1.20.13 METRIC

All provisions are interpreted solely on the basis of metric units.

Where a measurement is in imperial units, that measurement shall be converted to metric units. Any fraction shall be converted to a decimal and rounded according to Section 1.20.15.

1.20.15 ROUNDING

Unless otherwise stated, the following shall apply in determining the rounding digit:

For a provision shown as a whole number (e.g. 220), the rounding digit is the first whole number left of the decimal place.

For a provision shown to the first decimal place (e.g. 3.0), the rounding digit is the first digit right of the decimal place.

For a provision shown to the second decimal place (e.g. 3.50), the rounding digit is the second digit right of the decimal place.

For a provision that is calculated by multiplying or dividing by a percent or a ratio or by averaging two or more numbers, or for a provision where no explicit numerical value is provided, the provision shall be rounded to the first decimal place and the rounding digit is the first digit right of the decimal place.

Unless otherwise stated, the following rules for rounding shall apply:

Rule One: Determine your rounding digit and look to the digit right of it. If that digit is 0, 1, 2, 3, or 4, do not change the rounding digit and discard all digits that are right of the rounding digit. This is rounding down.

Rule Two: Determine your rounding digit and look to the digit right of it. If that digit is 5, 6, 7, 8, or 9, add one to the rounding digit and discard all digits that are right of the rounding digit. This is rounding up.

For either Rule One or Rule Two, if there is no digit right of the rounding digit, it is not necessary to round the number.

Example:

a) Rounding numbers:

	25.368	25.504	25.967
When rounded to the:	the number above becomes		
first whole number	25	26	26
first decimal place	25.4	25.5	26.0
second decimal place	25.37	25.50	25.97

b) The maximum dwelling units per hectare is 100:

If the calculated dwelling units per hectare is 100.4, that is rounded down to 100 and complies with the provision. (Rule One)

If the calculated dwelling units per hectare is 100.5, that is rounded up to 101 and does not comply with the provision. (Rule Two)

c) The minimum building setback is 25% of the building height:

If the building height is 10.0 m, the minimum building setback is 2.5 m.

If the building height is 11.0 m, the minimum building setback is 2.8 m (11 multiplied by 0.25 equals 2.75 and is rounded up to 2.8).

d) The maximum building height is equal to the length of the longest exterior lot line. This is a provision with no explicit numerical value:

24.20.7 CALCULATION OF REQUIRED PARKING SPACES

- .1 The required number of parking spaces for each use listed in Tables 24.20.1.1, 24.20.3.1 and 24.20.5.1 is calculated as follows:
 - .1 The gross floor area of that part of a building designed and used for a parking area, parking space, visitor parking space, accessible parking space, bicycle parking space, loading space, automatic car wash or coin-operated car wash is not included in the calculation of required number of vehicle parking spaces.
 - .2 If a parking rate is expressed as a ratio of parking spaces to the gross floor area, the parking space requirement for a use is to be calculated by dividing the applicable gross floor area of the use by the applicable parking rate.
 - .3 If the calculation of the number of required parking spaces results in a number containing a fraction, the number shall be rounded DOWN to the nearest whole number, but in no case may there be less than one parking space, except when the parking rate is zero.
 - .4 If a building is occupied or proposed to be occupied by more than one main use, the required parking for each main use is calculated on the basis of the percentage of gross floor area devoted to that use plus the equivalent percentage of any common areas and shared accessory uses in the building.
 - .5 If a Combined use Building is occupied in part by a Minor Commercial Centre or a Major Commercial Centre, the total required number of parking spaces is the sum of the required number of parking spaces for each Dwelling Unit and for the Minor Commercial Centre of a Major Commercial Centre.

24.20.10 SIZE OF PARKING SPACE

- .1 Each parking space shall have a minimum length of 5.5 m and a minimum width of 2.5 m, except where one side of the parking space is flanked by a wall or fence, each parking space shall have a minimum length of 5.5 m and a minimum width of 3.5 m.

- .1 For a Townhome Dwelling without an attached garage or carport, Multiple Dwelling with a minimum of five dwelling units, or Dwelling Units in a Combined Use Building, a minimum of 15 percent of parking spaces shall be marked as visitor parking.
- .5 If the calculation of the number of visitor parking spaces results in a number containing a fraction, the number shall be rounded DOWN to the nearest whole number, but in no case shall there be less than one visitor parking space and one required parking space.

24.22.10 SIZE OF VISITOR PARKING SPACE

- .1 Each visitor parking space shall have a minimum length of 5.5 m and a minimum width of 2.5 m, except where one side of the parking space is flanked by a wall or fence, each visitor parking space shall have a minimum length of 5.5 m and a minimum width of 3.5 m.
