are sought as a placeholder until a more detailed report is presented to Council.</p> |

|   |                      |                                  |                  | Unknown  | Based on the average 2014-2015 rental income from WFCU and John Atkinson Memorial Centre Recreation and Culture is able to forecast a net increase in operating budget income of \$12,350. The \$12,350 is derived from an increase in net revenue of \$44,250 in addition to an increase of \$18,700 in Hydro, \$9,300 in Gas and \$3,900 in water. Caretaking and routine maintenance for the addition are expected to be managed within the current Facilities Operations operating budget. The effective date would take place upon completion of construction and there is no FTE impact. Projected expenses may increase depending on year of construction. |             |             |             |                             |             |             |              | 0                | 0                 |  |  |  |  |  |  |

| As part of the Federal Government's agreement to transfer the Paul Martin building on Ouellette Avenue over to the City of Windsor, negotiations continue with the federal government to provide for a contribution to go along with the announced City and provincial funding required to convert the building to the new Law School in the downtown core. The expenditure of \$15.0M is to come from the 2019 (\$7.5M) and 2020 (\$7.5M) unallocated debt reduction levy. |                      |                                  |                  |                                  |                                 |             |             |             |                             |             |             |              |                  |                   |

### Project Description

By virtue of the Municipal Act, the City is legislatively required to prepare audited financial statements on the basis of Public Sector Accounting Board (PSAB) standards. PSAB has introduced a new standard 3260 Liability for Contaminated Sites which the City is required to comply with in our 2015 consolidated financial statements (to be prepared in early 2016).

For contaminated sites no longer in use or for which the City has assumed responsibility, we will be required to estimate:

- Costs directly attributable to remediation activities
- Post-remediation operation, maintenance and monitoring that are an integral part of the remediation strategy for a contaminated site
- The estimate of assets acquired, or to be acquired, as part of remediation activities to the extent those assets have no alternative use

We have already hosted a workshop with senior management across the City and have identified a number of potentially in-scope sites. In order to obtain verifiable data required to create an auditable estimate of the City's liability for contaminated sites, we will need to incur the following expenses:

- Internal project staff support
- Technical accounting consulting
- Consultant Site Assessments of potentially significant sites
- Additional audit costs

While the project is intended to satisfy the requirements of PSAB 3260 in the most cost effective manner possible, neither PSAB 3260 or this project provides any funding plan or remediation plan to actually manage or remediate any contaminated sites. Notwithstanding the above, any site assessments completed through this project may provide useful information as the City makes decisions to manage or remediate these sites.

| As per Council's previous directions relative to ensuring long term financial stability, and to ensure that the City's cash balances are sufficient to self finance capital projects without the need to resort to high cost of external borrowing, funding is being allocated to replenish and bolster reserves. These allocations are also meant to provide liquidity that could be accessed to fund unfunded or unexpected costs such as settlements of significant legal claims or significant retroactive payments relating to major property tax appeals. |                            |                                    |                  |  |  |             |             |                             |             |             |             |             |              |              |                |             |           |            |         |                            |   |   |

| <b>Project Description</b>  | <b>Version Description</b>  |
| Administration will develop a sub-metering project at two strategic locations that represent two of the City's main energy consumers - Lou Romano and Windsor International Aquatic and Training Centre (WIATC).<br>Sub-metering is the monitoring of the electrical, gas, water, steam or other commodities' consumption by individual equipment, processes or systems in a building. Sub-metering can be used to measure energy consumption of HVAC, lighting, refrigeration, compressors, pumps, etc. In addition to the main meter used by utilities to determine overall building consumption, sub-metering utilizes individual meters that allow building and facility managers to have real-time visibility into the energy use and performance of the equipment, creating opportunities for energy and capital savings.<br>Traditional utility bill analysis uses information that is up to 45 days after usage and is too aggregated (about 30 days). Sub-metering addresses this information gap providing real-time granular visibility of energy consumption, therefore can be utilized to optimize operations and save energy. | Sub-metering has the potential to help saving approximately 2% the annual energy consumption that translates to \$60,000 in savings. Approximate payback of the project is less than 3 years.<br>Benefits include:<br>- Identification of unnecessary equipment running at night, off shift or during weekends.<br>- Ability to transmit information back to operators and facility managers the same day and provide operators with feedback the next day about implemented changes.<br>- Comparison and benchmarking of usage across similar facilities and over time.<br>- Detection of utility bill errors by comparing sub-meter usage with actual utility bill.<br>- Better management of electricity usage when the facility faces demand limits or peak usage pricing.<br><br>The OPA (Ontario Power Authority) provides incentives for these type of projects in the amount of \$20,000. |

### Project Description

With the expiration of the Ontario's Small Feed-in Tariff (FIT) program which pays renewable electricity producers to export power to the provincial grid, Energy Initiatives is exploring alternative agreements to utilize rooftop solar generation at Corporate facilities for electricity cost savings and greenhouse gas emission reduction.

"Net-metering" is an agreement with the local distribution company (EnWin Utilities Ltd.) and Ontario's Independent Electricity System Operator (IESO) to utilize the renewable power generated at a facility on-site. Electricity production in excess of that utilized by the building is delivered to the local utility grid and credited to offset future electricity costs. Because Net-metering allows for the integration of renewable energy generation and energy storage, it is a suitable arrangement for a photovoltaic solar and battery storage scheme which sees one or more properties supported by an incorporated power generation system.

Ten sites for net-metered solar generation have been identified to produce and utilize electricity on-site for annual energy cost savings. These sites represent 1.5 MW of installed power and cost savings when fully implemented of approximately \$250,000 annually. Administration is pursuing capital funding opportunities through IESO's saveONenergy incentive programs to improve the return on investment for this project.

Administration is recommending a phased in approach over 5 years relative to the installation of PV systems at various sites.

| <b>Project Description</b>   |                      |                                    |                  | <b>Version Description</b>  |                                 |             |             |             |                             |             |             |             |              |              |
| Project funding recommended to address capital project inflationary pressures. |                      |                                    |                  | This funding will assist with addressing grant matching funding requirements for grants which do not have enough funding to meet the matching requirements. This will also assist in expediting the grant approval process as the DOA 3.25 requirements for approval of grants could be met confirming municipal funding is in place. The project will also assist to mitigate against tender pricing increases, after exhausting all other options to mitigate any variance. Use of the funds for grants will be reported to City Council through the annual DOA report and use of the funds for mitigating inflationary pressures will be reported through the semi-annual Capital Variance report. |                                 |             |             |             |                             |             |             |             |              |              |

| <p>This project will entail converting, where applicable, all fluorescent lights, metal halide, and other lighting technology to LED lighting at all corporate facilities. The project will be implemented over a 3 year period and will include all city operated offices and facilities.</p> <p>The efficiency and current cost of LED lights make them a viable solution to replacing the traditional lights. The electricity savings could be from 50% up to 90% relative to other types of lamps. They are even more efficient than the advanced T8 and T5 linear fluorescent lamps. Furthermore, LED lights last more than 75,000 hours compared to 1,000 hours for incandescent lamps, 10,000 for compact fluorescent lamps, and 30,000 hours for linear fluorescent lamps.</p> |                      |   |                  | <p>A conservative savings projection of 12% can be attributed to LED conversion. The estimation is based on a conversion of approximately 50,000 lamps in City facilities and buildings. With prices that range from \$10-\$50 per lamp / fixture, the cost of LED conversion, including labour, is around \$1,100,000.</p> <p>Annual savings will be approximately \$225,000 and the payback of the project is about 5 years.</p> <p>The project will be implemented in stages over a three-year timeframe, starting with incandescent, sodium, and metal halide lights.</p> |  |  |             |             |                             |             |             |             |                  |                   |

| <b>Project Description</b>   |                      |                                    | <b>Version Description</b>   |   |                                 |             |                             |             |             |             |             |                  |                   |
| <p>Arenas represent some of the Corporation's largest consumers of electricity. Currently administration is undertaking a \$40,000 detailed engineering study at Forest Glade Arena and South Windsor Arena, totally funded by the Ontario Power Authority.</p> <p>The study will focus primarily on energy efficiency upgrades for the refrigeration systems serving the arena ice pads. The recommendations resulting from the detailed engineering study with associated costs will be reported to Council for approval and implementation. It is estimated that these costs will be in the range of \$200,000.</p> |                      |                                    |  |   |                                 |             |                             |             |             |             |             |                  |                   |

| <b>Project Description</b>  |  |                                  |                  | <b>Version Description</b>  |  |             |             |             |                             |             |             |                  |                   |       |
| This project will consist of installing timers and occupancy/photo sensors in all applicable locations in city buildings and facilities. By turning lights off when spaces are unoccupied, occupancy sensors and timers compliment load reductions accomplished by lamp retrofits, giving building operators additional opportunities to improve energy savings without compromising lighting service. With typical estimated energy savings potential from 25% to more than 50% of lighting energy, occupancy sensors have frequently been promoted as one of the most cost effective technologies available for retrofitting. The magnitude of the savings will depend upon the time delay setting, and when the peak demand occurs, which may vary among building types. |  |                                  |                  |   |  |             |             |             |                             |             |             |                  |                   |       |

| <b>Project Description</b>   |                      |                                  |                  | <b>Version Description</b>          |             |             |             |             |                             |             |             |              |              |  |
| <p>Geothermal technology utilizes the earth's inherent temperature to deliver heating and cooling to a building. A fluid is circulated through buried piping to cool a facility by extracting and depositing heat during warm months, and alternatively drawing heat from the earth to provide warmth during colder months. By replacing aged electrical and gas-fired systems with this ground source heat pump, both recurring cost savings and greenhouse gas emissions reductions are possible.</p> <p>Geothermal systems are being assessed for the Corporation's heritage sites including Willistead Manor, Mackenzie Hall Cultural Centre, Capitol Theatre and South Windsor Arena; projects which can deliver significant operational savings to the City of Windsor. Energy Initiatives has applied for funding through FCM to execute a detailed engineering study at each property in order to determine its capability of utilizing geothermal or an appropriate high efficiency heating and cooling system.</p> |                      |                                  |                  |                                     |             |             |             |             |                             |             |             |              |              |  |

| The City of Windsor is participating in the Canada-wide "Town Hall Challenge" campaign. This program compiles good practice design, retrofit and operational metrics for lighting, equipment, HVAC, and other building systems to create a model building operating at 20 kWh/ft2. Participating in the campaign exhibits a commitment to achieve the target of 20 kWh/ft2 by 2015. The City of Windsor currently ranks fifth among reporting "Town Halls". |                      |                                  |                                  |  |                  |                   |                             |             |             |             |             |              |              |

# Project Version Summary

**Project #** FIN-004-18      **Service Area** Office of the CFO  
**Budget Year** 2019      **Department** Finance  
**Asset Type** Unassigned      **Division** Asset Planning  
  
**Title** Enterprise Wide Energy Management System Software  
**Budget Status** Council Approved Budget  
**Major Category** Corporate Property Infrastructure  
**Wards**  
**Version Name** Main (Active)

### Project Description

Centralized and common support for the development and installation of an energy management system throughout the City of Windsor's many properties and buildings brings an enhanced means of addressing shared issues. This includes joining and leveraging similar projects for overall capital cost savings, and bettering communication and transparency concerning energy asset management throughout the Corporation.

Because energy data is currently received at regular billing intervals, heightened consumption is ordinarily observed between thirty and forty-five days following an event. Daily monitoring enabled by an integrated monitoring system can prevent the persistence of increased consumption and cost by alerting Energy Initiatives to respond to anomalies in individual equipment use and a facility's power quality, which can prolong the life of motors, pumps, compressors, and other systems throughout the Corporation.

For power generation and energy infrastructure projects, improved technical collaboration among the City of Windsor and stakeholders in Windsor's energy supply (EnWin Utilities, District Energy Windsor, and Union Gas) are capable of delivering added value by marrying individual efforts for more impactful and cost-effective projects. Facilitating this cooperation and the development of an integrated energy management system requires a dedicated individual to liaise between the City of Windsor's Asset Planning, Facilities, and Information Technology (I.T.) departments toward establishing its fundamental elements of hardware, software, and infrastructure including distributed sub-metering and building automation systems. It further involves coordinating process changes both internally and at Windsor's utilities for the real-time collection and transmission of electricity, natural gas, and district energy consumption data.

| <p>The City is completing an Engineering Study at Little River Plant as part of the 2014 Capital Budget energy efficiency project that will identify energy savings opportunities. The project identified below will be developed in tandem with the 2014 study.</p> <p>The preliminary findings show that elimination of the dewatered sludge pumps and replacement with augers will save approximately 400,000 kWh annually.</p> |                      |                                  |                  |                                     |  |             |             |             |                             |             |             |                  |                   |  |

| <b>Project Description</b>   |                      |                                  |                  | <b>Version Description</b>                     |  |             |             |             |                             |             |             |             |                  |                   |
| <p>The NO<sub>x</sub> / CO detection system is used to monitor the levels of nitrogen oxide and carbon monoxide in the building. Nitrogen oxide and carbon monoxide are toxic gases created when diesel engines and natural gas fired equipment is running. A NO<sub>x</sub> / CO detection system exists at Transit Windsor Bus Storage area however this system is not operational. The exhaust fans operate continuously instead of being controlled by the detection system.</p> <p>The outdated and inoperative system will be replaced with a new system, consisting of 12 NOx sensors, 12 CO sensors and a controller. These sensors will operate in conjunction with the ventilation systems in the Bus Storage area, resulting in reduced runtimes for the systems when NOx and CO levels are within acceptable limits.</p> |                      |                                  |                  | Approximate payback of the project is 7 years. |  |             |             |             |                             |             |             |             |                  |                   |

| Huron Lodge Long Term Care facility consumed 3.3 million kWh and 565,000 cubic meters of Natural Gas in 2013 for a total annual expenditure of \$530,000. The energy intensity of 52.3 kWh/m3 is high compared to similar facilities in Ontario. Recommissioning efforts will be complemented by the introduction of LED lighting and sub-metering. |                      |                                  |                  | Approximate payback of the project is 2-4 years.<br><br>The primary focus of the re-commissioning effort is the principal electric energy consuming equipment in the facility, typically consisting of the systems and equipment below:<br>- Chiller Plant & Auxiliaries<br>- Cooling Tower<br>- Air Distribution System<br>- Air Conditioning System<br>- Control System  |             |  |             |             |                             |             |             |              |                  |   |                   |   |   |   |   |        |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |       |       |   |        |        |   |        |        |   |   |   |   |   |   |   |   |   |   |   |   |        |        |

### Project Description

The first stage of good Disaster Recovery Planning is Prevention. In other words, taking steps to prevent significant outages in the IT Infrastructure. For the last several years we have strived to improve the availability of our critical systems by adding redundancy and backups to various IT infrastructure components. During this time the Corporation has also become more dependent on technology, which is consistent with other sectors.

