

# Honey Locust

*Gleditsia triacanthos var. inermis*

Hardiness Zone	5
Mature Height	40-70 feet
Mature Form	Rounded to broad spreading, rather open
Features	Compound leaves with small leaflets, leading to a dappled shade under the tree; autumn color usually yellow
Insect or Diseases	Canker, leaf spot, powdery mildew, root rot, honeylocust borer, webworm, spider mites, plant bugs
Culture	Full sun; moist, well drained soil; tolerates drought, high pH, and salt
Notes	Many insect and disease problems have become serious due to the overuse of this species; cultivars that produce seed pods can be messy

## Size

## Exposure

## Tolerance

Wind	No
Wet Sites	No
Dry Sites	Yes
Alkaline Soil	Yes
Salt	Yes
Air Pollution	No
Soil Compaction	No

## Uses

Windbreak	No
Street	Yes
Specimen	No
Shade	Yes
Massing	No
Screen	No
Patio	No
