String Pull

WHAT YOU WILL NEED:

- Cardboard box of any size
- Materials, such as: ribbon, string, scarf, yarn, tulle, or rope.
- Scissors, knife or small tool with a sharp end

WHAT TO DO NEXT:

1. Select a cardboard box.
2. Poke small holes into the bottom and/or sides of the box.
3. Cut the string or material and tie a knot.
4. Insert the string into one of the holes and tie a knot into the other end.
5. The child enjoys pulling the string back and forth through the hole and learns that things can temporarily disappear, and then to re-appear again.