There does exist capital funding for some of this work in project ITC-006-07 and the focus has been on being able provide a reliable and highly available computing facility and a place hold a backup of our data off site in the event of a disaster. Significant effort has also been made on improving the quality and consistency of our backup environment, which is critical to stage 2 of the process, which is the ability to restore the environment if we do lose it for some reason.

Business Continuity Planning is a larger goal of ensuring that plans are in place to keep the Corporation's mission critical functions operating before, during and after a major catastrophe. This would be a much broader corporate initiative that would require significant resources both internal and external to not only develop but also ongoing resource dedication and operating expenditure to test and maintain.

The amount of resources dedicated to this type of planning should be proportionate to the impact that an outage would have on the business. For example, in a large financial or manufacturing organization where even a small amount of downtime will result in significant financial loss or loss of faith by investors then there should be a corresponding significant investment in ensuring the business has very minimal downtime and also has plans in place on how to continue to operate during these times. For organizations that are not at significant risk when systems fail then a more practical approach is reasonable since the increased resources required to develop and maintain Business Continuity Plans does not provide the same value.

### Project Comments/Reference

### Version Description

The Corporation of the City of Windsor will need to decide where in this spectrum we reside and that will help to determine what level of plans are appropriate and provide the most value.

The Corporate Security Policy and Methodology that was approved by Council is one of the tools we have to help identify critical areas where more security and availability is required and where plans should be in place in the event of an outage. Funding is also planned in the Capital Budget under project ITC-005-07 to address these areas as they are identified.

It should be noted, the Disaster Recovery and/or the Security project will NOT result in a full Business Continuity Plan. If the Corporation feels that additional investment should be made to also develop a complete business continuity plan then this project will need to be approved and funded.

| Under the umbrella of e-Government there are several pillars. In addition to Modernizing our services, which the MyWindsor project is addressing, there is also effort to continually improve transparency, community engagement and Open Government. This requires investment in tools and technology to improve the citizen experience online providing more timely access to information and opportunities to engage. As the region moves forward with a variety of efforts to redefine our economy, working smarter, together with our Residents and business is essential. The Smart Community initiative is one of the key ways that we can accomplish this. |                      |                                    |                  | This funding will be used to fund e-Government projects that expand the opportunities available to engage with the public and improve access to public information through open data.<br><br>2019-2023: Citizen self-service initiatives; Improved open data and transparency initiatives. |  |                            |                |                             |                |                |                |                  |                |                   |

| <p>Under the e-Government umbrella and modernizing government also includes moving City Services closer to the Resident and business and making them more mobile. Funding request is to facilitate implementation of organizational mobility. Untethering staff from their desks results in productivity and customer service improvements. The corporation has been making gains in these areas by incrementally growing the mobile workforce.</p> <p>Two factors are driving this future investment requirement:</p> <p>1) The current mobile workforce initiatives are ad hoc. Once a critical mass is reached, an investment will be required for a more efficient and effective holistic solution.</p> <p>2) Technology changes in the mobile space are rapid and significant. Solutions implemented today will be sufficient, but this mobile space is changing so quickly it is almost certain these solutions will become antiquated in the coming years.</p> |                      |                                    |                  | <p>Costs may include but are not limited to: mobile devices, software, customization, interface development, infrastructure, security. This project includes all consumer costs to move work activities into the field.</p> |   |             |                |                             |                |             |             |                  |                   |  |

| This project is working to build a more competitive market throughout southwestern Ontario so that residents and businesses have more affordable Internet services available to them. Currently this region has the highest Broadband rates in the country and even in Windsor there are areas that are underserved. The SWIFT Network which is a forward-looking, financially sustainable plan to help the region connect, compete and keep pace in a digital world by building a holistic, ultra high-speed fibre optic network across the region. |                      |                                    | These funds will be used to fund Windsor's commitment to this project for 2019, 2020 and 2021.                                |                     |                                |             |             |                             |             |             |             |              |              |

**Project Description**

The growing demand for e-Government or digital services for residents, visitors and businesses, requires an ongoing investment to continually modernize our services and service delivery mechanisms.

For visitors of the City's website, future initiatives will allow for enhanced delivery of municipal services. Continual enhancements to functionality will be required to meet the continual and evolving needs.

This is evident with the introduction of the MyWindsor Self Service online automation project that will provide citizens and businesses the ability, with their own secured single "MyWindsor" account, to (among other things);

- view their own information such as property tax;
- place a request for a product or service like applying for permits or licenses;
- completing online registrations;
- pay for these services

**Version Description**

The demand for public facing websites and web technology to deliver e-Government services to Residents, visitors and businesses in an effort to modernize our services and as a primary service channel is growing significantly. The funds requested in 2019 and 2022 will be used to upgrade licenses to keep the technology current. These licenses are necessary to continue increasing the efficiency and productivity of Citizens and employees.

| Project Description  | Version Description   |
|--|---|
| <p>To implement the following technology at Windsor Fire and Rescue Services (WFRS):</p> <ul style="list-style-type: none"> <li>Phase 1: A “full feature” fire records management solution (fire RMS) that will improve data accessibility and reliability for emergency responders and administrators</li> <li>Phase 2: An upgraded computer-aided dispatch (CAD) solution and other related programs to modernize the technology at WFRS</li> </ul> <p>WFRS has fallen significantly behind all other major Canadian fire agencies in the use of IT for service improvement and enhancement, specifically for creating fire RMS data, making that information available 24/7 on mobile devices, and accessing corporate records. In addition to supplementing operational activities, the above new technologies are needed to provide management decision support, allow for information exchange, and expedite decision-making within WFRS and with senior City management.</p> <p>The department’s strategic focus is to move from ‘just keeping the lights on’ to providing incremental improvements toward achieving excellence and realizing its business goals. The acquisition of a full feature fire RMS and an upgraded CAD will help to realize that vision.</p> <p>Phase 1 – Fire RMS:<br/>A fire RMS can save lives. It does this by compiling information quickly from unrelated programs to facilitate decision-making during emergencies. Additionally, its sophisticated analytics allow administrators to design better plans for protecting the community.</p> <p>Fire RMSs are used throughout the industry to address the specialized data capture and reporting needs of emergency response agencies. The technology’s modular design includes the ability to track incidents, inspections, personnel, shift assignments, training, and asset inventories/maintenance. For departments that already have computer programs to manage this information, a fire RMS can act as a layer above those systems, populating them with data while providing a simplified user experience and a similar look-and-feel across the various modules.</p> <p>Additionally, a fire RMS unifies records pertaining to people, properties, and emergency vehicles, and this allows for easier and more accurate report generation.</p> <p>Phase 2 – CAD:<br/>A CAD system is an essential tool for emergency services, and the effective use of one can shorten response times and result in reduced damage to health and property. This project is for improvement and modernization of the dispatch function and all related processes associated with it.</p> | <p>WFRS requires the full functionality of a Fire RMS as well as modernized dispatch processes and associated technology. Due to the size of this project, the intent is to implement it in phases.</p> <ul style="list-style-type: none"> <li>Phase 1 would consist of the fire RMS and would be implemented in two stages. Stage 1 would focus on the needs of Personnel, Property, Incidents, Training and Inspections. Stage 2 would address the remaining modules of a fire RMS. . Please note: There was some urgency to act on implementing phase 1 in 2018, thus Council approved (#C126/2018) on July 23, 2018 which approved a pre-commitment of funding from year 2021 in the amount of \$784,960 to be available for use beginning in 2018 inclusive of applicable financing costs.</li> <li>Phase 2 would begin in 2026+ with the modernization of dispatch and all related processes and technology.</li> </ul> |
| <p><b>Project Comments/Reference</b></p> <p>7183016</p>  | <p><b>Version Comments</b></p> <p>PRE-COMMITMENT:<br/>CR396/2018 , Report # C 126/2018, approved a pre-commitment of \$784,960 in 2021.</p>   |

| Video display and improved access at locations that have employees without computer access and in meeting rooms where collaboration can significantly improve efficiency and service levels. |                            |                                  |                  | <p>This project was originally scoped to deliver stand-alone video displays for disseminating information to staff without computers. It has been successfully deployed at Solid Waste, Crawford Yard, Parks Yard, Huron Lodge (2 units), Lou Romano Water Reclamation Plant, and all Fire Stations. These are stand-alone systems for which area managers are responsible for the content. Additional sites will be added as they are identified.</p> <p>The trend for content access demand within the corporate community continues to increase, with the technology required to deliver this medium changing at an equal pace. Video messaging and training is easily downloadable or streamed directly to computers. Access to work related and personal content at remote sites continues to expand as evidenced with the introduction of MyInfo and Workforce Management applications. Putting in place the technology and network infrastructure required to support the anticipated future demand for stand-alone and corporate content access is a critical component in delivering the medium.</p> |             |             |             |                             |             |             |             |              |              |  |                |             |           |            |         |                            |   |   |

| Project Description   | Version Description   |
|---|---|
| <p>Desktop computers and most servers at the City of Windsor require a number of Microsoft licenses to deploy. Desktops run on Microsoft Windows and utilize the Microsoft Office suite of products. Most servers run Microsoft Windows for Servers and many databases are Microsoft SQL. Our email system utilizes Microsoft Exchange and our Web environment is built on the Microsoft SharePoint platform. The Microsoft Corporation licensing fees required to run these products are very expensive.</p> <p>Microsoft refreshes / updates their software with new versions every few years and currently discontinue support for older versions after 10 years. We currently budget for new software versions on a five-year cycle but in most cases have been able to extend their use beyond 5 years. In 2018 the City refreshed most of our Microsoft licenses, upgrading to the current version of software.</p> <p>While implementing these perpetual Microsoft licences will allow us to function for the next 5 years, we do need to begin planning for the future of Microsoft products in our environment. This includes considering future deployment and support processes, as well as, the costing impact to the City.</p> <p>Gartner, world's leading research and advisory company, is advising that organizations budget to subscribe to Office 365 ProPlus (or an Office 365 bundle that includes it) by October 2020 or rebuy traditional licences every five years (or less, if available) if you have plans to use Exchange Online or SharePoint Online with traditional editions of Outlook and other Office client software.</p> <p>As noted above, this may be the last time we can purchase perpetual Microsoft licenses, as Microsoft are changing their software licensing model to subscription-based licensing and moving a lot of their services into the cloud.</p> <p>Microsoft plans on releasing updates to all its applications and operating systems on a 6-month basis with support diminished to 18 months from the time of release. Moving to a subscription-based model is costlier than deploying perpetual licences and utilizing those licences until they are no longer supported.</p> <p>Currently, we have been financing the Microsoft licenses through a portion of the annual \$480 PC Maintenance and Support Reserve fees of \$40 / month. Each user account on our system requires Microsoft licensing. Almost all user accounts utilize a City desktop or laptop and a portion of this \$40 / month fee has covered the Microsoft licenses.</p> <p>The Work Force Windsor project will add approximately 1,500 new user accounts that are not directly associated with a City desktop or laptop and that are not part of the annual PC Maintenance and Support Reserve program which covers the cost of Microsoft licensing. The Work Force Windsor project start-up costs and the excess in the PC Maintenance and Support Reserve (by our past practise of extending software beyond five years) was able to cover the initial Microsoft licenses purchased in 2018.</p> <p>With the increased cost of Microsoft licenses and the extra licenses needed for the new Work Force Windsor user accounts, the PC Maintenance and Support Reserve will be unable to fund the necessary Microsoft licensing after five years when the next license purchase is required. Computer software is critical to the operation of the City of Windsor, and in most cases licensing fees are unavoidable and expensive.</p> | <p>The funds requested in 2024 and beyond will be used to cover the shortfall in the PC Maintenance and Support Reserve account to procure future Microsoft licenses.</p> |

### Project Description

The AMANDA Enterprise System (AMANDA) is a corporate-wide application that the City of Windsor (City) uses to help manage and support several City services. In AMANDA, the Tax module is currently used by the Finance department to manage the issuance of property tax bills and the collection of revenue. As the main source of revenue for the City, approximately \$408M is collected through this system.

The software vendor, CSDC Systems, has announced the end-of-life period for the current Tax module within AMANDA. CSDC made the decision to remove the Tax module from their list of software product offerings with immediate effect and with no application upgrades available to the existing version. CSDC has estimated that support for the existing version of the Tax module will end in approximately 3 years. Other modules in AMANDA such as Permitting, Licensing and Compliance, etc. will not be impacted.

The City must procure and implement a new Tax System from another software vendor to replace the current Tax module in AMANDA. It is critical that this new system be implemented prior to support ending with CSDC to ensure the timely and accurate billing of municipal property taxes along with collection of revenue. Given the impact to revenue, this presents a significant risk to the City as property tax revenue funds the majority of our City services.

The \$408M worth of yearly revenue collected through the AMANDA Tax Module includes property tax revenue and other tax revenue administered by the Finance department for the English Separate School Boards, English Public School Board, French Separate School Board, French Public School Board, Enwin Utilities and the Provincial Offenses Act Office.

Delivery of a new Tax System will occur in 3 major phases:

Phase 1: Tax System Discovery and Procurement

Phase 2: Implementation of a New Tax System

Phase 3: Deployment of a New Tax System

The estimated cost of this project of \$2.5M is based on the previous implementation of the AMANDA Tax module plus anticipated resource costs.

