**5.3 NaviLens**

*NaviLens is a system that allows, through some signals placed in the right places, blind people to detect them with their phone. Each one of these*

*signs indicate, in an auditory way, in what direction one should go and what is the situation of the person with respect to the indicator poster, in addition to containing information of all kinds. The system consists of labels with colour codes similar to bar codes or QR codes that are placed in the points that you wish to identify or in which you want to place relevant information for the user. These codes are read by an application that makes use of the camera of the mobile device. The information obtained from each label is read by voice.*
