Department: Engineering

- 1) **Description of Barrier Removal Project and how it promotes universal access to all persons with disabilities (include appropriate references to attitudinal, informational, physical, technological, and architectural or policy barriers):**

The Peace Lutheran Church is located on the northwest corner of Tecumseh Rd East and Rossini Boulevard. The Church fronts onto Rossini Boulevard and the main entrance has a concrete at grade entrance off of Rossini Boulevard. The entrance is also connected to the church parking lot located on the north side of the building by a concrete walkway. The church is located directly on a bus route with a drop off / pick up located on Tecumseh Rd East immediately adjacent to the building. Access to the church entrance by patrons using public transportation is by walking directly on Rossini Boulevard to the church

entrance. Rossini Boulevard is a road separated by a median boulevard resulting in room for a travelling car and a parked car in each direction. When cars are parked on the street there is little room to walk safely down the road to the entrance to the church. This condition is worse in winter when there is built up ice and snow on the road. The placement of a sidewalk along the west side of Rossini from Tecumseh Rd East northerly to the church entrance would provide a route of safe passage for all pedestrians attending the facility.

2) Provide a list of users and groups that will benefit from this barrier removal activity:

A list of the user groups includes, but is not limited to the following:

- Peace Lutheran Church congregation
- Church Council
- Church Finance Committee
- Bible Study Group
- Sunday School
- Other standing and specialty committees
- Big Book Alcoholics Anonymous
- Building Blocks 4 Better Babies
- Windsor Essex Canoe Club
- East Windsor Narcotics Anonymous
- Golden Mile Anonymous
- Rose City Archery
- Tops (weight loss group)
- Windsor Lady Expos Softball
- Herman High School
- Spanish Congregation

3) Identify all partners in this project:

No anticipated funding partners at this time

4) Identify in kind and volunteer contributions:

No voluntary contributions at this time

5) If this is for a modification to the built environment, has your site been audited for accessibility using the Windsor Barrier Free Design Standards?

Yes No Comments:

This is not a modification to the built environment; it is a new sidewalk to provide a more user friendly access to the building.

6) Does the project meet or exceed Ontario Building Code or Windsor Barrier Free Design Standards requirements? (Explain)

The sidewalk will be built to the applicable design standards.

7) Does the vendor/supplier/designer/contractor of this project support the principles of full accessibility for people with disabilities?

Yes No Comments:

8) Appropriate supporting Documents to be provided at the meeting: Letters of Support Plans/drawings Cost Analysis Other (Explain) (Where a project is very large approval may be obtained in stages eg: approval in principle, approval after plans or drawings are available, final approval)

No letters of support were obtained for this submission. Verbal support has been received by the church and if letters of support from the parish or the neighborhood is required, the church has indicated that they can obtain and provide them.

9) What is the expected project completion date?

Pending approval of the necessary funding, the work can be completed in the 2015 construction season.