### Project Comments/Reference

### Version Description

Delivery of a new Tax System will occur in 3 major phases and will require capital funding for the software implementation costs, customization and data conversion costs, maintenance and support fees along with additional resources for the following:

Phase 1 (Q4 2018- Q4 2019): Tax System Discovery and Procurement

- Gathering Requirements, RFP Process, Vendor Selection, Contract Negotiation, etc.
- 20% of cost

Phase 2 (Q1 2020 – Q2 2021): Implementation of a New Tax System

- Software, Licensing, Data Conversion, Customization, Tax Reports & Documentation, Testing
- 70% of cost

Phase 3 (Q4 2021): Deployment of a New Tax System

- Training, Deploy new Tax System, Provide Support After Go-Live
- 10% of cost

### Version Comments

The replacement of the Tax System is a critical project that must be completed because the current system will no longer be offered. This creates two significant enterprise risks to the City that technology might fail to meet our needs in the delivery of services and in the portrayal of the City regarding municipal tax billings. Failure to collect revenue could pose a critical financial risk to several other enterprise risk factors in the delivery of City services.

|--|--|
| <p><b>Project Description</b></p> <p>The focus of this project is to utilize funds to support necessary enhancements to Enterprise Resource Planning systems. Such items include System Support, Projects or Business Process Initiatives approved by the various Governance Groups that create corporate technical workplans annually. One such project is Tax Updates for HR and Payroll using Rimini Street packages. The project will remain ongoing to enable support and as subsequent workplans are approved with the continuation of additional budget funding being approved.</p> | <p><b>Version Description</b></p> <p>This project will continue to identify and resolve post upgrade (Tax and PeopleTools) issues and optimize the HRMS as well as Financial applications to meet the current business needs. Rimini Street is used for maintenance support and has an impact on ensuring funds in the long term are allocated to either consider purchases of new licenses for PeopleSoft or consider migration to a new Enterprise System. The financial system has several functional enhancements underway to improve workflow. These enhancements were approved by the PeopleSoft Managers group and monitored as part of the corporate PeopleSoft annual workplan. Further focus continues to transition to the implementation of quarterly Tax Updates for HR and Payroll using Rimini Street packages.</p> <p>2019 – Support resources for FIN – AP/Purchasing Business Process Review, Asset Planning – Utilities Automation phase 2, HR Training records automation, HR – job descriptions and Posting Information, IT-PeopleTools Upgrade, Internal resources for PPR projects.</p> <p>2020+ – Reporting tools, enhancements to online services and in 2025 it will be 10 year’s that PeopleSoft (FIN/HRMS) has been supported by Rimini Street without a version upgrade. Research and planning must occur prior to this to ensure the sustainability of our financial and HR systems to determine the appropriate ERP roadmap for a version upgrade or software replacement. Additionally, the Workforce Management System will require system updates to remain current with the vendors support agreement. This will require upgrades to the current version and reconfiguration of business rules depending on collective bargaining changes and other related legislative changes (including Workforce Management (WFM) Contingency).</p> |
| <p><b>Project Comments/Reference</b></p> <p>7074018</p>  | <p><b>Version Comments</b></p> <p>A significant enterprise risk exists in that technology could fail to meet our needs if updates are not regularly completed on the software (tax compliance) and hardware given that we are not doing full version upgrades. Leading into the year 2025, this risk increases each year as the software will be 10 years’ out of date on the version and require a version upgrade or replacement. Both PeopleSoft HRMS and Financials will have to either be replaced or updated and the Workforce Management system will have to be kept up to date.</p>  |

### Project Description

The AMANDA Enterprise System is a Corporate wide system used by many departments including Licensing, Building, Fire, Public Works, etc. Enhancements to this system are required to support business administration, accommodate legislative changes, implement software upgrade requirements, and maintain technology standards. These enhancements have been approved by the AMANDA Governance and Managers groups, and will be scheduled for the next five year plan. The enhancements are approved and are monitored as part of the corporate AMANDA annual work plan. With this funding strategy the goal is to primarily ensure that the system remains functional, accommodates expansion, and ensures day-to-day business continuity.

### Version Description

The pre-work in preparation for the Upgrade to AMANDA 7 continues with infrastructure improvements, report conversions, document modification, coding enhancements and project planning for migration of all modules to AMANDA 7. There are six pillars of the project that are actively being worked on that include infrastructure, security, interfaces, Admin/Customization/Reports, SQL code tech changes and module testing. This project will continue to identify and resolve post upgrade issues while optimizing the AMANDA applications to meet the current business needs using a web based application. Stabilization of this version will continue with minor upgrades as required throughout the lifecycle for the software. Implementation of additional functionality will continue to create efficiencies needed by the corporate users. These enhancements are approved by the AMANDA Governance and Managers groups and monitored as part of the annual workplan. The steps of the upgrade to AMANDA 7 will need to continue in 2019 in order to meet vendor support requirements and to prepare for the end of life of our current version of AMANDA 4/6.

2019 - The AMANDA 7 upgrade will need to continue in order to meet vendor support requirements. This includes completing the new security framework, upgrading the infrastructure, reviewing departmental business processes and creation of departmental job aids, analysis of other corporate applications dependant on AMANDA data, extensive testing of all modules and corporate wide training on the new platform.

2020+ - Projects for consideration through Amanda Governance for Corporate departments are; Continuation of AMANDA migration to the Browser, Sub-Division Condition Management, Heritage Demolition Permit Control, Automation of Heritage Approval and Register Process and Downspout Disconnect.

Implementation of additional functionality will continue that will create efficiencies needed by the corporate users as submitted through the governance process.

### Project Comments/Reference

7075021

### Version Comments

If maintenance upgrades are not complete and funded from year to year, significant costs for consulting and hardware purchase may occur.

## Project Description

The City of Windsor on average employs approximately 3,500 people in a full-time, temporary and part-time basis (not including the Windsor Police Service). Of those 3,500 employees, roughly 1,500 of them do not have access to the corporate network. This limits the options available to communicate with employees and offer corporate resources to make them more efficient in their duties. The purpose of this project is to provide non-network users with access to corporate online resources.

The benefits of providing non-network users with corporate access includes but is not limited to:

### 1. Identity & Access Management

- This will offer a secure method to properly authenticate employee that are accessing our internal resources.

### 2. Access to the WorkForce Time & Attendance system

- A large portion of the employees without access to the corporate network work complex schedules that vary from week to week. Providing access to the WorkForce system will allow them to access their schedule, request and/or be notified of changes to their schedule, and have greater visibility into their information.

### 3. Access to employee self-service (My info)

- This will allow all employees to access and manage their personal information while also eliminating the need for paper-based forms. There is currently a large amount of effort exert internally administering paper-based forms. Employees will be able to access their pay advices and T4's online eliminating the need for manual distribution of these documents and many others.

### 4. Online training and onboarding of new employees

- This will allow the corporation to utilize online training for all employees through a consistent method reducing the need to provide onsite training. It will improve the onboarding process for documenting new employees by utilizing online forms.

### 5. Improved communications with employees

- This will offer enhanced tools to communicate and engage employees by allowing us to share information such as documents, videos, and announcements.

### 6. Offering access to other corporate applications

- With a secure method to authenticate users we will be able to offer more online tools to assist employees in effectively performing their duties.

## Project Comments/Reference

## Version Description

The funds requested in 2020 will be used to procure licenses for all non-network users across the corporation to access online resources. These licenses are necessary to properly authenticate all users to the WorkForce and My Info applications. This will ensure that only authorized users access corporate resources and that communications with employees is done in a secure manner. Access to the WorkForce and My Info applications will reduce the risk of payroll errors and help ensure timely and accurate payroll data while also allowing the corporation to realize administrative benefits by moving towards online forms and communication with employees.

**Project Description**  
 It is becoming more difficult to keep up with the growing storage demands. The corporation needs to expand its current storage capacity, while taking advantage of newer technologies to help improve security, performance and control the increased cost. This requires a state of the art storage that is reliable and expandable. It should include a tiered architecture that allows least referenced material to be allocated to less expensive storage media. New technologies like solid State Disks, deduplication, and compression allow for better performance while built-in drive encryption increases security. It should include the ability to conduct a discovery avoiding the possibility of violating legislative requirements. This is a requirement for freedom of information requests and e-discovery rules for any dispute. Without this project we are not able to provide expected levels of Information Technology (IT) services.

**Version Description**  
 2019: Replace the older storage appliances that are now over 5 years old with newer storage technology. Upgrade and expand the enterprise backup and retrieval system as the current system is end of life and reached capacity.  
 2020+: Continue expand storage to meet required growth. Implement tools to help organize data and meet retention requirements. Add security features to reduce data loss and improve privacy and security.

### Project Description

This project is critical to the Corporation's Information Technology (I.T.) Infrastructure. It allows Information Technology (I.T.) to make required improvements to the network and server infrastructure and to maintain expected levels of productivity and security, ensuring information availability to City employees and the public. The budget cuts to date severely impact Information Technology's (I.T.) ability to implement new technologies. As such, planned upgrades to the City wide connectivity will be delayed. These affect productivity, the ability to backup data, and implement new applications and services as well as required phone system upgrades and deployment of centralized administration for security cameras. Newer technologies require faster networks and until the network is upgraded we cannot move forward with these other initiatives. This will result in an infrastructure deficit that could reduce levels of availability and have a significant impact on customer service. In addition to the direct impact on service, delaying this work will also delay planned operational cost savings that are required to meet operating budget targets.

### Version Description

Ongoing maintenance of existing systems and deployment of new technologies is critical to maintaining expected levels of service.

2019: Continue to expand Wi-Fi deployment. Expand the controllers and core equipment to support more WiFi Access Points. Management tools are now required for greater visibility and control of the network. Continue with installation of a fibre optic network in coordination with Public Works to improve connectivity to remote sites (currently able to add 1 or 2 sites per year). Increase connectivity in the network core with 10GB switching. Upgrade our Connecting Windsor Essex Connection to 10GB. Expand our Virtual server and upgrade our Virtual Desktop environment.

2020+: Continue to expand the Wi-Fi. Implementation of worldwide adoption of IVP6. Deployment of technologies like encryption, load balancing and intrusion prevention and detection. The replacement of the WLANs (wireless local area networks) may require a large portion of these funds in later years if the PAYG reserve fund cannot adequately cover the replacement costs of the WLANs and if an increase in the PAYG reserve fund does not result.

## Project Description

The security framework methodology implemented through this project is now being used during the implementation of new Information Technology (I.T.) projects and during change management processes to existing applications and services. Ongoing funding is required to ensure new and existing security measures are in place to meet the City's security needs. Without additional funding we limit the ability to conduct thorough assessments and that would leave us deficient in areas where security gaps are identified. This exposes us to increased security breaches, or lacking in the appropriate procedures for new technology implementations, resulting in liability, embarrassment, data loss and unavailable systems. IT security can fall into two broad categories - safeguarding data and protecting systems. As a government organization, the City of Windsor maintains both public and confidential data related to its operations, residents, businesses, and staff, in addition to developing and maintaining hundreds of systems that are critical to the operations of City government and the wellbeing of City residents, business and visitors. There are two factors that have increased the vulnerability level of data and systems, not only at the City of Windsor, but within all organizations:

1. Threat Proliferation: World-wide cyber-attacks against individuals, businesses and government organizations continue to grow. There is a common understanding in the IT and cyber security fields that these threats will continue to grow at an exponential rate. The motivation for cyber-attacks can be, financial gain, obtaining confidential information, disrupting operations, jeopardizing public safety, or simply causing embarrassment for the targeted organizations and individuals.
2. Network Proliferation: Also growing at an unprecedented rate is the size and complexity of the corporate network, which significantly increases the City's security risk exposure. The City's network was once limited to computers, printers and servers. With the rapid growth of the "Internet of Things", cloud services, and mobility, what is now connected to the network was unimaginable a few years ago, and the number connections to the network in the coming years will be limitless. While the IT Department has increased security staffing and manages security through shared responsibilities, we require funds for security tools and educational programs to give staff the means to enhance our security profile and reduce the risk of a security incident.

## Version Description

Implementation of risk mitigation strategies as prioritized through the Security Framework Methodology will be conducted from 2019 through 2026 and beyond.

2019: Issue and RFP to establish an IT security vendor for annual review and audit of our security posture. Continue employee training and awareness around digital security, including adding an IT component to our eLearn training software. Increase network monitoring and visibility with state of the art software and security services. Increase the amount archival system event logging for better investigative and auditing. Continue to monitor threat landscape and develop remediation strategies for Cyber Security incidents.

2020+: Further fund improving cyber security tools; Improved Identity and Authentication Management; Data encryption and Data loss technologies; Continue to improve security for mobile and remote workers (Any device from anywhere access technologies)

| <b>Project Description</b>  |                      |                      |                  | <b>Version Description</b>  |  |                            |                |                |                |                |                |                |                |                  |                   |
| Capital funding is required for expansion and upkeep of the current data centre as technology changes and the corporate data and Information requirements continue to grow. In order to reduce the impact to Information Technology (I.T.) operations in the event of a major disaster involving the Data Centre, Information Technology (I.T.) will replicate a portion of the facility to an offsite or cloud location. This capital budget is used to reduce the risk of a data loss or service interruptions due to system failures or security breach. |                      |                      |                  | 2019: Complete replication of new backup and recovery system to an off-site hosted facility. This will reduce mean time to recover for critical systems. Explore options with Windsor Police Service to move some DR equipment from Windsor Public Library to Jefferson Precinct.<br><br>2020+: Continue to scale-out the number of systems or services that can be replicated to chosen DR solution. |  |                            |                |                |                |                |                |                |                |                  |                   |

**Project Description**  
 Many of our corporate phone systems are out of date and need major upgrades or replacements and we have had some significant outages as a result. Phone system outages have a direct impact on customer service and basic service delivery. This funding will also be used to investigate some of the new features available that could improve overall efficiency of our operations to determine which ones have the greatest potential to provide positive impact to service.

**Version Description**  
 2019: Completion on the decommission of the old City Hall Nortel system. Upgrade older systems (POA, Public Works). Deploy Unified Communications technologies on the new platform for mobile workers. Investigate E911 solution for our distributed VoIP system.  
 2020+: Systematic replacement of older systems taking advantage of our improved I.T. infrastructure to reduce telecom carrier costs and improve service and reliability. Continue with solution for mobile workers including video conferencing and E911 compliance.

