

## 5.0 SPECIAL STREETSCAPE IMPROVEMENT AREAS

The primary objective of the design of Riverside Drive is to create a vibrant and active pedestrian friendly streetscape. Pedestrian friendly means a clearly defined pedestrian route that is identified separately from vehicular traffic areas; such as easily navigated, barrier free sidewalks, open spaces, walkways and well-marked crosswalks.

It is preferable that Pedestrian Priority Areas are identified and then fostered through buffering from street traffic by the use of landscaping and buffering by including streetscape elements and street furniture/amenities.
