

WALKING ROUTE SAFETY AUDIT

XXXX Elementary School

LOCATION: Windsor, Ontario - South Walkerville Neighbourhood

DESCRIPTION: Street-oriented safety assessment of walking path for students

Safety Issues Associated with Walking Route:	Yes	No	REMARKS
Does route have a sidewalk/path provided that is off the roadway?			
Does a clear, unobstructed "view ahead" of walking route (sidewalk) exist for users?			
Does the sidewalk/path "feel" safe to use for most or all of its route to/from school?			
Can abutting properties (homes and businesses) easily view walkers as they pass?			
Are sidewalks situated on both sides of the roadway?			
Are sidewalks separated from edge of the roadway by a buffer space (such as grass)?			
Sufficient width so users do not "spill over" onto adjacent roadways or private property?			
Do points exist along the route where hedges or other features impair/obstruct the path?			
Sufficient lighting along entirety of route to/from school (street and/or pedestrian lights)?			
Sufficient signs/markings/signals exist to direct pedestrians and drivers for safe activity?			
Are spaces that encourage loitering (alcoves, overgrown landscaping, etc.) present?			
Do road crossings have curb cuts and pavement markings to allow safe movement?			
Do busy intersections have crossing guards present to help children cross the road safely?			
Is the condition of sidewalk/path even and free of tripping hazards to ensure safe usage?