| <b>Project Description</b>   | <b>Version Description</b>  |
| <p>On September 25, 2006, City Council approved CR463/2006 concerning capital project 7035138 in which it confirmed the policy of the City of Windsor to support the removal of barriers for people with disabilities in corporate departments as prioritized by the Windsor Accessibility Advisory Committee.</p> <p>In addition, CR463/2006 approved the dedication of \$50,000 per year for the removal of non- built environment barriers (this portion focuses on items such as sign language interpreters, translations to more accessible formats etc.). Up to \$50,000 annually can be allocated for such purposes and any portion of the yearly \$50,000 that is not utilized rolls over to be available for built environment initiatives in future years.</p> | <p>This Capital project provides financial support for corporate departments to identify and provide a process to remove accessibility barriers in City properties and facilities. Departments may bring a funding application to the Windsor Accessibility Advisory Committee and the Committee makes recommendations regarding the approval of the funding applications.</p> <p>This Capital project is prioritized and administered by the Windsor Accessibility Advisory Committee (WAAC) to ensure that funding for projects to remove barriers has been reviewed by and prioritized by people with disabilities. Adequate and ongoing funding to this fund ensures that accessibility barriers to both the built and non-built environment can be adequately addressed and that the process ensure persons with disabilities are involved in the decision-making process.</p> |

| <p><b>Project Description</b></p> <p>The first phase of the Diversity and Inclusion Initiative was approved and passed by Council on June 18, 2018 (CR361/2018). At that time, Council directed Administration to bring future costing requirements for consideration at the 2019 Capital Budget.</p> <p>The Diversity and Inclusion Initiative is a Corporate wide effort to assist in more effectively understanding and addressing the needs of everyone in our unique and diverse community. It is both a Council directive and a priority set out in the Mayor and Council's Community Strategic Plan. Phase One of the Diversity and Inclusion Initiative focuses inward on the Corporation and is focused on accomplishing a number of important and measurable Goals, Objectives, and Action Items. These are the projected costs associated with the remainder of Phase One of the Initiative, which is projected to wrap up at the end of 2020.</p> | <p><b>Version Description</b></p> <p>City Council Decision CR361/2018 approved the City of Windsor's Diversity and Inclusion Initiative, authorized Administration to distribute a Workforce Census to staff, provided funding in the amount of \$62,800 from the Budget Stabilization Reserve Account to cover budget needs for the remainder of 2018, directed Administration to bring forward future costing requirements as it relates to the Diversity and Inclusion initiative for Council's consideration at the 2019 Capital Budget.</p> <p>As this is a multi-year Initiative sufficient, additional, ongoing funding throughout the duration of the Initiative is needed to ensure that all of the endorsed Goals, Objectives and Action Items are all appropriately addressed.</p> <p>As of Sept 1, 2018, more than half of the Action items outlined for phase one of the initiative have already been commenced. In 2019, it is the hope that the majority of Action Items currently in progress and have currently been established as an immediate priority will either be completed or autonomous within the scope of the Diversity and Inclusion Initiative. In addition to the Action Items that are in progress, it is anticipated that in 2019, the majority of the remaining Action Items will begin to be implemented in tandem to the commencement of Community Outreach.</p>   |
| <p><b>Project Comments/Reference</b></p> <p>The Mayor and City Council remain dedicated to continually taking steps to learn and grow as a community and they recognize that our diversity adds to our strength and creates an important opportunity for fostering understanding, acceptance, and innovation.</p> <p>This Diversity and Inclusion Initiative is the next proactive step to provide a detailed review and measurable plan to further enhance our efforts. Its purpose is to proactively address the every changing unique wants and needs of our diverse community and strive to attract and retain an innovative, talented, and diverse workforce with the needed skills, experience and dedication to excellence. This initiative is yet another tool to help shape our future in a direction that complements our 20 year strategic vision.</p> <p>Project: 7192002</p>   | <p><b>Version Comments</b></p> <p>There are seven (7) essential areas to the requirements of the Diversity and Inclusion Initiative:</p> <ol style="list-style-type: none"> <li>1. Enhanced Training: Enhanced training of staff throughout the Corporation on diversity and inclusion</li> <li>2. Effective Communication: Includes Project Management tools, video remote interpreting costs, and printing costs</li> <li>3. Leveraging Technology: Includes communication tools for Community Outreach and Project Management software</li> <li>4. Inclusion Campaign: Hosting events and having displays of diversity to demonstrate our commitment to diversity, including with our Employee Resource Groups</li> <li>5. Community Outreach: Consulting and communicating with key stakeholders in the community to assist with developing Phase Two of the Diversity and Inclusion Initiative</li> <li>6. Efficient Project Administration: Project management to oversee Phase One</li> <li>7. Departmental Needs: Additional printing and translation needs that may arise</li> </ol> <p>It has been identified that effectively addressing each of these 7 areas is essential to fulfilling the measurable Goals, Objectives and Action Items in this initial phase of the Initiative. Phase one (Corporate focus) will act as the groundwork of Phase two (Community focus) so it is essential that proper resources, time and expertise is dedicated to Phase one to ensure that we have the strong foundation needed to succeed going forward.</p> <p>Given that the Diversity and Inclusion Initiative is a key component of the risk mitigation strategies tied to 4 of the identified Enterprise risks, this program is as a key priority for the Corporation and includes risks to Attraction &amp; Retention; Socio-Cultural; Portrayal and Organizational Culture.</p> |

| Project Description   | Version Description   |
|---|---|
| <p>Under the Accessibility for Ontarians with Disabilities Act 2005 (AODA) and its regulation, there are a number of legislated requirements that municipalities are required to implement/comply with.</p> <p>Municipalities must file accessible reports with the Ministry showing that legislated requirements are met for each of the Standards. All of our reports have been filed as required every 2 years with our last filing in December 2017 and the next one due December 2019.</p>   | <p>Customer Service Standard - Municipalities had to comply with the Customer Service Standard Regulation by January 2010. The compliance requirements included developing, documenting and adherence to specific policies, procedures and practices on providing goods and services to persons with disabilities and providing training to all who interact with the public or third parties on the municipality's behalf. Additionally the City has to address customer feedback requests tied to the Accessible Customer Services Standards on an ongoing basis.</p> <p>As a result of a legislative review, as of July 1, 2016 all accessibility standards — including the accessible customer service standard — became part of one regulation: the Integrated Accessibility Standards Regulation. Some new requirements, including expanded training requirements, had to be implemented by corporations.</p> <p>The Integrated Accessibility Standards (includes Accessible Information and Communication, Employment, Transportation and Built Environment Standard pertaining to the design of Public Spaces and Customer Service) involves staggered timelines. In addition to the substantive requirements to eliminate barriers for our customers and employees there are also requirements regarding training and documenting required policies and procedures and plans. Additionally the City will also address customer and employee feedback requests and remediations tied to the Integrated Accessibility Standards on an ongoing basis.</p> |
| Project Comments/Reference  | Version Comments  |
| <p>7091017</p> <p>On or about December 17, 2012, the Ontario government filed regulation O.Reg 413/12 to introduce the new Built Environment Standard pertaining to the design of public spaces into the Integrated Accessibility Standards Regulation (O. Reg. 191/11). This standard covers a variety of outdoor public spaces (walkways, play spaces, etc.) and was effective January 1, 2013. The requirements under this standard however commence as of January 2016. The built environment standard for outdoor public spaces only applies to new construction and planned redevelopments.</p> <p>The Ontario government decided that enhancements to accessibility in buildings would happen via Ontario's Building Code, which governs new construction and renovations in buildings. The new accessibility requirements under the Ontario Building Code became effective January 1, 2015. It seems only logical that the departments that are responsible for the new construction and planned redevelopments should have it built into their respective capital budgets to meet the Built Environment requirements going forward.</p> <p>Changes to the Customer Service Standard under the Accessibility for Ontarians with Disabilities Act, 2005, S.O. 2005, c. 11 ("AODA") will come into force on July 1, 2016 and will apply to all organizations providing goods, services or facilities in the province. All accessibility standards — including the accessible customer service standard — are now part of one regulation: the Integrated Accessibility Standards Regulation (O. Reg. 191/11).</p> <p>The upcoming funding request is for document and website remediation processes required to be in compliance with legislation. Remediation takes time and can be costly therefore, additional funding is required to help with the costs associated with completing this process by the legislated deadline.</p> | <p>This is an ongoing project regarding the implementation of legislated accessibility standards under the Accessibility for Ontarians with Disabilities Act. \$74,500 in funding is requested in 2020 to cover the costs of document and website remediation. As noted earlier, remediation takes time and can be costly therefore, funding is required in 2020 to cover the costs associated with meeting the requirements by the legislated deadline of Dec 31, 2020.</p> <p>The project was originally scheduled to close at the end of 2021 based upon the meeting the legislated due dates. Given there will be ongoing costs and responsibilities to remain in compliance after the legislated due dates, it is recommended that this project remain ongoing.</p>  |

| Project Description   | Version Description   |
|---|---|
| <p>This capital project will create online learning programs for courses currently offered by Human Resources Health &amp; Safety Advisors, which includes the Fuelling/Refuelling, Commercial Motor Vehicle Inspection, Noise training and other non hands-on training components. In 2011 the Corporate Employee Safety Orientation Program (CESO) was converted to online format. The online CESO format was made available to new hires in July of 2012 and to all staff as of January 2013. The CESO program includes the following training programs: WHMIS; Orientation to Health and Safety Legislation, including the Duties and Responsibilities of specific workplaces parties, i.e. the Employer, Supervisor and Workers as well as the Right to Refuse work legislation and the requirement to report accidents and injuries under WSIB legislation; ladder safety; fire extinguisher use; the corporate Respectful Workplace Program, which includes instruction on workplace violence and harassment, human rights, standards of employee deportment and conflict of interest; and back care and injury prevention programming.</p> <p>The CESO Online program was developed by the provider in a format that cannot be altered (Flash). In 2014, Human Resources purchased the Adobe Captivate software to provide the ability to reformat and update both the CESO and New Employee Orientation Online programs.</p> | <p>In 2014 the two existing Vehicle Fuelling programs were converted to one online format training program. The requirement to provide training on safe fuel dispensing and emergency spill processes is regulated by the Technical Standards Safety Association (TSSA). In order to meet these requirements an online program is now being provided to corporate staff. The program is designed to acquaint workers with the hazards of handling and dispensing gasoline and diesel fuel, the steps required in the event of a fuel spill and an overview of how to use the fuel dispensing system at corporate fueling sites. The TSSA requires that all workers who dispense fuel receive training on fuel safety on a five-year renewal basis.</p> <p>With the successful completion of the Vehicle Fuelling Program and the updating of the New Employee Orientation Video to reflect the new Mayor &amp; Council information, the current CESO – Day 1 program will be converted into a more user friendly format.</p> <p>Additionally, in 2016, our Asbestos Awareness Training program was converted and implemented in an on line format, utilizing the updated format. Working With Asbestos will not be converted to an online version given the requirements for hands on training.</p> <p>The next programming to be created in online format is CESO – Day 2.</p> <p>Day 2 of the CESO online training program has specific content for our drivers as well as other mandatory components. The specific content of Day 2 of CESO is: Commercial Vehicle Pre-Trip Inspection, Traffic Control Roadway Operation, Corporate Equipment Safety Program, Hours of Services and Noise training. Additional mandatory training due for conversion is Asbestos Awareness.</p> |
| Project Comments/Reference  | Version Comments  |
| 7125000   | <p>A number of challenges have occurred with our original provider for on-line training as well as the delivery of training to our staff was not compatible with our current systems. Having had success with our new provider who converted our Gas/Diesel Fuelling Program, this provider has been engaged to begin converting the basic mandatory health and safety programs contained in our CESO program. In 2016, our Ladder Safety and Fire Extinguisher programs have been converted into user friendly on-line training programs. In 2017 we will continue to work towards the conversion of the remaining component programs of our CESO Day 1 and 2 Program. Moving forward we will work towards the conversion of other mandatory health and safety training programs, and specifically Noise, Hours of Service, Commercial Vehicle Pre-Trip Inspection, and Traffic Roadway Operations. These programs are suited to on-line learning as none have requirements for hands-on interaction with a facilitator and thereby freeing up our Occupational Health and Safety Advisors to devote their time and skills to compliance monitoring and assessments while providing training in a readily accessible format for our workforce.</p>   |

## Project Description

In order to move into a more proactive approach towards ergonomics, in 2016 Human Resources, with the endorsement of the Chief Administrative Officer, the Corporate Leadership Team and City Council, moved away from the third party contracted service for the completion of ergonomic assessments and wellness programming to the establishment of an in-house ergonomist and wellness specialist. In the years leading up to this change in service delivery from 2011 through 2015, the cost of the provision of ergonomic assessments to our departments from an external provider, including both occupational and non-occupational injury claims has ranged from a low point in 2012 of \$29,899.95 to the highest level in 2011 of \$ 56,918.79 broken down as follows:

### Ergonomic Assessment Costs

| Year  | Non-Occupational | WSIB        | Total Ergonomic Costs |
|-------|------------------|-------------|-----------------------|
| 2011: | \$18,294.48      | \$38,624.31 | \$56,918.79           |
| 2012: | \$10,797.18      | \$19,102.77 | \$29,899.95           |
| 2013: | \$32,473.44      | \$21,528.88 | \$54,002.32           |
| 2014: | \$19,289.10      | \$11,136.35 | \$30,425.45           |
| 2015: | \$30,219.77      | \$17,865.30 | \$48,085.07           |

Given the approval to bring on board our Ergonomist and Wellness Specialist, who conducts Ergonomic Assessments, the above noted costs are no longer charged back to the departments, alleviating the departments from absorbing this cost.

As part of our proactive approach and ongoing commitment to our employees well being, inclusive of cost reductions, a Musculoskeletal Prevention Program is being recommended to address ergonomic issues arising from Ministry of Labour orders, WSIB Claims, new work processes, legislative changes and requirements for the Corporation. With approved funding to purchase needed equipment, this project will be designed to implement a robust Musculoskeletal Prevention Program which once established, will enable us to move towards continuous improvement by funding opportunities that may arise to gain insight on new ergonomic research, initiatives and leading technologies being made available.

The enforcement of ergonomics by the Ministry of Labour has typically been under the general duty clause of Section 25(2)(h) and Section 25 (2)(d), employers' duty to acquaint their workers with hazards of the Occupational Health and Safety Act (OHSA). In addition, orders are issued under various related regulatory requirements, such as safe handling of materials under the Industrial Establishments Section 45 and provision of adequate lighting under Section 21.

## Version Description

We foresee using the funds in this request to cover such expenses as:

- Purchase of ergonomic software
- Purchase of various measuring tools used to assess risk of ergonomic injuries
- Provide for any calibration that may be required of the measuring tools based on usage
- Purchase of ergonomic equipment and tools for our Corporate Training room to accommodate employees' needs
- Purchase of ergonomic equipment, software and tools to be used during our Recruitment Process should a candidate voice an accommodation need

|   |                      |                                  |   |                             |                                 |             |                             |             |             |             |             |                  |                   |
|---|----------------------|----------------------------------|---|-----------------------------|---------------------------------|-------------|-----------------------------|-------------|-------------|-------------|-------------|------------------|-------------------|
| <b>Project Comments/Reference</b>   |                      |                                  | <b>Version Comments</b>   |                             |                                 |             |                             |             |             |             |             |                  |                   |
| <p>This project represents the Corporation's ongoing commitment to ensure the Corporation's health &amp; safety standards and plans are functioning properly. By implementing a robust Musculoskeletal Prevention Program, actions can be taken to proactively work towards reducing workplace injury risk. In the long run, assist with not only lowering our health care costs, but can also assist with reducing worker's compensation claim costs and long term and short term disability rates. Program implementation steps require us to purchase appropriate equipment/tools/software that we do not currently have to properly assess ergonomic hazards along with the required maintenance of these items. Once ergonomic assessments are completed, required changes, implementations and standards must be accommodated which comes at a cost. This can include upgrading current workstations to provide same equipment standards for all workers to meet compliance and addressing environmental issues such as lighting etc. However, the cost of purchasing equipment for our employees lowers our WSIB claims, STD and LTD costs, lowers our attendance claims and provides for higher productivity.</p> |                      |                                  | <p>As we move forward with the implementation of our Musculoskeletal Prevention Program, we anticipate that we will be able to detail specific aspects of this program. The request of \$35,000 will assist with the purchasing of the software and appropriate tools to complete our ergonomic assessments in house, inclusive of the calibration of these tools as required. This cost also covers ongoing annual costs related to replacing tools and calibration of these tools.</p> <p>The hazards that can cause musculoskeletal concerns are usually associated with the physical demands of work activities. For example, employees may injure themselves by:</p> <ul style="list-style-type: none"> <li>• Lifting or pushing loads that require excessive force;</li> <li>• Reaching or bending in an awkward posture;</li> <li>• Holding the same position for a long time; or</li> <li>• Repeating the same movements over and over with little chance for rest or recovery.</li> </ul> <p>Through the application of ergonomics principles, to be implemented within our Musculoskeletal Prevention Program the risk of injury posed by such hazards can be eliminated or reduced.</p> <p>This program will include the following aspects:</p> <ul style="list-style-type: none"> <li>• an implementation plan;</li> <li>• a hazard identification and assessment methodology;</li> <li>• hazard identification and assessment;</li> <li>• preventive measures;</li> <li>• employee education; and</li> <li>• a program evaluation.</li> </ul> <p>Within a Musculoskeletal Prevention Program, our Ergonomist and Wellness Specialist will work together with our Health &amp; Safety Advisor and Disability Management Specialists, to provide an overall Prevention, Accommodation and Accident/Incident Reduction Plan for our employees resulting in a robust and well round Health, Safety and Wellness Program.</p> |                             |                                 |             |                             |             |             |             |             |                  |                   |
| <b>Project Forecast</b>   |                      |                                  | <b>Project Detailed Forecast</b>  |                             |                                 |             |                             |             |             |             |             |                  |                   |

| <p><b>Project Description</b></p> <p>This project was created to fund health and safety issues arising from Ministry of Labour orders, new work processes, legislative changes and requirements for the Corporation. Over the past several years, the Ministry of Labour and the Workplace Safety and Insurance Board have been much more proactive with companies who don't measure up to health &amp; safety rules and regulations. The Ontario Ministry of Labour has made a commitment to audit and inspect every employer in Ontario. The Ministry is targeting all employers, starting with workplaces with poor health &amp; safety records. Accordingly, the Ministry of Labour has hired and trained hundreds of new health &amp; safety inspectors since 2004. The government is clearly determined to level the playing field for all companies and to penalize those organizations who are trying to gain an unfair advantage by ignoring health &amp; safety.</p> <p>Since March 31, 2004, new occupational health &amp; safety duties and criminal liabilities added to the Criminal Code (in Bill C-45) affect both individuals and organizations in Canada. For the first time, both individuals and organizations (including directors, executives and managers) are under an increased obligation to take reasonable steps to protect workers and the public; they must ensure accountability for a safe work environment or the Corporation faces a heightened risk of additional orders, fines and penalties.</p> | <p><b>Version Description</b></p> <p>The following are the types of health and safety issues which are commonly in need of addressing but without dedicated funding:</p> <ul style="list-style-type: none"> <li>- assessments of indoor air quality concerns (i.e. humidity, confirmation of compliance on exposure limits), average cost \$1,500 per assessment</li> <li>- industrial hygiene assessments for the presence of mould, average cost \$1,700 per assessment</li> <li>- engineering assessments for implementing engineering controls (i.e. retrofitting current equipment and developing specifications for purchases of new equipment)</li> <li>- ensure the standards for asbestos is tested, maintained and adhered to as per legislative requirements, Ontario regulation 278/05 of the Occupational Health and Safety Act</li> <li>- In June of 2018, the Corporation was notified that the Workplace Safety and Insurance Board would conduct a WorkWell Assessment for Transit Windsor. The results of this Assessment may require changes or new processes be implemented that have financial requirements.</li> <li>- In April of 2018 the Corporation was notified by the MOL of their Ergonomics Initiative. As site visits and document reviews progress, recommendations from the MOL Ergonomist may require financial resources to address an effective implementation strategy.</li> </ul>  |
| <p><b>Project Comments/Reference</b></p> <p>(Closed: 7091019 - Project funding of \$100,000 approved in 2009)<br/>Active: 7081015</p> <p>This project represents the Corporation's ongoing commitment to ensure the Corporation's health &amp; safety standards and plans are functioning properly. Once testing and assessments are completed, the required changes, implementations, and safety standards must be accommodated which comes at a cost.</p>   | <p><b>Version Comments</b></p> <p>In 2012 a project was undertaken through an RFP process for the conducting of asbestos surveys and designated substance assessments over a 5 year period. Initially, 29 corporately-owned sites were prioritized making up the majority of the primary sites where our employees work. Having completed surveying of the 29 sites originally prioritized, we are moving on to complete surveys for the remaining sites which our employees attend, possibly on a less frequent basis; sites which may have only partial surveys; and newly acquired properties. As of August 2018, our records indicate the Corporation owns 222 properties. The cost of individual site surveys varies depending on such factors as the total square footage, number of renovations and year of build. In 2018 to-date, a comprehensive survey has been completed and documented for the Lou Romano Reclamation Plant. As of the time of this report, 59 properties remain in need of surveying, additional surveys completed in 2018 depending available funding.</p> <p>For 2018/2019 WSIB will be reviewing the health &amp; safety and return to work practices &amp; procedures of Transit Windsor. After the review, WSIB may make recommendations or order the Corporation to make necessary improvements to help prevent injuries, illness and fatalities &amp; reduce the negative consequences of occupational disabilities.</p> <p>The MOL has initiated an Ergonomic Initiative in Municipalities. The initiative is to take place April 2018 to March 31, 2020, with visits from an MOL ergonomist running from April 2019 to March 2020. This initiative involves both an administrative review &amp; physical inspection followed by reports &amp; possible orders to implement.</p> |

| Libraries get significant "wear and tear" from repeated public usage and require regular refurbishment, such as painting, new customer seating, children's seating, shelving improvements and study surfaces every 8 to 10 years to protect the capital investment and assure sustainability. WPL Administration maintains a refurbishment plan and carries out priorities based on the capital budget allocation provided by the City. |                      |                                  |                               | Current priorities include painting, flooring replacements, shelving improvements and furniture replacements at the Fountainbleau, Bridgeview and Forest Glade branches. |                                 |             |             |             |             |             |             |                  |                   |  |  |  |  |  |  |  |  |

| New shelving is required at Central due to increased security risks. The facility faces some existing challenges based on unique, underlying conditions. Most notably is the facility's easily accessible downtown location, including being immediately across Ouellette Avenue from the recently opened overnight lodging facility for the Downtown Mission. Combined, these two aspects create a criminological condition of "elevated situational vulnerability" – a locational phenomenon whereby there is increased public order challenges due to higher-than-average transiency for its customer base, typified by many individuals attending and staying to loiter. With its open, public accessibility and climate controlled environment, it becomes a reliable place of daily refuge for some individuals (particularly those who have no permanent residence) as somewhere to linger and get out of the weather, rather than attend for more purposeful reasons. This inherently creates conditions that can support an increased probability for undesirable behaviour to occur. The presence of individuals who have consumed varying amounts of alcohol or drugs in some instances further increases the risk for problems. This risk has been confirmed by individuals regularly observed by employees of the facility. |                      |                                  |                  | New shelving is required at Central due to increased security risks. | <b>Project Description</b>  |                      |                                    |                     | <b>Version Description</b>   |                          |             |             |                             |             |             |             |              |              |           |
| <p>The development charges component of the Library Board capital program includes a provision of \$1.0 million to cover the cost of materials acquisitions over the ten-year planning period. This acquisition will assist in servicing areas of Windsor with significant residential growth without expenditures on bricks and mortar. Our materials are popular and in constant demand and new materials are regularly expected by our customers. Within a budget conscious environment, the Windsor Public Library wishes to remain relevant, in particular with respect to Wards 1, 7 &amp; 9 - the wards which have experienced significant residential growth.</p> |                      |                                    |                     | <p>The funds have been designated to purchase library books/videos and e-resources to serve areas with significant residential growth (i.e. Wards 1/7/9) thereby reducing the need for more library facilities. The proposed plan going forward to use Development Charge funding to support library collections and outreach in areas where a public library is not easily accessible. There will be no operating impact.</p> |                          |             |             |                             |             |             |             |              |              |           |

| In 2016 the WPL Board allocated \$35,000 from the WPL Operating Reserves to purchase and commission a bookmobile. The 18 foot vehicle is a modified 2005 GMC C6500 and was originally purchased by the Guelph Public Library December 14, 2005 for \$212,223. It currently has 72,214 kms and averages 11 miles/gallon. By 2023 FRED will be 18 years old and will need to be refurbished or retired and a new outreach vehicle purchased. The estimated cost to refurbish FRED or buy a new customized vehicle is \$165,000. |                      |                                  |                  |                                  |             |             |             |             |                             |             |             |              |              |  |

| The Windsor Public Library collection contains approximately 600,000 items for circulation and reference. Our current materials automation systems have not changed in over 10 years and are badly outdated. These systems also help protect against theft allowing the Library to use funds to buy new materials rather than replace existing ones ensuring the Library delivers access to the widest collection possible. |                      |                                    |                  | The WPL uses the SIRSI Dynix Integrated Library System to record and enable access to over 600,000 resources. This Integrated Library System also handles the purchasing process for the resources as well as allowing access to the patrons as a cataloguing system. |  |                            |             |             |                             |             |             |             |                  |                   |

**Project Description**  
 CR391/2016, Report C116/2016 awarded the tender to Loaring Construction, approved \$267,823 in additional funding, and revised the total budget for the project at \$6,787,823.  
 Also, CR131/2014, Report #17162 approved \$2,571,933 from Pay-As-You-Go (F169) as a placeholder for Station #8, which was subsequently renamed to Station #6. Funds are obtained by swapping of funding sources due to increased Federal Gas Tax allocation in the new 2014-2018 agreement with Association of Municipalities of Ontario (AMO).  
 Further, CR242/2014, R#17376 approved the Implementation Plan - Station #6 relocation and inclusion of the Emergency Operations Centre (EOC) within the facility.  
 Construction is underway.

**Version Description**  
 Overall budget for the construction and design is:  
 CR391/2016 - Transfer of \$25,490 from Emergency Preparedness Plan project (7029030) \$242,333 in anticipated proceeds from sale of surplus lands  
 CR131/2014 - \$2,571,936 amounts below 2016-2018 (\$25,872 already allocated in both 2014 and 2015)  
 CR242/2014 - Pre-Commitment to 2015 5-year plan Capital budget - \$2,448,064 funded by Debt Reduction Levy (DRL) for 2019  
 B38-2013, 2014 Approved Capital Budget Enhanced Plan for the design and construction of the EOC - \$1,500,000  
 TOTAL of \$6,787,823  
 CR391/2018, Report C124/2018 recommended that the project surplus, estimated at \$183,247, be transferred to the Fire Hall Capital Refurbishment Program (HCP-002-09, Project 7091015).

| <b>Project Description</b>  | <b>Version Description</b>  |
| <p>There are lands that the City has obtained through tax arrears that need to be evaluated for environmental liabilities. It is imperative that the proper environmental site assessment detail the level of contamination or clean up required to sell the lands and qualify for any Brownfield funding.</p> <p>In addition, the state of disrepair of many of these properties render them unfit to sell or make improvements on, and their condition can sometimes present a safety hazard to neighbouring property owners and residents. In order to mitigate the potential liability and facilitate disposition of the properties as appropriate, funding is sometimes required to demolish the existing structures. It is proposed to expand this project to include funding for vacant City-owned properties that require demolition.</p> | <p>Various transitional properties require Phase I and II environmental studies prior to being sold or demolished. These are being done on a priority basis. This project further includes the demolition of designated City-owned properties, should funds be available.</p> |

| This project allows for the construction of local municipal services including storm and sanitary sewers, pavements and street lights in the South Cameron/South Windsor planning districts. Funding will cover any anticipated petitions along with providing for incentives to work with property owners. Recovery of expenses/Subsidies (as noted in Project Forecast) will come from the owners of the benefitting properties. |                      |                                  |                  | Balance of funds needed for the City's share of paving works within the development.<br><br>These funds may be used for work to be completed on Cleary, between Randolph and California. |  |                            |             |                             |             |             |             |             |                  |                   |

| This ongoing allotment is used to repay developers to oversize sewers and roads so other lands can be serviced. Any oversizing required by developers will require the developer's patience for payment to future years as other priorities require funding. |                      |                              |                     | Funding source for City's share of oversizing for anticipated developments.  |                                 |                |             |                |                |                |                |                |                  |                   |

| Council authorized Administration, via CR366/2017 / Report CR24/2017, to demolish the former Concord School and develop the site as low density housing, as part of the Riverside Arena / St. Rose Park Redevelopment. |                      |                                  |                  | Administration previously communicated a cost of \$350,000 to demolish the old Concord School. The services required for the low density housing within the old school site is estimated to be \$600,000 including the relocation of a large trunk storm sewer. Revenues anticipated from the sale of the residential sites are in the range of \$600,000 to \$800,000. Noting that these revenues will fluctuate and are dependent on industry pricing at the time of the sale. The net value estimated for this project is \$350,000.<br><br>As of August 2018, the building has been demolished and development work is ongoing. |  |             |             |             |                             |             |             |             |              |              |

| <b>Project Description</b>          |                   | On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration.   |           | <b>Version Description</b>     |               | California Ave. and Pulford St. operate as contiguous roadways between Norfolk St. and Daytona Ave. The streets are adjacent to the Capri Pizzeria Recreation Complex and Ecole catholique Monseigneur Jean Noel. Both are constructed as a rural cross-section roadway with pavement that is rated as "Now Deficient". This project will involve full rehabilitation with the addition of curbs and gutters and sewers. A Local Improvement process will be required for the curb and gutter and storm sewer on California Ave., however as a flankage road the cost for Pulbrook St. is absorbed by the General Rate. The first possible opportunity to fund and to tender this work is in the Spring of 2019 with completion in the 2019 construction season. |                             |               |           |      |   |   |   |      |   |   |   |      |   |   |   |      |   |   |   |      |           |           |   |      |   |   |   |      |   |   |   |       |   |   |   |  |                  |                  |          |                                  |  |  |  |  |  |  |  |  |  |  |  |            |      |      |      |      |      |      |      |       |       |                 |  |  |  |  |  |  |  |  |  |  |                                   |   |   |   |   |           |   |   |   |           |       |   |   |   |   |           |   |   |   |           |                 |  |  |  |  |  |  |  |  |  |  |                                     |   |   |   |   |           |   |   |   |           |       |   |   |   |   |           |   |   |   |           |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | College Ave. currently has combined sewers that are in need of replacement and pavement that is rated as "Now Deficient". This project will entail design for full rehabilitation including sewers, pavement and watermain from Campbell Rd. to McKay Ave. Because watermain funding will not become available until 2019, work will be tendered in the Spring of 2019 and completed in the 2019 construction season. |                              |             |             |             |                             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | Funding will support initiating the engineering design for a future reconstruction of Crawford Ave. from Wyandotte St. to Tecumseh Rd. W. Construction timing will depend on future funding allocations toward this project. |             |             |             |             |                             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | This project will be consolidated into a single pavement and reconstruction project. Engineering can proceed in advance of watermain funding becoming available in 2019. Due to the project complexity, it is not expected that design can be completed until the Fall of 2019 with tendering occurring in the 2020 construction season. |             |             |             |             |                             |             |             |              |              |  |  |  |  |  |  |  |

# Project Version Summary

**Project #** ECB-033-18      **Service Area** Office of the City Engineer  
**Budget Year** 2019      **Department** Engineering  
**Asset Type** Unassigned      **Division** Infrastructure & Geomatics  
  
**Title** Reginald St. - Pillette to Norman - Reconstruction  
**Budget Status** Council Approved Budget  
**Major Category** Roads  
**Wards** Ward 8  
**Version Name** Main (Active)

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration.   |                   |                                  | Reginald St. will be reconstructed from Pillette Rd. to Norman Rd. This project is intended to be consolidated with the Olive Road sewer rehabilitation project (Seminole to Milloy) planned for 2019. The first possible opportunity to fund and to tender this work is in the Spring of 2019 with completion in the 2019 construction season. |               |         |      |                             |           |         |   |   |   |      |   |   |   |      |   |   |   |      |   |   |   |      |         |         |   |      |   |   |   |      |   |   |   |       |   |   |   |  |                |                |          |  |  |  |  |  |  |  |  |  |  |            |      |      |      |      |      |      |      |       |       |                 |  |  |  |  |  |  |  |  |  |  |                                   |   |   |   |   |         |   |   |   |         |       |   |   |   |   |         |   |   |   |         |                 |  |  |  |  |  |  |  |  |  |  |                                     |   |   |   |   |         |   |   |   |         |       |   |   |   |   |         |   |   |   |         |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                    |                  | Byng Rd. will be reconstructed from Lappan Rd. to Melinda Rd. Because watermain funding will not become available until 2019, work will be tendered in the Spring of 2019 and completed in the 2019 construction season.  |             |             |             |             |                             |             |             |              |              |  |  |  |  |  |  |  |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  | A roundabout is proposed for the intersection of Riverside Dr. E. and Devonshire Rd. Design of the roundabout and land acquisition can proceed in 2018 with an expected tender date in 2019. |                                     |             |             |                             |             |             |             |             |              |              |

| Improvements to the Howard Avenue corridor are required as a result of traffic growth from expanded residential and commercial activity. The ESR for this project was completed in 2003. Limits of entire project are South Cameron Blvd. to Herb Gray Parkway. |                      |                                  |                  | 2020: Land Acquisition/Engineering - \$350,000<br>2022: Land Acquisition - Howard / Lake Trail - \$50,000<br>2026+: Construction - Howard / Lake Trail - \$6,000,000<br>Stormwater Study, South Cameron / Cabana - \$300,000 |  |                |             |                             |             |             |             |                   |                   |  |

**Project Description**  
 Improvements on Cabana Rd. are required as a result of traffic growth, development of surrounding neighbourhoods and intensification. The Environmental Study Report was approved in 2008.  
 As a result of the expected impacts stemming from the proposed location of the new acute care hospital, Council authorized Administration to proceed with design and contract administration of the Cabana Road Environmental Assessment implementation as per CR234/2015.

**Version Description**  
 Timing of improvements:  
 2019: Engineering, Land Acquisition and Construction - Dominion to Dougall - \$4,014,140  
 2020: Land Acquisition and Construction (continued) - Dominion to Dougall - \$10,565,860  
 2021: Engineering, Land Acquisition and Construction - Dominion to Glenwood - \$7,630,000  
 2022: Engineering, Land Acquisition and Construction - Provincial to Walker - \$3,430,000  
 2023: Land Acquisition and Construction (continued) - Provincial to Walker - \$3,430,000  
 2025: Engineering, Land Acquisition and Construction - Glenwood to Huron Church - \$3,150,000  
 Total: \$36,280,000  
 Note that timing of expenditures differs from timing of funds, as funds were not available until future years.

**Version Comments**  
 CR234/2015, Report #18030 pre-commits the Cabana Road work in various phases.  
 PRE-COMMITMENT: As per CR551/2017, Report # C 151/2017, Administration recommends \$325,000 in funding in 2020 be used for the Malden Road/South Cameron asphalt widening project as grant funding was secured under the Ontario Municipal Infrastructure Program (OMCIP).

| ECP-027-07       | Lennon Drain Improvements                                  | Unknown                            | Upon completion of this project, road maintenance costs due to patching and maintaining gravel shoulders will decrease. These savings, however, will be offset by other road maintenance and snow removal costs resulting from the increased surface area of the road. Operating cost figures cannot be determined at this time as the project is still in its' preliminary stages, however, it is assumed that costs will be lower immediately following completion of the project and will escalate as the road ages. | 0                    | 0          |

| Walker Rd. from Riverside Dr. E. to Hwy. 401. Road improvements are required due to the increased traffic throughout the Walker Rd. Corridor. Improvements include laying concrete pavement, enclosing roadside ditches with storm sewers, relocating utilities, widening a rail crossing, constructing proper pedestrian facilities and constructing a new watermain. The ESR for this project was completed in 2001. To date, approx. 80% of this project has been completed.  |  |                                  |            | 2025: Phased Construction - Foster Ave. to Airport Rd. - \$2,500,000<br>2026+: Phased Construction - Foster Ave. to Airport Rd. - \$14,640,000<br>Engineering and Construction - Temple Drive extension - \$3,800,000  |      |         |           |            |                             |               |           |      |           |           |                |             |           |            |           |  |           |           |           |      |           |   |           |      |           |   |           |      |           |   |           |      |           |           |   |       |            |            |   |  |                   |                   |          |  |  |  |  |  |  |  |  |  |  |  |            |      |      |      |      |      |      |      |       |       |                 |  |  |  |  |  |  |  |  |  |  |                                   |   |   |   |   |   |   |           |            |            |       |   |   |   |   |   |   |           |            |            |                 |  |  |  |  |  |  |  |  |  |  |                                     |   |   |   |   |   |   |           |            |            |       |   |   |   |   |   |   |           |            |            |

|   |
|---|
| <b>Project Description</b>  |
| Maintenance of Municipal Drains as required under the Drainage Act, s74 (Maintenance of drainage works and cost) and s79(1) (Power to compel repairs). Section 79(1) provides any person affected by the condition of a drain the power to compel repairs and places potential liability on the responsible municipality. |
| There has been a significant increase in workload since the expiry of the ESA exemption agreement in dealing with MNR issues.   |

**Project Description**  
 The need for these Master plans was recognized as a result of several factors, including the acquisition of the Sandwich South Lands and the completion of many of the Priority 1 Storm Sewer projects. Over the past 50 years, many studies have been undertaken for Storm and Sanitary Drainage areas. In addition, the current CCTV sewer program will identify areas of concern for sewer replacement. The resulting Stormwater and Sanitary master plans will provide consolidation of the various Storm and Sanitary studies and identify Storm and Sanitary priority lists for future Capital Works Budgets. Depending on legislation, there may be a requirement to accelerate completion of the Master Plan. Source Water Protection Policies may require monitoring of combined sewer overflow outfalls within the areas of concern.

**Version Description**  
 2022: Drainage area sewer studies as prioritized by Sewer Master Plans - \$250,000  
 2023: Drainage area sewer studies as prioritized by Sewer Master Plans - \$250,000

**Project Description**  
 The ESR for this project was completed in 1996. Improvements on Tecumseh Rd. E. are required as a result of traffic growth and expanded commercial activity. Project involves widening Tecumseh Rd. E. between Jefferson and Banwell. Planned improvements include building three through lanes in both directions, creating left turn storage lanes at all intersections, building raised medians, 1.5 km of sidewalk on both sides of the road, undertake the replacement of watermains and other utilities and extend the sanitary sewer. As of 2016, Jefferson to Lauzon Rd. has been completed.

**Version Description**  
 2020: Stormwater study, Little River to Banwell Rd - \$50,000  
 2021: Stormwater study, Little River to Banwell Rd - \$450,000  
 2022: Design – Tecumseh Rd. E. / Forest Glade Dr. intersection - \$500,000  
 2025: Land Acquisition - \$500,000  
 2026+: Utility Relocation - Tecumseh Rd. E./Forest Glade Dr. Intersection - \$500,000  
                   Construction - Tecumseh Rd / Forest Glade Intersection - \$7,000,000  
  
                   Design, Land Acquisition & Construction - Lauzon Rd. to Forest Glade Dr. - \$10,820,000  
                   Jefferson Boulevard from Tecumseh Rd. E. to Rose Avenue - \$3,100,000  
                   Design & Construction of Little River Bridge - \$8,830,000

| This program relates to roads having a rural cross-section that are in need of pavement rehabilitation and that do not require sewer rehabilitation. This funding is to be used to finance the construction of curbing and boulevard restoration, while the pavement rehabilitation will be funded through the City-Wide Road Rehabilitation Program. |                      |                                  |                     | Proposed Local Improvement Petitions:<br>Tourangeau - Grand Marais to Plymouth<br>Radisson - West Grand to Norfolk<br>Woodlawn - West Grand to Norfolk<br>Virginia Park - West Grand to Norfolk |   |             |             |             |             |             |             |                  |                   |         |

| Howard Avenue - Erie Street East to Tecumseh Road East. The ESR for this project was completed in 2002. Road improvements have been implemented. Sewer improvements are still required due to deficiencies which have caused flooding. |                      |                                  |                     | 2026+: Outlet sewers/road reconstruction on Giles Blvd. and Ellis Street from McDougall to Howard - \$3,800,000<br>This is necessary because Giles Blvd. and Ellis St. sewers provide relief for the Howard Ave. sewers. |  |             |             |             |             |             |             |              |              |  |   |                  |                   |  |  |  |  |

| This program relates to the contribution of roads, alleys, sidewalks, streetlight and drainage as local improvements. |   |                                    |                          | A review of rural cross-section roads has been undertaken. At this point in time, there are a significant number of these roads where the sewers do not have CCTV ratings which makes it nearly impossible to prioritize the potential projects. Therefore, a listing is not provided at this time and will be reported to Council once we are able to prioritize the roadway segments.  |          |                  |                  |                   |                   |  |  |  |  |  |                |               |               |            |         |   |           |        |       |           |                 |        |      |           |           |         |      |           |         |         |      |                                   |         |   |      |         |         |        |  |  |  |  |         |           |           |   |   |           |           |            |            |              |                |                  |                  |          |          |                  |                  |                   |                   |                 |  |  |  |  |  |  |  |  |  |  |                     |  |  |  |  |  |  |  |  |  |  |   |         |         |   |   |         |         |           |           |                     |  |  |  |  |  |  |  |  |  |  |         |        |   |   |   |   |   |   |         |                                     |  |  |  |  |  |  |  |  |  |  |         |           |         |   |   |         |         |           |           |                                    |  |  |  |  |  |  |  |  |  |  |         |         |         |   |   |         |         |         |           |              |                |                  |                  |          |          |                  |                  |                   |                   |

**Project Description**

The revitalization of the City Centre Streetscape work involves sewer repairs, watermain replacement, utility replacement, road, pedestrian and streetlight replacement, sidewalk and streetscape work. Phase 1 and 2 were completed in 2007. Phase 3 was completed in 2009. Phase 4 and 5 were completed in 2010 as part of the ISF projects. Phase 6 Ouellette from Wyandotte to Elliott - is last of the original project and will be constructed in 2017 / 2018.

Moving forward, improvements to the east-west streets, including University, Chatham and Pitt are also necessary. These improvements will be similar in nature to the Ouellette Ave and Pelissier St improvements.

**Related Projects**

**Version Description**

2019: Ouellette from Wyandotte to Elliott (Phase 6) - \$350,000 (Construction)  
 2022: University from Victoria to Goyeau - \$4,200,000 (Engineering / Utility Relocation / Construction)  
 2024: Chatham from Victoria to Goyeau - \$400,000 (Engineering)  
 2026+: Chatham from Victoria to Goyeau - \$5,000,000 (Construction)

Note that timing of work differs from detailed forecast below. This is due to funds for the Phase 6 (Ouellette from Wyandotte to Elliott) construction work not being available until 2020 and 2022.  
 Phase 6 City Centre Streetscape Improvements - \$6,000,000

**Version Comments**

Phase 6 (Ouellette from Wyandotte to Elliott):  
 CR107/2017 approved a pre-commitment of \$1,850,000 to the 2018 5-year Capital Budget (\$350,000 in 2020 and \$1,500,000 in 2022).

| Operating Budget Impact |   | Exp/(Rev) | FTE Impact |
|-------------------------|---|-----------|------------|
| Effective Date          | Description   |           |            |
| Unknown                 | Most of these areas have many deficiencies and are in a state of disrepair. Currently, there aren't sufficient funds in the Operating budget to fix or maintain these areas. Repairs will be selective and most sidewalk repairs will be done with asphalt. | 0         | 0          |

|----------------------------|---|----------------------------|--|
| <b>Project Description</b> | Improvements are required from South Cameron Blvd. to approximately 280m upstream of E.C. Row Expressway to increase capacity. This will enable elimination of the temporary ponds. Provincial WECl funds will be leveraged in order to complete these works.<br>Once the necessary work is completed, these six temporary stormwater management ponds could be decommissioned and redeveloped, subject to appropriate provision of municipal services. | <b>Version Description</b> | 2019: Phased Construction - \$1,600,000<br>2021: Phased Construction - \$732,000<br>2022: Phased Construction - \$500,000<br>2023: Phased Construction - \$1,200,000<br>2026+: Phased Construction - \$1,500,000 |

# Project Version Summary

**Project #** ECP-034-07      **Service Area** Office of the City Engineer  
**Budget Year** 2019      **Department** Engineering  
**Asset Type** Unassigned      **Division** Infrastructure & Geomatics  
  
**Title** Campbell Ave./University Ave. Storm Sewer Engineering & Construction  
**Budget Status** Council Approved Budget  
**Major Category** Sewers  
**Wards** Ward 2  
**Version Name** Main (Active)

| <b>Project Description</b>  |                      |                                  |                     | <b>Version Description</b>  |  |             |             |             |             |             |             |                  |                   |  |
| These funds are required to rehabilitate the century old deteriorated sanitary sewer on Ojibway Parkway between the former Windsor Raceway and the Lou Romano Water Reclamation Plant. This sewer serves many of the industries located within the Ojibway Industrial Park. |                      |                                  |                     | 2023: Rehabilitation - \$3,000,000<br>2024: Rehabilitation - \$500,000<br>2025: Rehabilitation - \$500,000<br>2026+: Rehabilitation - \$1,000,000<br><br>This work would include identifying the newest technology to rehabilitate the sanitary sewer while ensuring that there would be minimal disturbance to the flow. It is critical to continually review the condition of this sewer due to its age and the volume of flow. This sewer provides service to the Weaver/Sprucewood industrial area. |  |             |             |             |             |             |             |                  |                   |  |

| ECP-009-07       | Intersection Improvements Program |                                    | Unknown                 | Upon completion of this project, road maintenance costs due to patching and maintaining gravel shoulders will decrease. These savings, however, will be offset by other road maintenance and snow removal costs resulting from the increased surface area of Lauzon Parkway and County Rd. 42, as well as the addition of the East/West Arterial. Operating cost figures cannot be determined at this time as the project is still in its preliminary stages, however, it is assumed that costs will be lower immediately following completion of the project and will escalate as the road ages. | 0         | 0          |

| Little River steel retaining walls and earth berms were constructed between Riverside Drive and the Via Tracks in the 1980s to provide flood protection to the immediate flood prone area. The dykes provide vital flood protection for over 2000 homes and the Little River Pollution Control Plant. Condition survey and structural evaluation of the 2.5km system of Little River Steel Retaining Walls was completed in 2012. Sections of the system are near the end of accelerated service life and require immediate rehabilitation. The balance of the system requires rehabilitation in order to extend service life beyond 10 years. |                      |                                  |                  | 2020: Phased replacement of retaining wall - \$1,000,000<br>2023: Phased replacement of retaining wall - \$1,000,000<br>2024: Phased replacement of retaining wall - \$500,000<br>2025: Phased replacement of retaining wall - \$500,000<br>2026+: Phased replacement of retaining wall - \$19,340,000<br><br>The City has partnered with ERCA in order to obtain Provincial Water and Erosion Control Infrastructure (WECI) funds. |                              |             |             |             |                             |             |             |                  |                   |  |

| This program relates to roads which do not currently have sidewalks. This funding is to be used to finance the construction of sidewalks, of which a portion will be recovered through the Local Improvement process. |                      |                                    |                     | 2019 Proposed Works:<br>Electricity Drive   |                                 |             |             |             |             |             |             |              |              |  |

| <b>Project Description</b>  |                      |                                  |                  | <b>Version Description</b>  |                              |             |             |             |                             |             |             |              |                  |                   |
| The Little River municipal drain provides conveyance of storm water for 33% of the City surface area. The section from Lauzon Road to the VIA Rail right-of-way was improved to the current cross-section in 1975. A report exploring options for this section using natural channel design techniques to create a sustainable river corridor was completed in 2012. Proposed design features and plantings would create a more sustainable river corridor and control sediment with off-line pool. |                      |                                  |                  | 2020: Municipal Class Environmental Assessment, Schedule B - \$100,000<br>2024: Design & Construction - \$265,000<br>2025: Construction - \$500,000<br>The City of Windsor will partner with the Essex Regional Conservation Authority (ERCA) in order to make an application for Provincial Water and Erosion Control Infrastructure (WECI) funds. |                              |             |             |             |                             |             |             |              |                  |                   |

| Sixth Concession Drain provides the storm water outlet to over 900 hectares of land within the City of Windsor via approx. 4.5 km of open channel plus 1.4 km of piped drain/sewer. Condition of Baseline Road and the municipal drain along it have deteriorated and require emergency repairs and remediation in order to maintain service. |                      |                                    |                         | 2019: Priority 2 - Along Baseline Rd, from 9th Concession to outlet at Little River - \$200,000<br>2020: Priority 3 - Along rear yards, east of 8th Concession - \$500,000<br>2021: Priority 4 - Along Baseline Rd, from east of 8th Concession to 9th Concession - \$200,000<br>2022: Priority 4 (cont'd) and Priority 5 - Along rear yards, between 7th Concession and 8th Concession - \$535,000<br>2023: Priority 5 (cont'd) - \$485,000 |  |                             |             |             |             |             |             |                  |                   |              |

| Several engineering studies are required prior to the development of the Sandwich South Employment Lands, including CR42 and E Pelton Secondary Planning Areas. Little River Watershed Flood Hazard Mapping is a mandate of the Provincial Policy Statement (PPS). Master Servicing Studies will provide details for extension of municipal services. Municipal Class EA's are required for upgrades to the existing Class II Collector and Class II Arterial roads. |                      |                                    |                     | 2019: \$1,000,000 - Little River Watershed Flood Hazard Mapping / Master Servicing Study for Sandwich South Lands<br>2020: \$1,300,000 - Little River Watershed Flood Hazard Mapping / Master Servicing Study for Sandwich South Lands<br>2026+: \$200,000 - 7th Concession Road Environmental Assessment<br>\$200,000 - 8th Concession Road Environmental Assessment<br>\$200,000 - 9th Concession Road Environmental Assessment<br>\$200,000 - Baseline Road Environmental Assessment<br>\$200,000 - County Road 17 Environmental Assessment |                                 |             |             |             |             |             |             |             |              |              |

| As part of the Central Box EA, works related to both the Dougall Avenue-Ouellette Place intersection, along with a new East-West Connection, be made a priority. The works related to the Dougall Avenue-Ouellette Place intersection have been identified as part of the 2019, 7-year Capital Plan. Other works identified in the EA were not prioritized and remain in the 2026+ timeframe at this time.<br><br>7161061 |                      |                      |                  | Note that there are timing differences between when funds are required and when funds are available, which will result in the project incurring financing charges.<br>CR172/2019 commits the following:<br>a) 2021 \$1,450,000 F169<br>b) 2022 \$400,000 F176<br>c) 2023 \$400,000 F176<br>d) 2023 \$3,160,000 F169<br>e) 2023 \$1,502,000 F169 NOTE: Should the City received the one-time Federal Gas Tax funding the 2023 F169 funding is rescinded and the funds reallocated as defined and approved in Council Report C53/2019 and the \$1,502,000 will be funded in 2019 from F176. |  |                |                  |                  |                  |                |             |                   |                   |  |  |                  |                   |  |  |  |  |

| For compliance with Ontario Ministry of the Environment and Climate Change (MOECC) Provincial Officers Orders and as per MOECC Amended Environmental Compliance Approval for the Closed Malden Rd. Western Inert Landfill (Malden Park), the City is required to mitigate the potential of off-site landfill gas migration identified in gas monitoring wells in the vicinity of the John McGivney Children's Centre/City of Windsor joint use parking lot. The work consists of engineering, preparation of tender documents, excavation of refuse and fill beneath the joint use parking lot and subsequent restoration of the parking lot. The preliminary cost for this work ranges from \$1.3 million to \$2.608 million, and is highly dependent on the amount of refuse requiring proper disposal discovered upon excavation of the site. |                      |                                    |                              | CR357/2018, report C 104/2018 approves the reallocation of \$98,000 to 7181029 to fund the installation of methane gas monitors at Malden Park Visitor Centre. |  |             |             |             |             |             |             |                  |                   |  |

### Project Description

The project was established for repairs to the particular facility and other LRWRP capital related costs. It is funded from the dedicated Pollution Control Reserve, Fund 208.

The account represents funding for various works including placeholders for planned and unplanned repairs on a year-by-year basis. The work anticipated and completed varies annually dependent on manpower, project scope and can span several years.

Due to the large amount of mechanical, electrical and structural infrastructure in the facility, annual funding from the Sewer Surcharge was put in place in order to address the depreciation of this infrastructure and provide for ongoing replacement, rehabilitation and repair. This ensures the reliability and integrity of the infrastructure in order to properly maintain the operation due to its critical nature.

The facility has redundancy designed and built-in so that when equipment requires repair it can be taken out of service and still maintain the overall facility capacity. However, the repair must be completed in a timely manner in order for it to be brought back into service to ensure the reliability and integrity of the overall operation. Significant portions of the equipment are at what is considered to be its normal life span (15 to 40 years), dependent on the type of equipment. As a result, it is scheduled to be replaced as preventative maintenance prior to failure.

### Version Description

2019 Capital Works: \$4,840,000  
 \$200,000 - SCADA Equipment: Long term change over of PLC communications as existing is becoming obsolete. An extended program to replace the Genius communications bus to Profinet Ethernet standard.  
 \$50,000 - BAF Valve Repair / Replacement: Ongoing project to replace valves that are beyond end of life.  
 \$60,000 - Main Pumphouse Valves and Actuators: The valve actuators are at the end of their service life and replacement is required to ensure reliability.  
 \$400,000 - BAF Cell Refurbishment: Air piping has excessive leaks impacting operation of the process within the cell. There are 16 cells each requiring cell media removal and piping repairs.  
 \$50,000 - UV Module Replacement: Modules require annual rebuilding and replacement units provide increased reliability and flexibility of system  
 \$50,000 - Sluice Gate Refurbishment: Gates need to be refurbished as they do not seal up properly and consequently it is difficult to properly isolate equipment for maintenance.  
 \$1,810,000 - Diesel #2 / MCC / Switchgear Upgrade: Involves the replacement of the existing diesel generator, motor control centre and switch gear. The equipment is 40+ years old and is at the end of its useful life.  
 \$150,000 - Main Pumphouse Piping: Replacing gates and actuators due to age.  
 \$300,000 - Security: Realignment and replacement of entrances and gates is required to due closure of gates from security audit and continued operation.  
 \$120,000 - Centrifuge Main / Backdrive Replacement: Centrifuge variable speed drives have a limited service life and require replacement in order to ensure operational reliability.  
 \$150,000 - Biorem Rehabilitation: Replacement of subfloor and media.  
 \$1,200,000 - LRWRP Pump Station: Construction of on site pump station to address site drainage surcharging and flooding of below grade facilities during wet weather.  
 \$300,000 - Miscellaneous: To address the equipment repair and replacement which occurs due to unanticipated equipment failure. This is a placeholder due to the varying nature of this work.

### Version Comments

PRE-COMMITMENT:  
 As per CR23/2019, Report # C1/2019, Council approved a pre-commitment of \$1,200,000 in 2019.  
 As per CR25/2019, Report # C6/2019, Council approved a pre-commitment of \$1,810,000 in 2019.

**2019 Anticipated Capital Works:**

**SCADA Equipment:** Long term change over of PLC communications as existing is becoming obsolete. An extended program to replace the Genius communications bus to Profinet Ethernet standard.

**BAF Valve Repair / Replacement:** Ongoing project to replace valves that are beyond end of life.

**Main Pumphouse Valves and Actuators:** The valve actuators are at the end of their service life and replacement is required to ensure reliability

**BAF Cell Refurbishment:** Air piping has excessive leaks impacting operation of the process within the cell. There are 16 cells each requiring cell media removal and piping repairs.

**UV Module Replacement:** Modules require annual rebuilding and replacement units provide increased reliability and flexibility of system

**Sluice Gate Refurbishment:** Gates need to be refurbished as they do not seal up properly and consequently it is difficult to properly isolate equipment for maintenance.

**Diesel #2 / MCC / Switchgear Upgrade:** Involves the replacement of the existing diesel generator, motor control centre and switch gear. The equipment is 40+ years old and is at the end of its useful life.

**Main Pumphouse Piping:** Replacing gates and actuators due to age.

**Security:** Realignment and replacement of entrances and gates is required to due closure of gates from security audit and continued operation

**Centrifuge Main / Backdrive Replacement:** Centrifuge variable speed drives have a limited service life and require replacement in order to ensure operational reliability

**Biorem Rehabilitation:** Replacement of subfloor and media.

**LRWRP Pump Station:** Construction of on site pump station to address site drainage surcharging and flooding of below grade facilities during wet weather.

**Miscellaneous:** To address the equipment repair and replacement which occurs due to unanticipated equipment failure. This is a placeholder due to the varying nature of this work.

### Project Description

Established for the repairs of the particular facility and other LRPCP capital related costs. Funded from the dedicated Pollution Control Reserve, Fund 208.

The account represents funding for various works including placeholders for planned and unplanned repairs on a year-by-year basis. The work anticipated and completed varies annually dependent on manpower, project scope and can span several years.

Due to the large amount of mechanical, electrical and structural infrastructure in the facility, annual funding from the Sewer Surcharge was put in place in order to address the depreciation of this infrastructure and provide for ongoing replacement, rehabilitation and repair. This ensures the reliability and integrity of the infrastructure in order to properly maintain the operation due to its critical nature.

The facility has redundancy designed and built-in so that when equipment requires repair it can be taken out of service and still maintain the overall facility capacity. However, the repair must be completed in a timely manner in order for it to be brought back into service to ensure the reliability and integrity of the overall operation. Significant portions of the equipment are at what is considered to be its normal life span (15 to 40 years), dependent on the type of equipment. As a result, it is scheduled to be replaced as preventative maintenance prior to failure.

### Version Description

2019 Capital Works: \$1,245,000  
 \$50,000 - RS Pump Rebuilds: Rebuild of the raw sewage pumps rotating assembly to maintain reliability, and efficiency is required on a 5 to 10 year cycle depending on wear.  
 \$200,000 - PST Refurbishment: PSTs 1 to 6 structures require refurbishment and repairs and work is scheduled based on assessments.  
 \$200,000 - FST Refurbishment: FSTs 1 to 6 structures require refurbishment and repairs and work is scheduled based on assessments.  
 \$35,000 - Misc. Concrete Tank and Channel Refurbishment: Concrete tank and channel structures require refurbishment and repairs and work is scheduled based on assessments.  
 \$200,000 - Aeration Cell Refurbishment: Aeration cell concrete tanks require refurbishment and repairs and work is scheduled based on assessments.  
 \$60,000 - Sluice Gate Refurbishment: Gates need to be refurbished as they do not seal up properly and consequently are difficult to isolate for maintenance.  
 \$150,000 - Dewatering Polymer Batching System: The polymer system is at the end of it's useful life and due to wear and unit obsolescence replacement has become necessary.  
 \$100,000 - Sludge Pumphouse Valve Replacement: Sludge pumphouses 1 and 2 require valve and actuator replacements.  
 \$250,000 - Miscellaneous: To address the equipment repair and replacement which occurs due to unanticipated equipment failure. This is a placeholder due to the varying nature of this work.

**2019 Anticipated Capital Works:**

**RS Pump Rebuilds:** Rebuild of the raw sewage pumps rotating assembly to maintain reliability, and efficiency is required on a 5 to 10 year cycle depending on wear

**PST Refurbishment:** PSTs 1 to 6 structures require refurbishment and repairs and work is scheduled based on assessments.

**FST Refurbishment:** FSTs 1 to 6 structures require refurbishment and repairs and work is scheduled based on assessments.

**Misc. Concrete Tank and Channel Refurbishment:** Concrete tank and channel structures require refurbishment and repairs and work is scheduled based on assessments.

**Aeration Cell Refurbishment:** Aeration cell concrete tanks require refurbishment and repairs and work is scheduled based on assessments.

**Sluice Gate Refurbishment:** Gates need to be refurbished as they do not seal up properly and consequently are difficult to isolate for maintenance.

**Dewatering Polymer Batching System:** The polymer system is at the end of it's useful life and due to wear and unit obsolescence replacement has become necessary

**Sludge Pumphouse Valve Replacement:** Sludge pumphouses 1 and 2 require valve and actuator replacements.

**Miscellaneous:** To address the equipment repair and replacement which occurs due to unanticipated equipment failure. This is a placeholder due to the varying nature of this work.

### Project Description

Established for repairs to various pumping station facilities and other capital related costs. Funded from the dedicated Pollution Control Reserve, Fund 208.

The account represents funding for various works including placeholders for planned and unplanned repairs on a year-by-year basis. The work anticipated and completed varies annually dependent on manpower, project scope and can span several years.

Due to the large amount of mechanical, electrical and structural infrastructure in the facilities, annual funding from the Sewer Surcharge was put in place in order to address the depreciation of this infrastructure and provide for ongoing replacement, rehabilitation and repair. This ensures the reliability and integrity of the infrastructure in order to properly maintain operations due to their critical nature.

The facilities have redundancy designed and built-in so that when equipment requires repair, they can be taken out of service and still maintain the overall facility capacity. However, repairs must be completed in a timely manner in order for it to be brought back into service to ensure the reliability and integrity of the overall operation. Significant portions of the equipment are at what is considered to be its normal life span (15 to 40 years), dependent on the type of equipment. As a result, it is scheduled to be replaced as preventative maintenance prior to failure.

### Version Description

2019 Capital Works: \$750,000  
 \$250,000 - Drouillard: MCC is exceeding service life and requires replacement.  
 \$150,000 - Grand Marais: Replacement of pump on the south side of station. Parts are not available to repair existing unit.  
 \$150,000 - St. Paul: Pumps and valving need to be refurbished and rebuilt due to age.  
 \$200,000 - Miscellaneous: To address the equipment repair and replacement which occurs due to unanticipated equipment failure. This is a placeholder due to the varying nature of this work.

**Drouillard:** MCC is exceeding service life and requires replacement.

**Grand Marais:** Replacement of pump on the south side of station. Parts are not available to repair existing unit.

**St. Paul:** Pumps and valving need to be refurbished and rebuilt due to age.

**Miscellaneous:** To address the equipment repair and replacement which occurs due to unanticipated equipment failure. This is a placeholder due to the varying nature of this work.

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                     | Victoria Ave. was proposed to be resurfaced by milling off the existing asphalt and repaving the road from Tecumseh Rd. W. to Jackson Park. It is the opinion of Administration that this road has now deteriorated beyond the point where milling and repaving is a viable option for rehabilitation. This road should be fully reconstructed. The estimated cost for this work is \$625,000. Recommendations regarding this project will follow as part of a separate report to City Council. |             |             |             |                             |             |             |             |              |              |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                     | Ypres. Blvd. is proposed to be resurfaced by milling off the existing asphalt and repaving the road from Forest Ave. to Walker Rd. and can be combined with other work under tender to be completed during the 2018 construction season if approved. This project may be delayed as full sewer reconstruction of this section is planned for the 2022 calendar year. |             |             |             |                             |             |             |             |              |              |  |

| <b>Project Description</b>   |                      |                                  |                  | <b>Version Description</b>   |  |             |             |             |                             |             |             |             |              |              |
| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | This project involves the reconstruction of St. Luke pavement between Seminole St. and the Essex Terminal Railway. Because watermain funding will become available until 2019, work will be tendered in the Spring of 2019 and completed in the 2019 construction season.  |  |             |             |             |                             |             |             |             |              |              |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                    |                  | Briarbank Dr. will be resurfaced from Mulberry Rd. to Rosebriar Rd. by milling off the existing asphalt and repaving the road. Upon approval, this work will be combined with other work under tender to be completed during the 2018 construction season. |                                 |             |             |             |                             |             |             |              |              |         |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                  |                  | Wyandotte St. E. from St. Rose Ave. to Janisse Dr. is a concrete pavement. The westbound lanes require repair in various areas while the eastbound lanes will require removal of the pavement structure and reconstruction. The first possible opportunity to fund and to tender this work is in the Spring of 2019 with completion in the 2019 construction season. |             |             |             |             |                             |             |             |              |              |  |  |  |  |  |  |  |  |

| On Tues. Jan. 16th, 2018, City Council approved the 2018 Enhanced Capital Budget Plan for a number of specific projects in the form of placeholder allocations subject to detailed reports to be prepared for Council's consideration. |                      |                                    |                     | Northwood St. will be reconstructed from Cleary St. to Daytona Ave. There is no watermain work. Upon approval, this work will be tendered in late 2018 and completed during the 2019 construction season. |                              |             |             |                             |             |             |             |              |              |  |

**Project Description**

This project will merge the following five programs, which used to be separate projects in the Capital Budget, into one project:

- Zoom / Closed Circuit Television (CCTV) Program – to evaluate sewer conditions and assist in capital planning
- Smoke & Dye Testing Program – to identify infiltration and cross connection issues for identification of repairs required to reduce basement flooding
- Small Sewer Repairs Program – to address numerous small deficiencies identified in the sewer system which, if left unchecked, can manifest into sinkholes and larger repairs
- Basement Flooding Mitigation Measures Program – for the implementation of a downspout disconnection program and investing in live flow monitoring equipment
- Basement Flooding Prevention Subsidy Program – to install backwater valves and/or sump pumps in areas subject to, or are susceptible to, basement flooding and help subsidize homeowners for part of the associated costs.

**Version Description**

This consolidates the following previously approved projects into one program:

- 1) OPS-008-07 Closed Circuit Television (CCTV)
- 2) OPS-003-10 Small Sewer Repairs
- 3) ECP-001-12 Basement Flooding Mitigation Measures
- 4) EIT-002-11 Basement Flooding Prevention Subsidy Program

|---|--|
| <p><b>Project Description</b></p> <p>Citywide rehabilitation and reconstruction of existing paved roads comprises of 1,069 km (2,378 lane km) including the E.C. Row Expressway. As of June 2018, 19% of the road system is rated 'Now' Deficient. The estimated replacement value of roads is approximately \$2.08 billion. To prevent further deterioration of the roads, a minimum annual expenditure of \$50 - \$60 million is required. Industry standard life cycle is 35 years, thus this maintenance is an ongoing perpetual cost. Specific projects are to be approved by Council prior to proceeding. It should be noted that years 2019 and beyond are based on current assessed condition and applied asset management.</p> | <p><b>Version Description</b></p> <p>2019: Citywide Rehab (excl EC Row Rehab) = \$6,913,173 / EC Row Rehab = \$1,239,090<br/>         2020: Citywide Rehab (excl EC Row Rehab) = \$6,532,423 / EC Row Rehab = \$2,000,000<br/>         2021: Citywide Rehab (excl EC Row Rehab) = \$7,283,642 / EC Row Rehab = \$1,000,000<br/>         2022: Citywide Rehab (excl EC Row Rehab) = \$6,771,512 / EC Row Rehab = \$1,000,000<br/>         2023: Citywide Rehab (excl EC Row Rehab) = \$5,600,000 / EC Row Rehab = \$2,000,000<br/>         2024: Citywide Rehab (excl EC Row Rehab) = \$8,550,000 / EC Row Rehab = \$500,000<br/>         2025: Citywide Rehab (excl EC Row Rehab) = \$7,600,000 / EC Row Rehab = \$2,000,000</p> <p>Note: Sewer and watermain information need to be taken into consideration prior to commencing any project. This includes consideration of any construction plans by utility companies as well as any change in dictated priorities that may ensue as time goes by.</p> |

| <b>Project Description</b>  |                      |                                    |                     | <b>Version Description</b>       |  |             |             |             |             |             |             |                  |                   |  |
| The City has 80 kms of paved alleyways, primarily in the older sections of the City, which serve as part of the public right of way. This pavement degrades over time and requires periodic replacement and repairs. As of June 2018, 32 kms of paved alley are "now" deficient, 23 kms will be "now" deficient in 1 - 5 years, 13 kms will be "now" deficient in 6 - 10 years, and 12 kms are considered "adequate". |                      |                                    |                     |                                  |  |             |             |             |             |             |             |                  |                   |  |

| The corridors of Dougall Avenue, Howard Avenue, and Huron Church Road represent gateways to the community. Aesthetic improvements to the structures at westbound E.C. Row Expressway as well as at the Ouellette Avenue overpass of CPR/ETR will provide continuity and enhancement of appearance for those travelling these routes. |                      |                                  |                                  |                                   |                            |             |             |                             |             |             |             |              |              |  |                  |  |                   |  |

**Project Description**  
 The rehabilitation of the city's roadways is performed on a life cycle basis and subject to available funding in Project OPS-001-07 (Citywide Road Rehabilitation). This work tends to be done on entire sections of a roadway (i.e. Ouellette Avenue from Erie Street to Giles Blvd.) In some instances, however, significant repairs to roadways are required that are too small to be assigned to the annual OPS-001-07 rehab. cycle but large enough to put the ROW Maintenance operating budget under strain. The Minor Road Rehab. project addresses these types of pavement repairs and allow the ROW Maintenance operating budget to focus on potholes and other small right of way repairs. Also included in this program is the routing and sealing of cracks in asphalt, spray patching, and pavement and concrete road panel repairs to extend the life cycle where possible.

**Version Description**  
 CR131/2014, Report #17162 approved a new Municipal Funding Agreement for the Gas Tax Funds in the years 2014-2018. As a result, additional Gas Tax funds received are allocated to this project freeing up F169 Pay-As-You-Go funds earmarked for Fire Hall #6.

| <p><b>Project Description</b></p> <p>Ongoing maintenance and rehabilitation of existing bridges throughout the City, including bridges for roadways, railways, streams and drains and pedestrian bridges. The program funds rehabilitation of 59 bridges, 11 culverts with spans greater than 3m, 5 pedestrian bridges, and 1 subway. An annual expenditure of \$7-\$12 million is required to replace these bridges on a 50 to 75 year cycle.</p> <p>Note: List may change subject to ongoing OSIM investigations as well as the results of Structural Condition Surveys. In addition, unexpected failures of structures may occur which would require reprioritization of rehabilitation.</p> | <p><b>Version Description</b></p> <p>2019: \$3.200 million - CN at E/B Collector (#144), Curry at Grand Marais Drain (#118), University at CPR (#114)<br/>         2020: \$3.399 million - EC Row at Dominion W/B (#116), EC Row at Dominion E/B (#117), Riverside at CPR (#113)<br/>         2021: \$3.034 million - Various Structures being reviewed for priority<br/>         2022: \$4.000 million - Various Structures being reviewed for priority<br/>         2023: \$5.000 million - Various structures being reviewed for priority<br/>         2024: \$0.500 million - Minor repairs on various structures (to be determined)<br/>         2025: \$0.500 million - Engineering evaluation / design for Drouillard &amp; Wyandotte (#206), minor repairs on various structures (to be determined)</p> <p>Note: the Wyandotte at CPR (#206) structure was originally slotted in for full rehabilitation in 2022 at a cost of approximately \$15.0 million. A minor rehabilitation is being completed in 2017 that will allow the full rehabilitation to be deferred 10-years from completion, 2027.</p>  |             |         |  |  |               |           |      |           |     |      |           |     |      |             |     |      |             |     |      |           |     |      |     |     |      |     |     |      |             |             |      |             |     |

### Project Description

This program covers the rehabilitation of existing sidewalks citywide. There are 939 kms of sidewalks in the City, of which 10 kms are in "Poor" condition and 116 kms are in "Fair" condition. Based on a 40-year replacement cycle, the perpetual annual cost for the preservation of this infrastructure is approximately \$2.5 million. This would be in addition to the approximately \$12.1 million required to address all "Poor" and "Fair" sidewalks and to widen the sidewalks to AODA standards at the time of replacement. From a risk management point of view, funding should be increased to reduce trip and fall claims.

Effective January 1, 2016, the Accessibility for Ontarians with Disabilities Act (AODA) required width of sidewalks to increase from 1.2 meters to 1.5 meters. This increases the cost of sidewalk replacements. As the change is implemented, Administration is including the increased costs in budget projections.

This program also includes Collector and Arterial roads which do not currently meet the City policy related to the provision of sidewalks. This funding is to be used to fund the construction of sidewalks on streets that do not meet current policy requirements.

### Version Description

Because the 7-Year Capital Budget does not fully address immediate needs, the annual sidewalk inspection and condition assessment program as well as additional liability claims will influence replacements in 2019 and beyond. There are insufficient capital funds available in this program to complete the identified rehabilitations detailed on the attached list of sidewalks in "poor" condition which will lead to additional liability claims.

CR131/2014, Report 17162 approved new Municipal Funding Agreement for the Gas Tax Funds in the years 2014-2018. As a result additional Gas Tax funds received are allocated to this project freeing up F169 Pay-As-You-Go funds earmarked for the Fire Hall #8.

### Version Comments

CR178/2019 Report S 211/2019 approved \$52,600 from 2019 Capital Budget Program for sidewalk on the south side of Labelle Street between Youngstown and California Ave (project ID 7191006)

| The City has approximately 150km of In Service Alleys. Of the 150km, approximately 70km are unpaved. Over the course of time, as a result of routine maintenance and various construction activities, drainage in many of the unpaved alleys has become an issue leading to improper drainage, standing water and flooding on private property. In order to address these concerns, it is often necessary to install additional drainage, lower the existing grades to promote drainage, or remove damaged areas in the alleys. Alley condition ratings and residential complaints are used to track problem alleys requiring remedial works. This fund would be used to address alley areas of concern. |                      |                                  |                  |                                   |  |             |             |             |                             |             |             |             |              |              |

**Project Description**  
 This program is used to provide improvements and upgrades for all 61 of the city's 'At Grade' railway crossings. The City of Windsor, by order of the Canadian Transportation Agency, is required to cost share in these upgrades with the railways. Placeholder amounts are to be used as needs arise. There are annual federal cost sharing opportunities available for at-grade rail crossing upgrades. Due to amendments to the Grade Crossing Regulations introduced by Transport Canada in 2014, all required upgrades to at-grade crossings will need to be completed by November 2021. In order to increase our opportunity to receive federal cost sharing, Administration recommends that required upgrades be identified, applicable funding be applied for, and required upgrades scheduled as early as possible. It is anticipated that an additional \$600,000 will be required to complete the upgrades and bring all the at-grade crossings up to standards.

**Version Description**  
 Proposed Railway Crossings:  
 - Walker Road at the VIA station  
 - Division CNR Crossing east of Walker Road  
 - McDougall Crossings - ETR & CPR  
 -  
 CR394/2018, Report #127/2018 approved the submission of applications to the Rail Safety Improvement Program: Infrastructure, Technology and Research (ITR) component for 2019-2020 up to a maximum of \$1,250,000 in grant funding. Should this application submission be successful, \$252,500 in City funding from 2019 will be committed for the City's funding component for the projects.
